16 November 2005

To: Chairman – Councillor Mrs CAED Murfitt
Vice-Chairman – Councillor JH Stewart
All Members of the Council

Dear Councillor

You are invited to attend a special meeting of **COUNCIL**, which will be held in **COUNCIL CHAMBER** at South Cambridgeshire Hall on **FRIDAY, 25 NOVEMBER 2005** at **9.30 a.m.**

Yours faithfully

GJ HARLOCK

Finance and Resources Director

AGENDA

	PAGES
1. APOLOGIES	
2. DECLARATIONS OF INTEREST To receive any declarations of interest from Members on matters arising in this agenda.	
3. LOCAL DEVELOPMENT FRAMEWORK - CAMBRIDGE SOUTHERN FRINGE REPORT	1 - 6
4. APPENDIX A - DRAFT CAMBRIDGE SOUTHERN FRINGE AREA ACTION PLAN - REPS RESPONSES	7 - 58
5. APPENDIX B - CAMBRIDGE SOUTHERN FRINGE AREA ACTION PLAN - SUBMISSION WITH CHANGES	59 - 178
6. APPENDIX C - INDEX OF REPRESENTORS	179 - 192

This page is intentionally left blank

SOUTH CAMBRIDGESHIRE DISTRICT COUNCIL

REPORT TO: Council

25 November 2005.

AUTHOR: Director of Development Services

**SOUTH CAMBRIDGESHIRE LOCAL DEVELOPMENT FRAMEWORK:
CAMBRIDGE SOUTHERN FRINGE AREA ACTION PLAN: PRE-SUBMISSION DRAFT
RESPONSE TO REPRESENTATIONS AND PROPOSED CHANGES**

Purpose

1. For Members to consider representations to the Pre-Submission draft Cambridge Southern Fringe Area Action Plan (AAP) and agree proposed responses to it. Members are also asked to agree the resulting proposed changes to the draft AAP and to submit it to the Secretary of State in January 2006.

Effect on Corporate Objectives

2.	<table border="1"> <tr> <td style="padding: 2px;">High quality, accessible, value for money services</td> <td rowspan="4" style="vertical-align: top;"> <ul style="list-style-type: none"> • Assist the Council's objectives to deliver quality accessible development in the district • Include the provision of affordable housing and the effective delivery of sustainable development at Cambridge Southern Fringe and other major developments on the edge of Cambridge and development of sustainable communities • Assist the delivery of the Community Strategy • Be used by Cambridgeshire Horizons to help the early and sustained development of the necessary services and infrastructure. </td> </tr> <tr> <td style="padding: 2px;">Quality village life</td> </tr> <tr> <td style="padding: 2px;">A sustainable future</td> </tr> <tr> <td style="padding: 2px;">A better future through Partnerships</td> </tr> </table>	High quality, accessible, value for money services	<ul style="list-style-type: none"> • Assist the Council's objectives to deliver quality accessible development in the district • Include the provision of affordable housing and the effective delivery of sustainable development at Cambridge Southern Fringe and other major developments on the edge of Cambridge and development of sustainable communities • Assist the delivery of the Community Strategy • Be used by Cambridgeshire Horizons to help the early and sustained development of the necessary services and infrastructure. 	Quality village life	A sustainable future	A better future through Partnerships
High quality, accessible, value for money services	<ul style="list-style-type: none"> • Assist the Council's objectives to deliver quality accessible development in the district • Include the provision of affordable housing and the effective delivery of sustainable development at Cambridge Southern Fringe and other major developments on the edge of Cambridge and development of sustainable communities • Assist the delivery of the Community Strategy • Be used by Cambridgeshire Horizons to help the early and sustained development of the necessary services and infrastructure.

A better future through Partnerships						

Background

3. Initial consultation took place with stakeholders between 14 April and 12 May 2004 on issues for the first tranche of DPDs under the "jumping the gun" regulations. An additional round of public participation took place on the Cambridge Southern Fringe Preferred Options Report between 1 October and 12 November 2004, involving issues and alternative options for the AAP. The results of these consultations fed into the Pre-Submission draft Cambridge Southern Fringe AAP, which was subject to six weeks consultation between 17 June and 29 July 2005.

Results of Pre-Submission Public Participation

4. Around 260 representations were received during the Pre-Submission public participation period to the Cambridge Southern Fringe AAP, slightly more the number received at the Preferred Options Stage (239 representations). Of these, approaching

25% were in support. The majority of representations have come from just a few organisations - principally Trumpington Meadows Land Company, Cambridgeshire County Council and the Government Office for the East of England who were seeking refinements rather than major changes to the Area Action Plan.

5. Officers have prepared proposed responses to representations on the Pre-Submission draft Cambridge Southern Fringe AAP and also to a small number of representations that have been received on the Draft Final Sustainability Report for the Cambridge Southern Fringe AAP. The proposed responses are set out in Appendix A for Members' consideration. The schedule:
 - a. lists all the representations in plan order by policy / paragraph,
 - b. identifies the respondent where it is an organisation,
 - c. indicates whether the representation objects to or supports the plan,
 - d. summarises the representation,
 - e. gives a proposed officer response
 - f. where any changes to the AAP document are considered appropriate in response to the representation, indicates how the AAP should be amended to address the issue
 - g. includes at the end, maps showing the physical extent of any site specific representations received.

6. Further Appendices provide other information to assist Members consider the representations and agree the AAP for Submission:

Appendix B	A version of the Cambridge Southern Fringe AAP, which highlights the changes arising from the responses to representations in Appendix A, and includes resulting changes to the Proposals Map
Appendix C	An index of all those making representations to the draft AAP for reference

7. The proposed changes to the AAP have been subject to independent sustainability appraisal by the Council's consultants to assess their impact in sustainability terms. In terms of the Sustainability Appraisal and Strategic Environmental Assessment (SA/SEA) the consultants have not identified any significant changes to the previous appraisal of the Pre-Submission documents, although they note some minor improvements in terms of sustainability for some changes and less sustainability benefits in terms of other changes (generally those where environmental requirements have been deleted from policies in response to representations from GO-East that they lie outside the scope of the planning system). Any new policies proposed have also been subject to appraisal. The consultants have not recommended any further changes to the Plan. Copies of the SA / SEA schedules are available to view as a background document on the Council's website.

Key Issues for Consideration

8. There are a number of changes proposed to the AAP in response to representations many of which are refinements rather than fundamental changes. These are identified in detail in the schedule at Appendix A and highlighted in the AAP at Appendix B. Members should focus their attention on the representations received and the proposed changes to the AAP (the struck through and underlined text indicated by a sideline in the margin of the page). However, in order to assist Members, some of the main changes arising from the representations to the AAP can be summarised as follows:

- An amendment to policy CSF/2 emphasising the need to link the Trumpington West development to the rest of Trumpington including Trumpington High Street.
- An amendment to policy CSF/4 clarifying that development does not detract from the character and setting of Cambridge.
- An amendment to policy CSF/9 to include the developer contributions for the provision of health and social care facilities to serve Trumpington West.
- The requirement for 25% water conservation measures has reluctantly been recommended to be deleted in policy in response to a representation from GO-East that this lies outside the scope of the planning system. A reference to the importance of this issue has been retained in the supporting text.
- The scope of the energy conservation policy has been amended to delete aspects which GO-East advise are outside the scope of the planning system.
- An update to paragraph 3.10 of the written justification setting out the County Council's proposed Strategic Open Space standard of 5.1 hectares per 1,000 population.
- An amendment to policy CSF/18 proposing that development will include provision of Strategic Open Space.
- A requirement for a strategic surface water drainage scheme.
- Allowing for more than one body to take responsibility for managing surface water drainage systems by setting requirements for any body or bodies to be publicly accountable with funding resources, expertise and integrated management with any other bodies.
- New chapter on delivery of the AAP (Chapter E3) which sets out the mechanisms for implementing the AAP and includes a housing trajectory, a requirement of the new plan making system which predicts delivery of the development
- New chapter on monitoring the AAP (Chapter E4) which highlights the importance of the plan, monitor and manage approach and sets out the indicators that will be used to monitor delivery of the Cambridge Southern Fringe.

9. Many of the representations which have not resulted in proposed changes to the Area Action Plan were repetitions or refinements of representations submitted at the Preferred Options stage in Autumn 2004 and considered by Council at its meetings in Winter/Spring 2005. Most of the representations seek refinements to the policies in the Area Action Plan. Some of the main themes of those representations, where no changes proposed are:

- The Area Action Plan is too detailed and too prescriptive.
- Trumpington West is not identified as a Green Belt release in the Cambridgeshire Structure Plan.
- There should not be any requirement for mitigating measures within South Cambridgeshire for development taking place in Cambridge City.
- Development should not be permitted to the south of the Park & Ride site.
- The proposed County Park should include less land between the edge of development and the motorway.
- The development will not improve the quality of developed edge of Trumpington.
- The Hospital development at Addenbrookes and the Bell School developments in Cambridge should not be required to contribute to mitigation measures in South Cambridgeshire.

- Development should be permitted in the green belt at north of Mingle Lane and at Cabbage Moor in Gt Shelford.
- The height of development on the countryside edges of Trumpington West should be to the detailed planning applications stage to be determined.
- The suggested threshold of 50% affordable housing is not reasonable.

Next Steps

10. Members are being asked to agree the Cambridge Southern Fringe AAP at this meeting for submission to the Secretary of State. However, if there are any matters arising from this meeting, they will be brought back to Council at its meeting on 9 December for final agreement. The revised Cambridge Southern Fringe AAP, together with the Core Strategy DPD, Development Control Policies DPD, Site Specific Policies DPD and the other Area Action Plans for Northstowe and Cambridge East that are the subject of separate meetings of Council, will be submitted to the Office of the Deputy Prime Minister in January 2006.
11. Further minor technical updating will also be required to the Cambridge Southern Fringe AAP and consistency across the plans will need to be checked to ensure that any consequential changes are made as a result of proposed changes in other DPDs. Members are asked to delegate this process to the Portfolio Holder if it involves any matters of policy and to the Development Services Director for purely technical changes.
12. Submission to the Secretary of State will trigger the start of a further statutory six week period during which representations can be made on the AAP. Once this consultation period has finished public views will also be sought and considered on any "objection" sites. This includes both new and alternative development sites put forward by objectors to the AAP and will give an opportunity for third parties to make formal representations before objection sites are considered by the Inspector. This is a new stage under the new plan making system. A public examination is then scheduled for July to October 2006 (with a recess in August) to be chaired by an independent Inspector who will test the "soundness" of the AAP. Finally the Inspector will produce a binding report which is programmed for March 2007 and the Council will then adopt the AAP.

Options

13. There are no specific options to put before Members at this stage.

Community Safety Implications

14. None

Environmental / Sustainability Implications

15. Key components of the AAP will consider matters such as landscape and biodiversity, land drainage and water conservation, energy efficiency and managing waste. The Sustainability Appraisal of the proposed changes to the AAP did not identify any significant issues.

Equal Opportunities Implications

16. None

Financial Implications

17. The additional round of public consultation occasioned by the September 2004 changes in the Regulations for plan-making has had to be funded from the unspent monies for the Public Examination into the 'soundness' of the plans which has now been postponed to the next financial year. Additional budgetary provision will have to be added to the monies which will be rolled over into 2006/07.

Legal Implications

18. None.

Risk Management Implications

19. The effect of any slippage to the timetable could be significant to meeting the Structure Plan development strategy for the Cambridge area.

Staffing Implications

20. Within existing resources.

Conclusions

21. The Pre-Submission Public Participation has resulted in a positive level of support for many of the policies contained in the draft AAP and many of the objections received were seeking refinement of policies rather than major changes to them.
22. A number of representations from GO-East questioned the need for and scope of policies in the AAP and sought a streamlining of the plan and increased emphasis on linkages with other plans and strategies and on implementation and monitoring. These have been addressed through proposed changes to the AAP. The Sustainability Appraisal of all proposed changes confirms that these do not have any material impacts on the sustainability credentials of the AAP.
23. The revised AAP as contained in Appendix B is considered to be a sound plan and ready for submission to the Secretary of State, subject to the further refinement proposed.

Recommendations

24. Members are invited to:

1. AGREE the responses to representations to the Pre-Submission draft Cambridge Southern Fringe Area Action Plan (AAP) as contained in Appendix A.
2. AGREE the responses to representations to the Draft Final Sustainability Report for the Cambridge Southern Fringe AAP as contained in Appendix A.
3. AGREE the proposed changes to the draft AAP as contained in Appendix A and incorporated into Appendix B and that it BE SUBMITTED to the Secretary of State in January 2006.
4. DELEGATE further minor editing changes to the DPDs to the Planning Portfolio Holder where they involve matters of policy and to the Development Services Director where they are technical matters.

Background Papers: the following background papers were used in the preparation of this report:

Pre-submission Cambridge Southern Fringe Area Action Plan, June 2005

Representations received in response to the above document.

Representations received in response to the Draft Final Sustainability Report for the Cambridge Southern Fringe AAP.

Special Council 25 November 2005

Draft Cambridge Southern Fringe Area Action Plan

Public Participation Report

Preface - The South Cambridgeshire LDF

1.13

Representations

Nature Representation Summary

Councils' Assessment

Change to Draft DPD

Preface - The South Cambridgeshire LDF

1.13

9851 - GO-East	Object	Paragraph 1.13 of the document includes a statement that the LDF must be in conformity with the Structure Plan. This is not the case. Local development documents no longer need to be in general conformity with the Structure Plan. However, the Structure Plan policies will still be a material consideration and will remain part of the development plan until superseded by the RSS (PPS12. para. 4.22). Paragraph 1.13 should be amended to reflect this fact.	The statutory requirement is for the South Cambs LDF to be in general conformity with RSS6 rather than the Structure Plan. Under the new plan making system it is the RSS and the district LDF that forms the development plan. In practise for South Cambs, the Structure Plan is still a key material consideration for plan making. The policies of the Structure Plan are saved under transitional arrangements and the plan is in general conformity with the current Regional Spatial Strategy in RSS6. Draft RSS14 broadly carries forward the approach of RSS6 and the Structure Plan as they apply to the Cambridge Sub Region. There is currently no evidence that the draft RSS14 is proposing divergent emerging policies on the development strategy for the sub region relative to those set out in the current RSS and the 2003 Structure Plan. It is therefore entirely appropriate and consistent for the LDF to meet the policy requirements of the Structure Plan, whilst being in general conformity with RSS6. This should be made clear in paragraph 1.13.	Delete the 3rd sentence in paragraph 1.13 and replace as follows: "...Whilst under the terms of the new plan making system the LDF must be in general conformity with RSS6, in the circumstances of the Cambridge area it is also appropriate and consistent for the LDF to meet the policy requirements of the Structure Plan, as there is currently no evidence that the draft RSS14 is proposing divergent emerging policies on the development strategy for the sub region relative to those set out in the current RSS and the 2003 Structure Plan.
----------------	--------	--	--	--

Chapter A INTRODUCTION

A.1

8453 - English Heritage	Object	The AAP should include proposals for the historic environment, as well as biodiversity and countryside.	The Area Action Plan relates to land solely within South Cambs District Council which does not contain an historic environment. There is no need to refer to this in this introduction	None
9620	Object	I feel that there needs to be more emphasis on joined-up thinking, particularly with Cambridge City Council in relation to the Southern Fringe developments.	The Area Action Plan does refer to working with Cambridge City Council to ensure a holistic approach. Partnership working is already taking place with Cambridge City Council in relation to all the Southern Fringe Developments. This partnership working has included preparing the Area Action Plan and Cambridge Local Plan proposals for the Cambridge Southern Fringe and has continued with the preparation of an Area Development Framework which will provide one of the links between the plans which allocate land and subsequent planning applications for development.	None
10064 - Bayer CropScience Ltd	Object	The three Action Area Plans are acceptable as far as they go. None, however, is strong on implementation and delivery. There should be clear implementation plans, including phasing, realistic timescales for housing provision and associated infrastructure. We would expect to see strengthened implementation sections in the deposit LDF.	This is one of the requirements of the new plan making system.	Add a new section to Chapter E Delivering The Cambridge Southern Fringe to show the proposed housing trajectory for Southern Fringe which will include annual house building targets and proposed milestones timing of service, facility and infrastructure provision.
10217 - Trumpington Meadows Land Company	Object	TMLC feel the level of detail incorporated in this document is over and above that required. The document is currently too prescriptive and is in danger of prohibiting the effective delivery of the southern fringe in the future. TMLC would welcome simplification of the document, allowing work together towards an effective scheme through the master planning process.	Given the objective secure a step change in the rate of development in the Cambridge Sub-Region by 2006, the AAP provides an appropriate level of detail for the early submission and timely approval of planning applications for development at Trumpington West.	None
10220 - Trumpington Meadows Land Company	Object	TMLC would welcome a comprehensive list of all strategies required both before outline planning application is submitted and those required to support through the decision making process.	A comprehensive list of assessment and strategies are detailed in section E2. Further refinement and addition of this list can be discussed at the pre application stage rather than through the LDF process.	None
<i>Ist Bullet</i>				
9858 - GO-East	Object	Also, the inset map boundaries for both parts of the AAP are not precisely drawn on the Proposals Map (PPS 12 para 2.23). The Proposals Map should be amended to clearly indicate the extent of the Southern Fringe AAP, with the inset map boundaries precisely drawn.	Noted.	Amend the Proposals Map to clearly indicate the extent of the Southern Fringe AAP, with the inset map boundaries precisely drawn

Representations **Nature** **Representation Summary** **Councils' Assessment** **Change to Draft DPD**

9857 - GO-East	Object	The accompanying draft Proposals Map includes one inset showing the extent of the development site at Trumpington West (Inset C), and a separate inset (Inset D) showing the extent of improved landscaping relating to development in Cambridge City. However, The main Proposals Map does not include a clear indication that an AAP covers these two separate insets.	The main proposal map does show clearly that other maps cover these areas.	None
A.5				
10149 - Trumpington Meadows Land Company	Object	Section A5 sets a requirement for the preparation of a masterplan for the whole new urban extension. TMLC seeks clarification of who is to prepare this and whether the Cambridge Southern Fringe Area Development Framework prepared by Cambridge City Council satisfies this requirement.	The Master Plan for the site will need to be prepared by the landowner/developer for agreement by the Local Planning Authority before any planning applications can be approved. The Citys' Area Framework does not satisfy this requirement.	None

Chapter B VISION AND DEVELOPMENT PRINCIPLES

CSF/1 The Vision for the Cambridge Southern Fringe

11377	Object	The impact of this development will be more people, more noise, more traffic and more rubbish. Also what about supplying water for the new people and risk from flooding after concreting over more land? Have the needs of current resident been considered?	The impacts listed will be mitigated as far as possible and additional benefits will be brought about by the developments. Water supply and surface water drainage will be considered in detail at the planning application stages.
10105 - Bayer CropScience Ltd	Object	There are potential delivery issues relating to the Cambridge Southern Fringe proposals based on Clay Farm and Showground sites, Glebe Farm and Monsanto. The Bayer CropScience Ltd site at Hauxton is, in comparison more straight forward being located solely within South Cambridgeshire District, is in single ownership, and would not be at risk from cross authority delays. Another issue is that a significant proportion of the land proposed for development in the Cambridge Southern Fringe proposal is greenfield where as the Bayer CropScience Ltd site is primarily a brownfield site. Any development at the Bayer CropScience Ltd site would be focussed on previously developed land in line with government guidance on the re-use of such land.	Partnership working between the authorities is taking place to ensure a smooth a process as possible. Like Bayer, the previous use of the Monsanto site has largely ceased. Unlike Bayer, the Monsanto site has relatively few substantial structures which will need to be removed before development can commence. The housing trajectory proposed to be included in the submission DPD also demonstrates that the site is capable of coming forward in the plan period. It is considered that the opportunities the development creates are sufficient to warrant the use of some green field land. The Bayer Crop Science site is proposed to be allocated for development in the Site Specific policies DPD.
9849 - GO-East	Object	The preferred options for the AAP do not clearly demonstrate how the AAP will relate to or has had regard to other plans and strategies, including both local authority plans and strategies and outside agencies (utility company programmes, County Council transport plans, local housing strategies etc.) that will influence the AAP's delivery. The submission AAP should include a commentary about how other plans and programmes have been considered and have been regarded in coming to decisions on the AAP.	Include new section in Core Strategy to follow paragraph 1.16 as follows: "RELATIONSHIP WITH OTHER PLANS AND STRATEGIES 1.16A The Council has consulted all key stakeholders at three stages in the preparation of the DPDs and it is for them to advise the Council how their own strategies affect the South Cambs LDF. Where such information has been received, this has been taken into account in preparing the DPDs. Where organisations did not advise the Council of their delivery plans, as the delivery vehicle for the Cambridge Sub Region, to draw together the delivery plans for all aspects of the major developments as part of the negotiations on the planning obligations agreements. A statement of this position will be included in the introduction.

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

8452 - English Heritage	Object	We are concerned that the plan does not provide adequate coverage of the historic environment, either at the site specific level, or in terms of the strategic context of Cambridge.	Section D8 provides adequate coverage of the historic environment which is adjacent to Trumpington West.	None
8450 - English Heritage	Object	This allocation is not identified in the Cambridgeshire Structure Plan. In the circumstances we would expect the Local Development Framework, and Action Area Plan, to set out the exceptional circumstances that justify its release from the Green Belt. We note that the Cambridge Green Belt Study 2002 is identified as informing these proposals, and we welcome this. The Action Area Plan proposals do not, however, reflect the main issues raised in that study relating to the character of Cambridge and important approaches.	The Trumpington West site is not specifically identified in the Structure Plan 2003, but provides an opportunity for further development unforeseen at the time of the Structure Plan preparation which will utilise a previously developed site in a very sustainable location which is consistent with the principles set out in PP'G3 "Housing". Development will also secure improvements to the appearance of the Green Belt and countryside access improvements along the River Cam corridor.	None
9743 - Haslingfield Parish Council	Support	The comprehensive draft plans have proposed a sensitive and innovative development of the former Monsanto site at Trumpington West, some of which falls within Haslingfield parish. The overall shape of the proposals is to be welcomed and subject to some other minor modifications should be taken forward.	Noted	None
10187 - Trumpington Meadows Land Company	Support	TMLC fully supports the Vision set out in Policy CSF/1 which recognizes the importance and the benefits of the proposed Southern Fringe development.	Noted	None
B.3				
9885 - Cambridge Preservation Society	Object	Page 13 - para B.3 / page 14, items d and g / and page 19 Concept Diagram / page 29 item h / page 31 item C3.4 / page 32 C3.11 and elsewhere in all the documentations sent. Delete: "Wandlebury"; please replace with: "Wandlebury Country Park".	Agreed.	Amend "Wandlebury" to "Wandlebury Country Park" throughout document.

CSF/2 Development and Countryside Improvement Principles

11078 - Environment Agency	Object	Strategic surface water drainage schemes will be required for the Southern Fringe and Trumpington West. This should be stipulated within the policy for a 'Strategic Masterplan', to inform developers at an early stage.	There is no need to go into such detail at this point in the document. The need for a clear drainage strategy is detailed in section D10 of the document. However this section does need to be strengthened to include a requirement for a detailed surface water drainage scheme for the Southern Fringe and Trumpington West.	None
----------------------------	--------	---	---	------

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

9900 - The Bell Educational Trust Ltd	Object	<p>We are objecting to the principle of Policy CSF/2. We consider a further layer of guidance to be unnecessary, and not relevant to the Bell School site as there are already a series of documents that cover the site, such as the reposit Cambridge Local Plan and the Area Development Framework.</p> <p>The visual impact of development of the Bell site has been carefully considered, the site provides a strong visual screen, respecting the setting of the Cambridge Southern Fringe. Any impact on the wider area is likely to be limited. The need for inclusion of the site within wider guidance and the delays that will result are considered inappropriate for the Bell site.</p> <p>Any reference to the Bell site should be deleted from the policy.</p> <p>Specific policies relating to energy use, noise, air quality and contaminated land are missing from this document, but are present in the Cambridge East AAP.</p> <p>This policy fails to address the historic environment although there are important issues relevant to the site:</p> <ul style="list-style-type: none"> - <input type="checkbox"/> the impact of development on approaches into Cambridge <p>Policy CSF/2 should include an additional category:</p> <ul style="list-style-type: none"> - 'in a manner which respects the historic character of Cambridge and integrates with its distinctive qualities'. <p>This policy fails to address the historic environment although there are important issues relevant to the site:</p> <ul style="list-style-type: none"> - the relationship of the site to the conservation area of Trumpington village, Anstey Hall and related landscape <p>Policy CSF/2 should include an additional category:</p> <ul style="list-style-type: none"> - 'with a layout, and form, that takes account of important views, including those of Trumpington Church, and does not adversely affect the character of Trumpington conservation area'. - The historic evolution of the landscape and the archaeological interest or potential <p>Policy CSF/2 should include an additional category:</p> <ul style="list-style-type: none"> - 'with a full analysis and understanding of the historic interest of the site, including assessment of archaeological interest, the historic evolution of the landscape and the sensitivity of the adjoining conservation area and listed buildings'. 	<p>The Bell site is not specifically covered in this document but is referred to in context. Policy CSF/2 does not refer to the Bell site. There are City documents that are applicable as the site is within the City boundary.</p>	None
11260 - Cambridgeshire County Council	Object	<p>This policy fails to address the historic environment although there are important issues relevant to the site:</p> <ul style="list-style-type: none"> - 'in a manner which respects the historic character of Cambridge and integrates with its distinctive qualities'. 	<p>Policies covering these topic areas in the Core Strategy of the LDF will apply in this case.</p>	None
8456 - English Heritage	Object	<p>This policy fails to address the historic environment although there are important issues relevant to the site:</p> <ul style="list-style-type: none"> - 'with a layout, and form, that takes account of important views, including those of Trumpington Church, and does not adversely affect the character of Trumpington conservation area'. 	<p>The role of the site as part of the gateway to Cambridge is addressed in policy CSF/1.</p>	None
8459 - English Heritage 8458 - English Heritage	Object	<p>This policy fails to address the historic environment although there are important issues relevant to the site:</p> <ul style="list-style-type: none"> - 'with a layout, and form, that takes account of important views, including those of Trumpington Church, and does not adversely affect the character of Trumpington conservation area'. - The historic evolution of the landscape and the archaeological interest or potential <p>Policy CSF/2 should include an additional category:</p> <ul style="list-style-type: none"> - 'with a full analysis and understanding of the historic interest of the site, including assessment of archaeological interest, the historic evolution of the landscape and the sensitivity of the adjoining conservation area and listed buildings'. 	<p>The Trumpington West site within South Cambridgeshire is some distance from the historic areas which are located to the north within Cambridge City boundary. There is no need to alter the policy although regard will need to be had of the potential for longer distance views of the church and hall.</p>	None

Representations

Nature Representation Summary

Councils' Assessment

Change to Draft DPD

10107 - Trumpington Meadows Land Company	Object	TMLC seeks clarity as to who will produce the strategic masterplan and strategic design guide for the whole of the Southern Fringe, and whether the Cambridge Southern Fringe Area Development Framework prepared by Cambridge City Council satisfies this requirement.	The Master Plan for the southern fringe will need to be prepared by the landowner/developers. The City's Area Framework does not satisfy this requirement.	None
10108 - Trumpington Meadows Land Company	Object	TMLC also seeks clarity as to which parts of the Southern Fringe items b - t refer.	Points b-t refer to the Southern Fringe as a whole see para 1.	
11477 - GO-East	Object	We welcome the fact that you have produced a monitoring strategy in respect of the LDF as a whole. We consider, however, that each DPD should include its own monitoring strategy as part of the overall implementation framework and that, accordingly, the submission DPDs will need to incorporate and develop the relevant parts of the current separate monitoring document.	Agreed. The submission AAP will include a Monitoring chapter which will draw indicators from the separate Monitoring Strategy and provide a framework to ensure that the implementation and delivery of Cambridge Southern Fringe is efficiently and effectively carried out.	Include new chapter in Part E: "E4 Monitoring Cambridge Southern Fringe" drawn from the separate Monitoring Strategy.
11269 - Cambridgeshire County Council	Support	Welcome CSF/2 and the intention to consider links to areas of Strategic Open Space.	Noted	None
11267 - Cambridgeshire County Council	Support	Welcome inclusion of climate change mitigation and adaptation in this policy - suggest wording change to "greenhouse gas emissions".	Noted, agree.	Revise criterion I of CSF/2 to read: "...built to be an exemplar of sustainable living with low carbon and greenhouse GAS emissions and be able to accommodate the impacts of climate change."
Policy Paragraph 1				
8155 - Cambridge City Council	Object	The City Council is preparing a Area Development Framework for the Southern Fringe. After this is adopted by the City Council it is expected that masterplans for individual sites within the Southern Fringe will come forward for approval prior to the granting of planning permission. Policy CSF2 is not consistent with this approach and it is therefore not reasonable to expect that the Trumpington West development be dependent upon the adoption of a masterplan for the whole Southern Fringe. Propose that point 1) of this policy is amended to be consistent with the City Council's approach.	The Area Development Framework does not fulfil the function of a strategic masterplan or design guide for the Southern Fringe as a whole.	None
C				
11268 - Cambridgeshire County Council	Object	Needs re-wording to make sense.	When read in conjunction with para 1 wording does make sense.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

9622	Object	I strongly support policy CSF/2, in particular the recognition that the surrounding villages of Great Shelford, Stapleford and Hauxton need to retain their physical separation from Cambridge. Should Little Shelford be included within this policy?	Little Shelford is already separated from the South of Addenbrookes by Great Shelford and it is considered that there is no need to include Little Shelford within this policy.	None
<i>d</i>	Support	Policy CSF/2 - d, g and t. Welcome references to linkages between green spaces and provision of a high quality network of footpaths, bridleways and cycleways.	Noted	None
<i>g</i>	Object	The National Trust is pleased to note that reference has been made to Wicken Fen as a Strategic Open Space but would like to see the Wimpole property, which is nearer to Trumpington West, included in the policy. Wimpole could usefully be linked via footway and cycleway to Coton Countryside Reserve.	Noted	Amend criterion g of CSF/2 to read: "These routes will provide for linkages to the wider Strategic Open Space network including Coton Countryside Reserve, Teversham Country Park, Milton Country Park, WIMPOLE HALL and Wicken Fen;"
11265 - Cambridgeshire County Council 10110 - Trumpington Meadows Land Company	Object	The AAP makes no provision for bridleways in the Concept Diagrams, also there are no existing bridleways on the ground for any new ones to link to.	Points b-t refer to the Southern Fringe as a whole see para 1. The development should not preclude the opportunity for provision of bridleways at a future date.	None
9170 - British Horse Society (Cambridgeshire)	Support	This policy recognises the need to cater for all users and to link sites to wider access.	Noted	None
9863 - Cambridgeshire Local Access Forum	Support	Policy CSF/2 - d, g and t. Welcome references to linkages between green spaces and provision of a high quality network of footpaths, bridleways and cycleways.	Noted	None
<i>k</i>	Support	The reference in Policy CSF/2 Objective K to a 'balanced, viable and socially inclusive community with a good mix of housing types, sizes and tenures' is welcomed.	Noted	None
10112 - Trumpington Meadows Land Company	Object	It is unclear whether point 'm' refers to Trumpington West or the Southern Fringe as a whole.	Refers to Trumpington West	None
<i>m</i>	Object	It is unclear whether point 'm' refers to Trumpington West or the Southern Fringe as a whole.	Refers to Trumpington West	None

Nature Representation Summary

Councils' Assessment

Change to Draft DPD

<i>n</i>	9744 - Haslingfield Parish Council	Object	The proposed development will include the first houses to be seen on the approach to the city and so should reflect the city with its academic and scientific achievements. There must be an uplifting approach not something currently experienced on some approach roads to the city!	Noted The AAP recognises the need to create a high quality built form on the edge and at the gateway to Cambridge.	None
<i>r</i>	10175 - Trumpington Meadows Land Company	Object	TMLC support the creation of green corridors at a strategic level, such as the River Cam, which connect the city with the countryside, as promoted by The Cambridge Vision. However, TMLC object to the reference to green fingers running locally through the development or urban areas as this contradicts with the objectives of creating a compact urban extension (CSF2/1/s) of urban character (CSF2/1/i) and achieving an overall high density of housing (CSF2/1/f).	A high density development can be successfully designed to incorporate green fingers. It is essential that these are included in the Trumpington West site given the location adjacent the River Cam. These green fingers will aid the connection of the development with the wider countryside.	None
<i>s</i>	9052 - Addenbrooke's Hospital	Object	Items S and T make no reference to the need for additional road capacity within the transport section of the Policy. Later in the document there is reference to the need for additional junction capacity onto Hauxton Road. The document should make clear the fact that if this junction is to be linked to the junction for the new Addenbrooke's Access road, that the priority for the use of this junction's capacity should be allocated to the Clay Farm /Addenbrooke's route. See also the Trust representation to CSF/10.	The point is a general development principle and does need to go into such detail.	none
<i>t</i>	10170 - Trumpington Meadows Land Company	Object	It should be noted that there are no bridleways for the site at Trumpington West to link into, provision on site would therefore not be appropriate. Footpaths and cycleway networks through the site will be provided to the site boundaries, linking to existing networks at the site boundaries.	The development should not preclude the opportunity for provision of bridleways at a future date	
	9886 - Cambridge Preservation Society	Object	Page 19 - Concept Diagram (Southern Fringe) and page 21 Concept Diagram (Trumpington West): we welcome the suggested improvements to these areas but would like to highlight the need to add to the foot/cycle links also routes for access by horse (linking with existing routes and development of circular routes in the overall urban fringe).	These can be addressed at the masterplanning stage and are not appropriate to be dealt with at the Area Action Plan stage.	None.

Change to Draft DPD**Councils' Assessment****Nature Representation Summary**

Representations	Nature	Representation Summary	Councils' Assessment	Change to Draft DPD
8156 - Cambridge City Council	Object	Support in principle however point (t) should emphasise the importance of linking to Trumpington High Street. Propose that the wording is amended to include connecting it to Trumpington High Street, the City.	Agree.	Amend wording of criterion t of CSF/2 to read: "...and an improved network connecting it to TRUMPINGTON HIGH STREET, the City, neighbouring villages, the open countryside and the wider network."
11266 - Cambridgeshire County Council	Support	Welcome inclusion of horse-riders, bridleways and wider links principles. However does not seem to be reflected in proposals in Addenbrookes and Trumpington Concept diagrams on pp19-20.	Noted	None
9864 - Cambridgeshire Local Access Forum	Support	Policy CSF/2 - d, g and t. Welcome references to linkages between green spaces and provision of a high quality network of footpaths, bridleways and cycleways.	Noted	None
9177 - British Horse Society (Cambridgeshire)	Support	Support: good to see the recognition of public rights of way as multi use paths, offering a 'best value' option.	Noted	None
10109 - Trumpington Meadows Land Company	Object	TMLC also seeks clarity as to which parts of the Southern Fringe items b - t refer. In particular point 'w' regarding employment appears unrelated to housing allocation at Trumpington West. It should be noted that there are no bridleways for the site at Trumpington West to link into, provision on site would therefore not be appropriate. Footpaths and cycleway networks through the site will be provided to the site boundaries, linking to existing networks at the site boundaries.	Points b-t refer to the Southern Fringe as a whole see para 1. Policy CSF/8 makes clear that Trumpington West will include provision for small scale employment. The development should not preclude the opportunity for provision of bridleways at a future date	
9057 - Addenbrooke's Hospital	Object	In the Supporting Services and Facilities section of this policy at Item X, a number of services and facilities are set out. These services do not include Community Services - including health facilities. Other similar sections in other S Cambs District Council AAPs make specific reference to the need for these services to be developed in new communities. In the interests of consistency Community services - including facilities for healthcare - should be added to the services described in item X.	Agree.	Amend wording in criterion x of CSF/2 to read: "An appropriate level of services and facilities including education, sport, recreation AND HEALTH FACILITIES."

Representations

Nature Representation Summary

Councils' Assessment

Change to Draft DPD

SOUTH OF ADDENBROOKE'S CONCEPT DIAGRAM

8166 - Cambridge City Council	Object	The concept diagrams are extremely useful in presenting the principal land uses, access and transport arrangements and landscape requirements. However, the notations outside South Cambridgeshire's area should be shown in a different notation to make it clear that they are indicative only and not under South Cambridgeshire's control.	The concept diagrams clearly define the two planning authorities areas of control and it is therefore considered that there is no need to amend the text.	None
8168 - Cambridge City Council	Object	Propose that 'New Foot/Cycle Links' should be shown as indicative despite being a concept diagram. Amend to add 'Indicative' before 'New Foot/Cycle Links'.	Concept by definition is notional or indicative therefore no need to amend diagram	None

TRUMPINGTON WEST CONCEPT DIAGRAM

8169 - Cambridge City Council	Object	Propose that 'New Foot/Cycle Links' should be shown as indicative despite being a concept diagram. Amend to add 'Indicative' before 'New Foot/Cycle Links'.	Concept by definition is notional or indicative therefore no need to amend diagram	None
8167 - Cambridge City Council	Object	The concept diagrams are extremely useful in presenting the principal land uses, access and transport arrangements and landscape requirements. However, the notations outside South Cambridgeshire's area should be shown in a different notation to make it clear that they are indicative only and not under South Cambridgeshire's control.	The concept diagrams clearly define the two planning authorities areas of control and it is therefore considered that there is no need to amend the text	None
8170 - Cambridge City Council	Object	The location of the Enhanced Trumpington Village Centre (ETVC) is slightly misleading. This could read as the creation of a new centre competing with the existing high street centre. Propose that the circle ETVC annotation should be stretched to include the existing local centre on the high street.	The supporting text clearly refers to an enhanced centre rather than a new centre. It is not considered appropriate to expand the notation on the diagram.	None
8171 - Cambridge City Council	Object	Propose that another indicative recreation link be shown along the route of the dismantled railway line ultimately linking Trumpington West to the bridleway network west of the M11. Amend diagram to add indicative bridleway heading west of site along the dismantled railway.	This can be addressed at the masterplanning stage and are not appropriate to be dealt with at the Area Action Plan stage.	None.
8173 - Cambridge City Council	Object	The Southern road access into Trumpington West should line up with the proposed Addenbrooke's Access Road junction on Hauxton Road.	As this a concept diagram the precise location of the access to Trumpington West does not have to be defined. The notation is considered to be adequate at this stage.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****Chapter C TRUMPINGTON WEST AND THE SOUTHERN SETTIN****C2/a**

8460 - English Heritage	Object	The southern setting of Cambridge should be fully discussed, including the reasons for release of green belt and departure from previous policy / the Green Belt study. These principles should be set out at the beginning of the Plan, preceding section B.	The reasons for releasing land in the Cambridge Southern Fringe from the Green Belt are set out in the Structure Plan 2003 which is referred to in the vision and development principles section.	None
CSF/3 The Site For Trumpington West				
10122 - Trumpington Meadows Land Company	Object	Reference to 'Improved landscaping', change text in key to 'Agricultural land with improved landscape structure'.	This would not change ultimate aim of landscaping remaining agricultural land. No need to change text.	None
10120 - Trumpington Meadows Land Company (CSF, TMLC proposed Monsanto Site)	Object	TMLC proposed Monsanto Site, CSF. The boundary between the country park and agricultural land should not follow the line of the existing track to the north of the M11. The boundary should be moved further to the west in accordance with Trumpington Meadows development plan.	The concrete track provides a good demarcation line to separate the country park and agricultural land and will ensure that the M11 does not dominate and detract from public enjoyment of that part of the proposed country park between Trumpington West and the motorway.	None
9854 - GO-East	Object	It will be important for the Council when it submits the AAP, to be able to demonstrate that there has been more detailed testing of the 'reasonable' alternatives for the site's development, including for example, the 'do nothing' option and even a 'revert to open land' option, if only to help judge the overall sustainability of the chosen option compared with other reasonable options.	Three alternative site options for Trumpington West, including one proposing very limited development, were tested through the initial sustainability appraisal, and published for public participation through the preferred options report.	None
10121 - Trumpington Meadows Land Company	Object	Boundary of Major Development Site should exclude park and ride.	Agreed. However, the development will have to have regard to its proximity to the Park & Ride facility and include mitigation measures to ameliorate any disturbance from the use of the Park & Ride site.	None.
8454 - English Heritage	Object	English Heritage is concerned regarding the extension of the site south of the Park and Ride. The existing green area south of the Park and Ride provides an important buffer between the built-up area and the M11. Erosion of this will lead to the impression, so often found around the country, of development pressing up to a bypass. The Green Belt is in place to protect the character of Cambridge and its landscape setting. These principles should not be set aside.	The proposed development at Trumpington West will enhance the appearance of the southern edge of the city by screening the park and ride and the adjoining warehouses and thus contribute to that part of the purpose of the Cambridge Green Belt which relates to the character and setting of the city. The development of this part of the site will help to secure unconstrained public access to the River Cam Corridor with the creation of a country park - a recreation use which is consistent with the PPG2 "Green Belts" objectives for the use of land within the green belt.	None
10144 - Trumpington Meadows Land Company	Support	TMLC supports the allocation in Policy CSF/3 of Trumpington West for development as part of an urban extension of Trumpington.	Noted	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

Representation	County	Support	Nature Representation Summary	Councils' Assessment	Change to Draft DPD
11270 - Cambridgeshire Council	Cambridgeshire	Support	The site boundaries of this part of the Southern Fringe is a footprint based upon the landscape analysis produced by Terence O'Rourke Associates for the developers.	Noted	None
CI.3					
8461 - English Heritage	English Heritage	Object	Regarding the need to enhance the southern approach into Cambridge. While there are some recent developments that do detract from the approach, notably the large white tin shed [currently to let], others such as the Park and Ride and John Lewis depository buildings have been designed to be as low key as possible. The landscaping around the Park and Ride will increasingly help to assimilate that development. The magistrates' court building is a temporary structure required while a new building in Cambridge is completed, and should not be regarded as a permanent scar. Most importantly, the defining view from the south to Trumpington church remains a key landmark, establishing a rural quality and sense of place to the urban edge. The argument that the Trumpington West development will enhance the existing character is not well founded.	Noted	Objection noted but disagree. The development of Trumpington West will provide an opportunity to enhance the existing character of the area by replacing a disparate collection of uses and buildings with a well planned development which is designed from the outset to enhance the character of this edge of Cambridge and its countryside setting.
CSF/4 The Revised Cambridge Green Belt					
10468 - The Bell Educational Trust Ltd	Cambridgeshire	Object	The reference to the Bell site and the Proposals Map is incorrect, the Green Belt within South Cambridgeshire is unaltered, therefore any reference is superfluous. Further the entire policy is a replication of CSF/2 and is therefore unnecessary duplication. Consistent with our objection to CSF/2 we consider the reference to the Bell site should be deleted from the policy (as a minimum).	Noted	Whilst the policy is broadly the same as CSF/2 the emphasis is focused on the Green Belt. This policy is needed to justify the revised Green Belt. Reference to the Bell School is for completeness when referring to the Southern Fringe.
9341 (Netherhall Farm)	Cambridgeshire	Object	Land at Netherhall Farm, Worts Causeway, should be removed from the Green Belt and considered to form part of a wider, more sustainable, southern urban extension of Cambridge. We object to the exclusion of that site from the overall approach.	Noted	This is a site which is outside of the boundary of South Cambridgeshire and therefore can not be considered within the Southern Fringe AAP.
9907 - The Bell Educational Trust Ltd	Cambridgeshire	Object	We agree in principle with the objectives of this policy however, it has already been proved that development of the Bell School site will not have a visual impact and thus will not detract from the setting of Cambridge.	Noted	Noted this may be correct but it is better to include this within the AAP.

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

9855 - GO-East	Object	It will be important for the Council when it submits the AAP, to be able to demonstrate that there has been more detailed testing of the 'reasonable' alternatives for the site's development, including for example, the 'do nothing' option and even a 'revert to open land' option, if only to help judge the overall sustainability of the chosen option compared with other reasonable options.	Three alternative site options for Trumpington West, including one proposing very limited development, were tested through the initial sustainability appraisal, and published for public participation through the preferred options report.	None
10194 - Trumpington Meadows Land Company	Support	TMLC supports the revised green belt boundaries allowing increased opportunities within the Southern Fringe for sustainable urban extensions whilst protecting and enhancing the quality and purpose of the remaining green belt land. TMLC support Policy CSF/4	Noted	None
11271 - Cambridgeshire County Council	Support	Support this policy in general because it is consistent with the Structure Plan. However Babraham Park & Ride site is enclosed within green belt, which means that it, will restrict/hinder any further expansion of the site if required. The County request that some flexibility of approach to the green belt around the Babraham Park & Ride Site be included in the AAP.	Support noted however paragraph 2.6 of PPG2 clearly state that "detailed Green Belt boundaries defined in adopted local plans should be altered only exceptionally." Paragraph 2.7 goes on to state that where existing local plans are being revised and updated, existing Green Belt should not be changed unless alterations to the structure plan have been approved". Structure Plan Policy P9/2b states that the Green Belt should be reviewed "to identify the boundaries of land to be released from the Green Belt to serve the long-term development needs of Cambridge, in locations indicated on the Key Diagram and set out in Policy P9/2c". These locations comprise the urban extensions to Cambridge. Paragraph 4.4 explains that the Green Belt boundaries have been reviewed in the 1980s and in Local Plan 2004. Therefore, in accordance with Structure Plan and PPG2, the only further review in the LDF is at the locations identified in Structure Plan Policy P9/2c and around the new town of Northstowe, as explained in paragraph 4.5.	None
9624	Support	I strongly support policy CSF/4, in particular the recognition that it is important to minimise any adverse impacts of development on the surrounding area including the setting and character of Great Shelford, Stapleford, Little Shelford and Hauxton.	Noted	None
8468 - English Heritage	Object	Point 1: add 'character or' before 'setting'.	Noted, agree.	Amend criterion 1 of CSF/4 to read: "Ensure that the development at Trumpington and Addenbrooke's Hospital / The Bell School does not detract from the CHARACTER AND setting of Cambridge."

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

4

9275 - Cambridgeshire Local Access Forum	Object	Welcome provision of opportunities for public access to open countryside but believe this should be more specific and state provision of footpaths and bridleways.	The provision of footpaths and bridleways is detailed in other sections of the AAP. It is considered that there is no need to be specific in policy CSF/4	None
9268 - Cambridgeshire Local Access Forum	Support	Welcome provision of opportunities for public access to open countryside.	Noted	None
C2.5				
10163 - Trumpington Meadows Land Company	Object	TMLC seeks the removal paragraph C2.5, to be replaced by the following text: 'The Green Belt boundary at Trumpington West abuts the western and southern built edge of the development. This development edge relates to the contours of the site, the enhanced River Cam corridor, the southern gateway to Cambridge and strategic views across the landscape towards Trumpington and Cambridge beyond. It provides a Green Belt boundary and community park that will protect and enhance the quality and purpose of the remaining green belt land.'	Agreed. The proposed description better describes the site although some reference is needed to existing site features associated with the present use of the land which have been influential in determining the extent of the proposed development.	Replace paragraph C2.5 with the following: "The Green Belt boundary at Trumpington West abuts the western and southern built edge of the development. This development edge relates to the contours of the site, existing features associated with the previous use of the site, the enhanced River Cam corridor, the southern gateway to Cambridge and strategic views across the landscape towards Trumpington and Cambridge beyond. It provides a Green Belt boundary and community park that will protect and enhance the quality and purpose of the remaining green belt land."

CSF/5 Landscape, Biodiversity, Recreation and Public Access

10143 - Trumpington Meadows Land Company	Object	TMLC seeks clarification regarding requirements set out in Policy CSF/5 for a contribution towards an integrated landscape, biodiversity, recreation and public access enhancement strategy to be included as a planning obligation contained within planning permission for development in the Southern Fringe. The developer has already commenced work on a comprehensive management plan for Trumpington West. The implementation and management of this has not yet been determined or agreed with the Local Planning Authorities and other interested parties. The policy is therefore too prescriptive at this early stage. If this obligation remains, the TMLC Trumpington West Community Park Management Plan should satisfy this policy requirement. TMLC therefore seek clarification within Policy CSF/5 and Policy CSF/23 that this could be an alternative approach.	The details of the planning obligations and mechanics of delivery have yet to be decided. The policy is not considered too prescriptive although it is likely that the proposed Country Park at Trumpington West will satisfy this requirement in full.	None
--	--------	---	---	------

Representations

Nature Representation Summary

Councils' Assessment

Change to Draft DPD

8584 - Countryside Properties (Special Projects) Ltd and Liberty Property Trust	Object	The text should make it clear that the tests set in Circular 1/97 will apply. Achieving some of the specified links includes land in the ownership of third parties, to achieve access to Wandlebury/the Magog Down, which are generally desirable in any event. Securing that comprehensive scheme of access is properly a matter for the authorities, with an appropriate level of contribution from some of the development sites in the Southern Fringe.	Noted there is no need to refer to the circular within the text of the AAP.	None
9901 - The Bell Educational Trust Ltd	Object	We are objecting to Policy CSF/5. We consider the planning obligation requirements to be very extensive. The Bell site is small in comparison to the Trumpington West site, thus we question the need for such planning obligation requirements. Furthermore, we believe that this additional layer of guidance will increase delays in the planning process. Any reference to the Bell site should be deleted from the policy.	Planning obligations will be sought which are reasonable and related to the development proposed. The obligations required for landscape enhancements will be divided between the various sites. The Bell School site is no exception. Through partnership working with the City Council the enhancements will be provided.	None
9060 - Addenbrooke's Hospital	Object	This policy calls for developments in the S Fringe to contribute to landscaping improvement and other enhancement strategies. In particular paragraph C3.5 states that 'Development at Addenbrooke's Hospital will be required to contribute'. This section of the document should make it clear that clinical development on the site will not be required to make these contributions.	Objection Noted but disagree. The visual impact of the Hospital development should be mitigated by enhanced landscaping measures to which the hospital should contribute as well as other landowners/developers in the Southern Fringe.	None
9180 - The Wildlife Trust for Bedfordshire, Cambridgeshire, Northamptonshire & Peterborough	Support	The Wildlife Trust supports this policy and its aim to enhance biodiversity and access to the countryside for new and existing residents.	Support Noted	None
9627	Support	I support CSF/5 though I would encourage dialogue with local parish councils and residents about the exact routes of any proposed new footpaths, cyclepaths and bridleways.	Support Noted	None
11272 - Cambridgeshire County Council	Support	Support.	Support Noted	None
Policy Paragraph 1				
10995 (Great Shelford, Large site at Mingle Lane and Hinton Way)	Object	Large site at Mingle Lane & Hinton Way, Great Shelford. An Additional Site Allocation For Development: Residential with associated open space and other facilities as required by the Local Planning Authority. Land to the east of Hinton Way, North of Mingle Lane and Gog Magog Way, Great Shelford/Stapleford. It is incumbent on every City to provide adequate open areas and public accessibility. The southern part of the policy area, adjacent to existing residential development should be allocated for a similar development which could also facilitate views and linkages with the surrounding area.	The site is designated as green belt because together with the villages of Gt Shelford and Stapleford it forms part of the wider countryside setting of Cambridge. It also provides an important part of the local countryside setting the two villages, affording attractive views towards the woods on Fox Hill. Development would also have an adverse effect on the rural character of the Conservation Area in Mingle Lane. Furthermore, additional housing allocations in the Rural Area are not required to meet the housing targets set out in the Structure Plan.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

1

10994	Object	A strong objection is raised to the proposed visual/ increased public access in the area extending from the City to Stapleford. No indication was given as to how the aims of the policy would be achieved on privately owned land, most of which is in agricultural use.	Noted The provision of enhancements to the landscape will be provided through legal agreements.	None
10996 (Stapleford, Land at Gog Magog Way) 10997 (Stapleford, Land at Gog Magog Way)	Object	The Southern part of the Landscaping Policy area should not be designated as such. It is considered that land to the east off Gog Magog Way, Stapleford should be excluded from the Cambridge Green Belt and allocated for residential development.	The site is designated as green belt as such its allocation for residential development would be inappropriate, the AAP seeks to deliver landscape improvements. Additional housing allocations in the Rural Area are not required to meet the housing targets set out in the Structure Plan.	None
10534 - The Wildlife Trust for Bedfordshire, Cambridgeshire, Northamptonshire & Peterborough (Beechwoods LNR)	Object	Beechwoods LNR. The Countryside Enhancement Area for the Cambridge Southern Fringe should be extended across the A1307 Babraham Road to link with Beechwoods LNR and across Missleton Hill to the 5 chalk grassland SSSIs / County Wildlife Sites at Cherry Hinton (Cherry Hinton Chalk Pits, Lime Kiln LNR and the connecting Road Verge Wildlife Sites). While much of this area is in the Cambridge City administrative area, the section to include Beechwoods and the adjacent fields is in South Cambs. This area provides a much better opportunity for the creation of chalk grassland than the area currently shown on the proposals map Inset D CSF/5(1).	Noted however it would not be considered reasonable or related to the development to include this land which lies outside the Area Action Plan for enhancement.	None
10516 (Great Shelford, Land behind 34-60 Hinton Way) 10978 (Great Shelford, Land East of Hinton Way) 10976 (Great Shelford, Land East of Hinton Way)	Object	The Southern part of the Landscaping Policy area should not be designated as such. It is considered that land to the east of Hinton Way, Great Shelford/Stapleford should be excluded from the Cambridge Green Belt and allocated for residential development.	The site is designated as green belt as such its allocation for residential development would be inappropriate, the AAP seeks to deliver landscape improvements. Additional housing allocations in the Rural Area are not required to meet the housing targets set out in the Structure Plan.	None
10515 - Mrs A J Johnson and Mr B Moore (Great Shelford, Large site at Mingle Lane and Hinton Way) B Moore (Great Shelford, Large site at Mingle Lane and Hinton Way) 10998 (Great Shelford, Large site at Mingle Lane and Hinton Way)	Object	The Southern part of the Landscaping Policy area should not be designated as such. It is considered that land to the east of Hinton Way, North of Mingle Lane and Gog Magog Way, Great Shelford/Stapleford should be excluded from the Cambridge Green Belt and allocated for residential development.	The site is designated as green belt as such its allocation for residential development would be inappropriate, the AAP seeks to deliver landscape improvements. Additional housing allocations in the Rural Area are not required to meet the housing targets set out in the Structure Plan.	None.

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

10879 (Great Shelford, Land at 12 Cabbage Moor)	Object	Land at 12 Cabbage Moor, Great Shelford. Very strong objection is raised to the exclusion of land extending from the Cambridge City boundary to Stapleford as an Area of Landscape Enhancement facilitated by Section 106 contributions from development within Cambridge. Strategic open areas should be provided within the development in Cambridge City. A similar mix of development and strategic green wedges should be facilitated within this policy area. The land is all highly sustainable and should be allocated for development. No indication is given as to how the enhancements will be facilitated on privately owned land.	Further consolidation of the ribbon of development between Cambridge and Gt Shelford would adversely affect the character and setting of Cambridge.	None
<i>h</i>				
9270 - Cambridgeshire Local Access Forum	Support	Policy CSF/5 - h and i. Welcome requirement for new footpaths, cyclepaths and bridleways creating links to Wandlebury, Magog Down, and Hauxton Mill to Grantchester Road.	Noted	None
9187 - British Horse Society (Cambridgeshire)	Support	Pleased to see the recognition of the need to cater for all users. High quality well maintained paths benefit all users.	Noted	None
7914 - Ramblers Association [Cambridge Group]	Support	We would be delighted to see improved access from the City out into the countryside: at present the walking route is somewhat fragmented, and only the adventurous will find their way. We recognise that cyclists and horseriders are also likely to be enthusiastic, but we hope our differing needs can be met sensitively.	Noted	None
<i>i</i>				
9745 - Haslingfield Parish Council	Object	Why not have a linear park on the W bank of the River Rhee / Cam to Haslingfield. The E bank upstream fro Hauxton Junction should be used as a local nature reserve (LNR); this area is currently devoid of public access. However, the latter has already been identified in the draft CCC Mineral and Waste Management document as an extract of sand and gravel.	Suggestion Noted but this would be beyond the remit of the Area Action Plan and needs to be considered under another mechanism.	None
7916 - Ramblers Association [Cambridge Group]	Object	We would support such development, but also hope that the more informal walking from Hauxton Mill through to Great Shelford might also be considered.	Noted but proposal is outside of Area Action Plan and will need to be considered under another mechanism.	None
<i>l</i>				
9865 - Cambridgeshire Local Access Forum	Support	Policy CSF/5 - h and i. Welcome requirement for new footpaths, cyclepaths and bridleways creating links to Wandlebury, Magog Down, and Hauxton Mill to Grantchester Road.	Support noted	none

Change to Draft DPD**Councils' Assessment****Nature Representation Summary****Representations**

Representation ID	Object	Nature Representation Summary	Councils' Assessment	Change to Draft DPD
C3.2 10113 - Trumpington Meadows Land Company	Object	Paragraph refers to the Historic Landscape Characteristics database which provides useful guidance on the suitability of landscape improvements. TMLC would like it to be noted within these paragraphs that this document is currently not available.	Noted but no need to include at this stage	None
C3.3 9755 - Haslingfield Parish Council	Object	C.3 is a particularly positive section. The large southern area for walking and cycling is well-thought out. The proposed network of paths should also be linked to villages in the Bourne Valley.	Noted but no need to alter text	None
C3.4 7917 - Ramblers Association [Cambridge Group]	Support	We are very concerned to improve the provision of RoW in this area, as the parish of Great Shelford is one of the least well provided for in the DC area, and hampers walking and riding, whether of horses or cycles. Current developments may improve things somewhat, but a comprehensive review of the area would be most welcome.	Support Noted	None
C3.5 9888 - Cambridge Preservation Society	Object	Page 31 - para C.3.5 - It is suggested that the balancing pond are not just "landscaped" but include public access and are seen as an asset or public park element which is centrally located within easy reach for all the site users (patients, staff / on site contractors and visitors).	Agreed. The main aim of the policy is to ensure public access to this area which can be incorporated into any landscaping scheme.	None
C3.8 8462 - English Heritage	Object	Regarding the need to enhance the southern approach into Cambridge. While there are some recent developments that do detract from the approach, notably the large white tin shed [currently to let], others such as the Park and Ride and John Lewis depository buildings have been designed to be as low key as possible. The landscaping around the Park and Ride will increasingly help to assimilate that development. The magistrates' court building is a temporary structure required while a new building in Cambridge is completed, and should not be regarded as a permanent scar. Most importantly, the defining view from the south to Trumpington church remains a key landmark, establishing a rural quality and sense of place to the urban edge. The argument that the Trumpington West development will enhance the existing character is not well founded.	Objection noted but disagree. The development of Trumpington West will provide an opportunity to enhance the existing character of the area.	

Representations **Nature** **Representation Summary** **Councils' Assessment** **Change to Draft DPD**

C3.13

9757 - Haslingfield Parish Council Object We support the Green Corridor along the riverside for walkers and cyclists. We are particularly keen to encourage extension of such a corridor from the Southern Fringe Area (SFA) along the riverbank to Haslingfield. Noted but this is outside of the Area Action Plan and would need to be progressed under another mechanism. None

C3.14

7918 - Ramblers Association
[Cambridge Group] Object Whilst supporting the suggestions here, we would ask for consideration to be given for the links through to Great Shelford along the River Cam. Noted however the proposed links are outside of the Area Action Plan and need to be considered under another mechanism. None

Representations **Nature Representation Summary** **Councils' Assessment** **Change to Draft DPD**

Chapter D TRUMPINGTON WEST

CSF/6 The Structure of Trumpington West

11273 - Cambridgeshire Council	County Council	Support	Support.	Support Noted	None
1					
9761 - Haslingfield Parish Council	Parish Council	Object	If high quality design of residential properties is required, the nearby commercial units must also be tasteful i.e. no sheds.	Noted but the Area Action Plan cannot require alterations to existing development.	none
2					
9070 - Addenbrooke's Hospital	Hospital	Object	The Trust objects to the fact this section does not make specific reference to the needs of healthcare facilities in this section. The word 'including healthcare facilities' should be inserted after 'Community services'.	Whilst a change is proposed to policy CSF/9, it is not considered necessary to add healthcare facilities specifically in this policy.	None
4					
10119 - Trumpington Meadows Land Company	Parish Council	Object	TMLC would welcome the addition of 'potential for' to be added before small scale B1 employment development allowing point four of the policy to read as follows: 'Potential for small scale B1 employment development'	Noted but no need to include these additional words.	None
6					
9763 - Haslingfield Parish Council	Parish Council	Object	The Park & Ride site should also be used as the terminus / pick-up point for long-distance coaches. Passengers for the city could complete their journey on the P&R or the guided bus.	Noted but not within remit of AAP	None
9765 - Haslingfield Parish Council	Parish Council	Object	Encourage city centre retailers to have pick-up points for large purchases as is already operated by John Lewis Partnership.	Noted but this is not within the scope of the AAP.	None
9					
10137 - Trumpington Meadows Land Company	Parish Council	Object	TMLC support the importance attached to the development edge fronting the River Cam however feel that point 9 is too prescriptive at this stage prior to the completion of a landscape analysis. The responsibility should be put onto the developer to propose an appropriate scheme, this should be reflected in the wording of the policy. This objection also relates to paragraph D1.4	Point 9 is not too prescriptive as it is regarded as a key development principle which should be retained. It is essential that the western edge is two storey only so that there is a informal edge to the River Cam.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

10

10138 - Trumpington Meadows Land Company	Object	TMLC would welcome the rewording of point ten to read as follows: 'Development facing the M11 will be no higher than four storeys and will be made up of high quality residential buildings with the potential for a landmark building at the gateway to the City.'	Wording noted but disagree as it would dilute emphasis of policy.	None
8455 - English Heritage	Object	We recommend that the area of development, and the number of dwellings, should be reconsidered. The proposed four storey height on the southern edge is not characteristic of locations like this and would be unlike any other development in the environs. While it might be possible to successfully accommodate the height in a number of well spaced individual buildings as a campus style layout, dispersed within the landscape, the proposed high density development is considered inappropriate in this location.	Objection noted but disagree. The use of four storey on the southern edge will result in a landmark edge to the city which will define this entrance to the city and conceal the park & ride site from view.	None

D1.2

8463 - English Heritage	Object	Regarding the need to enhance the southern approach into Cambridge. While there are some recent developments that do detract from the approach, notably the large white tin shed [currently to let], others such as the Park and Ride and John Lewis depository buildings have been designed to be as low key as possible. The landscaping around the Park and Ride will increasingly help to assimilate that development. The magistrates' court building is a temporary structure required while a new building in Cambridge is completed, and should not be regarded as a permanent scar. Most importantly, the defining view from the south to Trumpington church remains a key landmark, establishing a rural quality and sense of place to the urban edge. The argument that the Trumpington West development will enhance the existing character is not well founded.	The proposed development at Trumpington West will enhance the appearance of the southern edge of the city by screening the park and ride and the adjoining warehouses and thus contribute to that part of the purpose of the Cambridge Green Belt which relates to the character and setting of the city. The development of this part of the site will help to secure unconstrained public access to the River Cam Corridor with the creation of a country park - a recreation use which is consistent with the PPG2 "Green Belts" objectives for the use of land within the green belt.	None
-------------------------	--------	--	---	------

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****D1.4**

8464 - English Heritage	Object	<p>Regarding the need to enhance the southern approach into Cambridge. While there are some recent developments that do detract from the approach, notably the large white tin shed [currently to let], others such as the Park and Ride and John Lewis depository buildings have been designed to be as low key as possible. The landscaping around the Park and Ride will increasingly help to assimilate that development. The magistrates' court building is a temporary structure required while a new building in Cambridge is completed, and should not be regarded as a permanent scar. Most importantly, the defining view from the south to Trumpington church remains a key landmark, establishing a rural quality and sense of place to the urban edge. The argument that the Trumpington West development will enhance the existing character is not well founded.</p>	<p>The proposed development at Trumpington West will enhance the appearance of the southern edge of the city by screening the park and ride and the adjoining warehouses and thus contribute to that part of the purpose of the Cambridge Green Belt which relates to the character and setting of the city. The development of this part of the site will help to secure unconstrained public access to the River Cam Corridor with the creation of a country park - a recreation use which is consistent with the PPG2 "Green Belts" objectives for the use of land within the green belt.</p>	None
D4/a	Object	<p>The text refers to the release of a continuous supply of land to help meet the Cambridgeshire Structure Plan requirement. It would seem more appropriate to now instead refer to the dwelling requirement between 2001-2021 in the East of England Plan, which may be adopted by the time this Development Plan Inquiry ends. Furthermore, the Government's proposed changes to PPG3 (July 2005) now advocate provision for 15 years housing land supply in Development Plans.</p>	<p>(a) The Government is still considering the proposed changes to PPG3 "Housing" extending plan horizons from 10 years to 15 years with a proposed requirement that the first 5 years is allocated and developable. However, at the present time the requirement in PPG3 "Housing" is for a plan horizon of 10 years. (b) RSS14 is still in the course of preparation and is not forecast to be adopted until some considerable time after the submission of the LDF to the Secretary of State. (c) The Core Strategy and Area Action Plans, together with a continuation of historic windfall rates of development are sufficient to meet the housing requirements of Draft RSS 14 up to 2021. (d) Given that RSS14 could still be changed, easing the LDF on the Draft could result in delaying adoption of the LDF. (e) Any changes to the strategy that are required once RSS14 has been finalised and adopted can best be accommodated by a review of the Core Strategy once it has been adopted.</p>	No change
10126 - Trumpington Meadows Land Company	Support	Objective D4/a is welcomed.	Support Noted	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****D4/c**

10124 - Trumpington Meadows Land Company	Object	Objective D4/c is welcomed but we consider that the wording of Objective D4/c should be amended so as to read 'to ensure the provision of a 'well integrated mix' of housing types, tenures and sizes'.	Noted and agree.	Amend D4/c to read: "To ensure the provision of a WELL INTEGRATED MIX of housing types, TENURES and sizes, including affordable housing, to meet the identified needs of all sectors of the community, including key workers."
CSF/7 Trumpington West Housing				
10128 - Trumpington Meadows Land Company	Object	The Council's intention to provide Trumpington West with a variety of housing types to offer choice I acknowledged. However, it is submitted that to specify a mix is too prescriptive given the lack of a sound evidence base. It also runs contrary to the Government's growing emphasis on creating a planning system that works with the market rather than replacing it (Planning for Housing Provision, July 2005, ODPM). Such a policy could hinder the deliver of dwellings contrary to the Government's objectives.	A mix is specified in order to redress the balance of housing types that should be provided. It is not too prescriptive and is based on the 2002 housing needs survey.	None
11358 - House Builders Federation	Object	The 2002 Housing Needs Survey is not capable of determining the precise bedroom composition of market sector housing. That is neither its role nor its purpose. A Local housing Market Assessment will be the more appropriate vehicle for doing this. The policy and its reasoned justification are considered in parts to be at important variance from: Circular 6/98; PPG3 Housing - Influencing the Size, Type and Affordability of Housing (July 2003); and ODPM Consultation Paper 'Planning for Mixed Communities' (January 2005). The suggested threshold of approximately 50% affordable housing provision is considered to be neither realistic nor achievable.	Objection noted but disagree. The Housing Needs Survey, prepared in accordance with Government guidance, has identified a need equating to a target of 80.1%. However, in taking into account custom and practice, a target of 50% is considered justifiable to meet the need. Paragraph 14 of PPG3 states "where there is a demonstrable lack of affordable housing to meet local needs - as assessed by up-to-date surveys and other information - local plans should include a policy for seeking affordable housing in suitable housing developments." Paragraph 15 goes on to state "local plan policies for affordable housing should indicate how many affordable homes need to be provided throughout the plan area." The approach in HG/3 of the Development Control Policies DPD is therefore consistent with the adopted Structure Plan, draft RSS14 and PPG3. Policy HG/3 allows flexibility according to local circumstances, including development costs.	None
11274 - Cambridgeshire County Council	Support	Consistent with Structure Plan Policy on density.	Support Noted	None
11275 - Cambridgeshire County Council	Support	This was not previously addressed in the Preferred Options Report.	Support Noted	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

1	8159 - Cambridge City Council	Object	The 600 dwellings (min) relates only to land within South Cambridgeshire. Propose to amend inline with paragraph D2.1 and add 'within South Cambridgeshire' at the end of the sentence.	Agree as clarifies location of the dwellings.	Amend criterion 1 of CSF/7 to read: "Trumpington West will provide an adequate and continuous supply of land for housing for at least 600 dwellings WITHIN SOUTH CAMBRIDGESHIRE.
D2.6	9073 - Addenbrooke's Hospital	Support	The Trust supports the principle of providing an increased supply of smaller units; this will help meet the needs of health workers and other similar staff.	Support Noted	None
D2.8	9077 - Addenbrooke's Hospital	Object	The Trust notes the documents proposals for the number of intermediate and key worker housing units. However in this location close to a major employer of key workers (Addenbrooke's Hospital) an increased number of units should be made available for key workers. This would improve the sustainability of both the S Fringe housing provision and also the existing Addenbrooke's and proposed Addenbrooke's developments as the hospital campus is within walking and cycling distance of the new housing developments.	Noted however the policy text does allow for local circumstances and should this be the case a different mix could be applied with more key worker housing. No need to change text at this stage.	None
10133 - Trumpington Meadows Land Company	Trumpington Meadows Land Company	Object	It is not accepted that the District wide affordable housing policy should automatically apply to Trumpington West as proposed in D2.8.	The AAP includes a target of approximately 50% affordable housing which will be sought through any planning permission. It is not a fixed requirement. The objective is to secure maximum affordable housing provision that is consistent with securing a balanced and sustainable community. This includes a development that can be efficiently and effectively delivered.	None
D2.9	10116 - Trumpington Meadows Land Company	Object	TMLC recognizes the importance of planning for potential Travellers sites. However, given the location of the Trumpington West site at the southern gateway to the city it is inappropriate for the site to accommodate a potential Travellers site. The sensitivity of the River Cam corridor and conservation area to the north further supports the removal of reference to Trumpington West from this paragraph.	Noted but there is a need to refer to this issue within the AAP. It does not require that such a site is provided for at this stage within Trumpington West but only may be provided subject to the sub regional travellers needs survey.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****CSF/8 Employment**

10207 - Trumpington Meadows Land Company	Object	TMLC would welcome the deletion of 'will' and replacement with 'may' before 'include provision for' in Policy CSF/8. The Opening sentence would therefore read as follows: 'Development at Trumpington West may include provision for small-scale B1 employment development.'	Objection noted but this would dilute policy and would not help to create a mix of uses.	None
CSF/9 Community Services, Facilities, Leisure, Arts and Culture				
10181 - Trumpington Meadows Land Company	Object	TMLC supports the principles set out within Policy CSF/9.	Noted	None
11276 - Cambridgeshire County Council	Object	Support subject to the request for a policy for planning obligations (Para E2.5).	A policy in the Area Action Plan is not required, as policy DP/4 of the Development Control Policies DPD applies.	None
1				
10182 - Trumpington Meadows Land Company	Object	Here the policy states that a detailed assessment of the need for community services, facilities, leisure, arts and culture at Trumpington West and through Trumpington, to aid in developing a strategy for delivery. TMLC wishes to seek clarification if this will be satisfied by the Area Development Framework currently being prepared by Cambridge City Council, whether it falls within the remit of Cambridgeshire Horizons, and if not who will be responsible for the preparation of such an assessment.	The ADF does go some way to formulating an assessment of need for community facilities. However there is still a requirement for the developers to prepare an assessment and delivery strategy as this has land use implications.	None
2				
9081 - Addenbrooke's Hospital	Object	The Trust supports the overall thrust of the development proposals but objects to the omission of reference of the need for healthcare facilities at item 2 of CS/9. The AAP document at section C1.4 describes the Structure Plan's requirement for Northstowe (page 20-21). This includes specific reference to 'Health facilities, community and social infrastructure'. In the interests of consistency - including healthcare facilities - should be added after 'Community services' in item 2 of policy CSF/9. This would make this section consistent with the Planning Obligations policy set out in Paragraph E2.1	Note and agree.	Amend CSF/9 (2): 'The development at Trumpington West will make a proportional contribution to the provision of the full range of community services and facilities, HEALTH AND SOCIAL CARE FACILITIES, leisure, art and culture identified in the strategy.'
5				
8588 - Countryside Properties (Special Projects) Ltd and Liberty Property Trust	Support	Support is given to the point that Trumpington West may be required to contribute to facilities provided elsewhere in the Southern Fringe but within Cambridge City, such contribution to be within the guidance given in Circular 1/97.	Support Noted	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****Objectives**

11294 - Cambridgeshire County Council	Object	CSF/11 (4) mentions travel plans but this is not expanded on anyway else in the section. Suggest that standards set in Cambridge East and Northstowe for the need for workplace and school travel plan as an integral part of the development are applied to Cambridge Southern Fringe.	Noted, travel plans will be required where appropriate.	Add new heading and paragraph after paragraph D5.13: Travel Plans: Employers in Trumpington West will be required to prepare travel plans to show how they intend to ensure that travel to work by car by their employees is not encouraged, and travel by other modes is positively promoted.'
D5/a				
11277 - Cambridgeshire County Council	Support	Welcome policy relating to Structure Plan policy 8/9 provision of rights of way.	Support Noted	None
CSF/10 Road Infrastructure				
8467 - English Heritage	Object	There is some uncertainty in the Plan about the likely levels of additional congestion on the Hauxton Road (para C1.5). The rush hour tailbacks to the M11 already present some difficulties. It is important that the access to the site is viable, since we consider that access from the north through Trumpington village is inappropriate. It should be clearly stated that any access from the north will not be acceptable.	Planning permission will be granted subject to it being demonstrated that there will be sufficient highway capacity on Hauxton Road. The location of the northern access will be determined at the planning application stage.	None
10384 - Great Shelford Parish Council	Object	In the preferred options report it was suggested that impact of street lighting on the new road should be considered. Could this be added.	Lighting is referred to in point 3 of policy CSF/11 and therefore there is no need to add to policy CSF/10.	None
10380 - Great Shelford Parish Council	Object	We have considerable concerns about the traffic implications of the accesses onto Shelford Rd which although lying out side S Cambs area will lead to congestion. We hope that great thought will be given to a traffic management system including monitoring and synchronising traffic lights so that disruption to the ever increasing amounts of traffic are kept to a minimum.	Cambridgeshire County Council will be submitting a planning application for the Addenbrookes Access Road. Traffic management arrangements including traffic lights will be determined as part of the determination by the County Council of that application.	None
10337 - Highways Agency	Object	Cambridge Southern Fringe Area Action Plan. The impact of approximately 600 dwellings at 'Trumpington West' within South Cambs District is not of itself significant. However, the imminent provision of the Addenbrooke's Access Road (AAR), and the subsequent associated employment, residential and mixed-use development that will use the AAR will have a major impact on the A1309 Hauxton Road and junction 10 of the M11. The Agency would wish to see evidence that the increased use of junction 10 will not have a detrimental impact on the operation of the M11 motorway.	Developers will have to demonstrate that there is sufficient capacity in the surrounding highways and M11 as a result of the various developments.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

8350	Object	There is, and there is no proposal for, a high quality transport route along Hauxton Road.	The development will be served by the guided bus route into the City, as well as the Park and Ride Service and all other buses that run along this route.	None
11288 - Cambridgeshire Council	Object	Object to policy, as statement regarding traffic queuing during school holidays is inappropriate as it implies that traffic queuing is acceptable at other times. Delete "such...holidays".	Noted and agree.	Replace CSF10 (1) with: Planning permission for development at Trumpington West will not be granted until it has been demonstrated by the applicants that there will be sufficient highway capacity on Hauxton Road to serve all stages of the development such that morning peak traffic queuing between Shelford Road and the M11 would not be materially worse than conditions prevailing at the time of submission of the first planning application;
9633	Support	This, as far as residents south of the Southern Fringe are concerned, is an extremely important policy. It is extremely important that traffic conditions into Cambridge do not deteriorate (and cause more pollution). Traffic impacts on nearby communities such as Great Shelford, Harston, Hauxton, Little Shelford and Stapleford need to be carefully assessed and minimised.	Support Noted	None
2	Object	The Trust is concerned that there may be limited capacity at the Hauxton Road /Addenbrooke's link road junction. If there is limited capacity the first priority for the allocation of this capacity should be reserved for the Clay Farm /2020 Vision development. If there is capacity available after this priority allocation has been made, then this capacity could be made available for Trumpington West. The priority of allocating this capacity should be made clear in this policy, and also in paragraph D5.1. - D5.2	Policy CSF/10 seeks to ensure that there is sufficient capacity on Hauxton Road to serve all stages of the development. This must be demonstrated by the applicants before planning permission is granted. There is no need to specify capacity allocations.	None
4	Object	Support policy but propose subheading before point 4) is deleted because this point does not only refer to the Addenbrooke's access road. Also it is not appropriate to link this specifically to the Addenbrooke's access road because this is to be located within the Cambridge City.	Noted and agreed.	Delete sub heading 'Addenbrooke's Access Road' above CSF/10 (4).

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

D5.1					
9087 - Addenbrooke's Hospital	Object	This paragraph refers to the 'Medical Research Park at Addenbrooke's'. In this context the reference should be to the '2020 Vision' development or to the 'Cambridge Bio-medical Campus'.	Noted and agree	Amend reference in paragraph D5.1 from 'Medical Research Park' to 'Cambridge Bio-Medical Campus'	
CSF/11 Alternative Modes					
9621	Object	I personally feel that one of the most beneficial travel actions would be to build a rail station to service Addenbrooke's and the general Long Road area of Cambridge. I realise that (a) this is not supported by the Strategic Rail Authority and (b) would lie just outside South Cambridgeshire, nonetheless I feel that this consultation cannot be let go by without comment.	Noted	None	
1					
8352	Object	The development should be conditional on the guided bus and occupation of the units not allowed until the guided bus is operational.	The development at Trumpington West is not dependant on the provision of the guided bus as the area is already well served by public transport including the Trumpington Park & Ride site. It would be unreasonable to restrict development in this way.	None	
2					
10145 - Trumpington Meadows Land Company	Object	TMLC would welcome the addition of 'The majority of to point two of Policy CSF/11 and the removal of 'All' allowing the policy to be consistent with paragraph D5.4 and D5.5. Point two of policy CSF/11 would therefore read: 'The majority of the development will be within 400m easy walking distance of a High Quality Public Transport bus stop.'	Disagree as all new development should be developed sustainably and this in part means provision of high quality public transport close too the developments	None	
3					
11291 - Cambridgeshire County Council	Support	Support.	Support noted	none	
D5.5					
10383 - Great Shelford Parish Council	Object	No mention is made of the guided bus the route it will take and how this will impact on the landscape and traffic. We have concerns about a second bridge And would suggest that the old railway route is followed to Long Rd and then into the Addenbrookes site.	Reference is made within the text to the guided bus. The route of the guided bus is not within the remit of this document.	None	
11290 - Cambridgeshire County Council	Object	Suggest inclusion of good pedestrian and cycle links to Trumpington Park and Ride site.	This is referred to in the wider rights of way network and there is no need to specifically mention this site.	None	

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****D5.7**

10115 - Trumpington Meadows Land Company Object TMLC would welcome the addition of 'where possible' at the end of the opening line of Paragraph D5.7. TMLC considers this line should read as follows: 'Rights if way routes will be provided, where possible, to' TMLC would welcome a reduction in the 5km radius specified for these rights of way routes. This is an unreasonable distance due to difficulties regarding land ownership.

This would weaken the aim of the policy and is not agreed. Improvements to the Rights of Way network can be secured by the County Council's rights of way officers using contributions from each of the development areas.

None

D5.8

11295 - Cambridgeshire County Council Object Welcome commitment to segregation of routes to reflect differing user needs.

Noted

None

10159 - Trumpington Meadows Land Company Object TMLC would welcome the addition of 'as appropriate' to the beginning of paragraph D5.8. TMLC therefore consider this sentence should read as follows: 'As appropriate routes will be segregated, high quality, safe direct, connected and convenient for all users, including the less able, such as the partially sighted, hearing impaired, and wheelchair users'

Disagree, it is important all routes meet these requirements.

None

3

9889 - Cambridge Preservation Society Object Page 64 item 3 - Sheffield Stand - needs proper detailing.

Noted, exact specifications will be agreed at a later stage in the planning process.

None

Objectives

8469 - English Heritage Object The objectives should include reference to historic landscape character and archaeology. We welcome the reference in D6.3 to the HLC database, but the historic evolution of the landscape should inform the new landscaping, and this should be evident. The location of archaeological remains must also be taken into account in determining appropriate areas for tree planting, and any drainage proposals.

Reference is made in section D8 there is no need to refer to this at this stage.

None

CSF/12 Landscape Principles

10379 - Great Shelford Parish Council Object We would like Nine Wells to be extended in line with policy NE/4. If extended to the East this would create a wildlife corridor and a screen to the development to the North.

Landscape enhancements will be required and this will be looked at in any landscape strategy

None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

8470 - English Heritage	Object	The landscape principles should include reference to historic landscape character and archaeology. We welcome the reference in D6.3 to the HLC database, but the historic evolution of the landscape should inform the new landscaping, and this should be evident. The location of archaeological remains must also be taken into account in determining appropriate areas for tree planting, and any drainage proposals.	Reference is made in section D8, but it is agreed it could be established as a requirement in the policy.	Add new point after CSF/12 (b): 'Take account of the historic character of the landscape'
10377 - Great Shefford Parish Council	Support	We are on the whole happy with the landscaping provisions and that they will be implemented prior to major construction and that the separateness of Shefford will be retained.	Noted Support	None
11296 - Cambridgeshire County Council	Support	Support.	Support Noted	None
D6.3				
10114 - Trumpington Meadows Land Company	Object	Paragraph refers to the Historic Landscape Characteristics database which provides useful guidance on the suitability of landscape improvements. TMLC would like it to be noted within these paragraphs that this document is currently not available.	Noted, but this paragraph highlights the database as a source of further information to establish the characteristics of the area. It is hoped that it will be available soon.	None
CSF/13 Landscaping within Trumpington West				
10118 - Trumpington Meadows Land Company	Object	TMLC places great importance on the landscaping of the developed area at Trumpington West, and it will be an integrated aspect of the masterplan. However, a strategy of creating a hierarchy of public open spaces throughout the development is considered more appropriate than green fingers. All subsequent references through the document to green fingers running through the development or urban area should be replaced with this.	Disagree, the use of green fingers is important in helping to integrate the development with the wider countryside as well as acting as wildlife corridors.	None
11297 - Cambridgeshire County Council	Support	Support.	Support Noted	None
CSF/14 Linking Trumpington West To Its Surroundings				
11298 - Cambridgeshire County Council	Support	Support.	Support Noted	None
CSF/15 Enhancing Biodiversity				
8471 - English Heritage	Object	Given the sensitivity of the site, any planning application should be detailed, not outline.	Noted but level of detail required by outline application should take into account sensitivity of sites.	None

Change to Draft DPD

Councils' Assessment

Nature Representation Summary

Representations

Representation	Object	Nature Representation Summary	Councils' Assessment	Change to Draft DPD
9902 - The Bell Educational Trust Ltd	Object	The area outlined in this Policy extends beyond the Bell site within a different administrative area. Any impact from the development of the site will be negligible on the surrounding area. Providing a comprehensive ecological survey of flora and fauna on this area will prove expensive and impractical, particularly as our client has no control over the surrounding land, this is another unnecessary restriction, implementation of which will result in further delays in the planning process. Any reference to the Bell site should be deleted from the policy.	It is considered essential to obtain this information in order to assess existing biodiversity and recommend enhancements.	None
11299 - Cambridgeshire County Council	Support	Support.	Support Noted	None
11300 - Cambridgeshire County Council	Support	Support.	Support Noted	None
11079 - Environment Agency	Support	The policy to enhance biodiversity in the area is supported.	Support Noted	None
<i>a</i>				
8594 - Countryside Properties (Special Projects) Ltd and Liberty Property Trust	Object	Given that the intention is that the bulk of the land will be farmed for many years to come, the need for such an extensive survey is very questionable.	It is essential to establish an understanding of the current biodiversity of these sites and adjacent areas so that resulting strategies are relevant and of value.	None
<i>2</i>				
9768 - Haslingfield Parish Council	Object	Preservation of the interesting ecosystems in the Southern Fringe area (SFA) should be a top priority. Such proposed good practice should be shared with owners of land which is adjacent to the SFA.	Noted	None
<i>3</i>				
10142 - Trumpington Meadows Land Company	Object	TMLC seeks clarification as to the need for a project officer set out in point 3 of Policy CSF/15 and their specific role. TMLC feels it would be more appropriate if the policy stated that a project officer 'may be required', making this Policy consistent with Policy DP/4.11 within the Draft Core Strategy, Development Control Policies, Site Specific Policies DPD.	It was considered that a project officer is the best way to deliver and manage the biodiversity strategy in this location.	None
<i>4</i>				
8598 - Countryside Properties (Special Projects) Ltd and Liberty Property Trust	Object	The developments can contribute appropriately to help the authorities create the wider network of access to the surrounding countryside, including more distant locations at Coton and Wicken. The establishment of such a network is properly a matter for the authorities, with an appropriate level of contribution (if any) to be decided in relation to each development proposal.	Noted, the policy framework established through the Local Development Framework seeks to integrate developments with the countryside, and link to the wider network of access.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

8064 - The National Trust
 Object The National Trust is pleased to note that reference has been made to Wicken Fen as a large scale wildlife habitat. The Trust, however, would like Wimpole added to the policy wording as parts of the estate are designated as a SSSI and Special Area of Conservation.

Noted

Add to Policy CSF/15 (4):

'Connections will be provided for Green Fingers within the urban extensions to the surrounding countryside by enhanced landscaping, planting and the creation of wildlife habitats to provide links to larger scale wildlife habitats further afield including Nine Wells, the Magog Down, Wandlebury, the River Cam corridor, Coton Country Park, WIMPOLE HALL, and Wicken Fen.'

Objectives

8472 - English Heritage
 Object While we welcome this section, it does not provide adequate coverage of the historic environment issues. These include the strategic position of the site in relation to Cambridge, and the likely impact on approaches and views, the sensitivity of Trumpington conservation area, and the likely impact on adjoining listed buildings, particularly Anstey Hall. It is also notable that the objectives D8/a and D8/b seek to mitigate only, and we suggest enhancement should be included.

The Trumpington West site within South Cambridgeshire is some distance from the historic areas which are located to the north within Cambridge City boundary. There is no need to alter the policy although regard will need to be had of the potential for longer distance views of the church and hall.

CSF/16 Archaeology at Trumpington West

8473 - English Heritage
 Object It is important that this policy requires a proper evaluation of the archaeological interest and potential of the site at the pre-application stage, and that the results of the evaluation are submitted as part of the planning application. Policy CSF/15 requires that a comprehensive ecological survey should be submitted with the planning application - the historic environment requires similar treatment. As stated above, we consider that a detailed planning application should be submitted, to ensure the design and quality of the development is appropriate to this sensitive location.

Agreed. This would also be consistent with the approach in the Development Control Policies DPD and the other AAPs. Policy CSF/16 needs to be revised to make clear that archaeological assessment is needed before planning permission can be granted. However, the entry in the planning obligations table is not inconsistent with this approach.

Revise Policy CSF/16 to read: "The developers of Trumpington West will be required to undertake a detailed, fully analytical archaeological assessment and evaluation of known and suspected sites or features of archaeological importance, including the Scheduled Ancient Monument between Trumpington West and the river. The results of the comprehensive site survey will inform the design of any development at Trumpington West."

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

Representation	County	Object	Nature Representation Summary	Councils' Assessment	Change to Draft DPD
11302 - Council	Cambridgeshire County	Object	We consider that the archaeological assessment and evaluation should be undertaken in advance and submitted with any planning application. With reference to the Scheduled Monument, no development should be allowed which will have an adverse effect on the monument or its setting.	Agreed. This would also be consistent with the approach in the Development Control Policies DPD and the other AAPs. Policy CSF/16 needs to be revised to make clear that archaeological assessment is needed before planning permission can be granted. However, the entry in the planning obligations table is not inconsistent with this approach.	Revise Policy CSF/16 to read: "The developers of Trumpington West will be required to undertake a detailed, fully analytical archaeological assessment and evaluation of known and suspected sites or features of archaeological importance, including the Scheduled Ancient Monument between Trumpington West and the river. The results of the comprehensive site survey will inform the design of any development at Trumpington West."

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****CSF/17 Public Open Space and Sports Provision**

11361 - House Builders Federation	Object	The policy states that recreational facilities and landscaping will be required to provide commuted maintenance sums for a minimum of 10 years index linked. However, policy SF/12 (Outdoor Playspace, Informal Open Space, and New Developments) in the Core Strategy DPD states that commuted maintenance sums will be required for 10 years. There would appear to be no justification for seeking a higher figure for the Cambridge Southern Fringe than elsewhere. Therefore, the figures should be the same across the two documents, and the word 'minimum' deleted.	In response to representations to the Core Strategy and the publication of Circular 05/2005 in July after the draft LDF documents were published, it is proposed to delete the specific time period for maintenance contributions in the LDF and to prepare SPD which will address the implications of the circular. The detail required to address different types of obligation within a development of this scale is best addressed through SPD.	Delete last sentence of Policy CSF/17 (5).
10381 - Great Shelford Parish Council	Object	Shelford is short of recreation space. We feel that provision for additional space should be made within the village framework in view of the likely increase in development.	The AAP can only address the needs of the proposed development and not existing village provisions	None
9358 - Sport England East	Object	Objection is made to the lack of clarity in the policy and reasoned justification about how and where sport and recreation facilities should be provided. The policy/reasoned justification should also confirm that the planning obligation for the development will include a requirement for contributions to the provision of off-site facilities if the Formal Sports Provision Strategy concludes that this is appropriate. These changes are also considered to be justified to ensure consistency with other Area Action Plans such as those for the Cambridge East and Northstowe developments which provide clear policy guidance on how and where sports facilities will be provided in the respective developments. This is necessary to ensure the soundness of the plan in accordance with guidance in PPS12.	The level of detail in the Cambridge Southern Fringe AAP reflects the scale of the development. Northstowe and Cambridge East are much larger developments, and as such more detailed structural policies have been included. The location of facilities can be addressed through masterplanning and design, within the policy framework that has been established through the AAP and development control policies DPD.	None
11314 - Cambridgeshire County Council	Support	No reference to Strategic Open Space provision. Some provision may be provided within Cambridge City boundary and therefore be outside the scope of South Cambs DC AAP, but reference in D9.13 to Country Park within SCDC area. There should therefore be a policy on "Countryside Recreation" as with Northstowe and Cambridge East AAP.	Support noted. Strategic open space is addressed through policy CSF5. It is acknowledged that references to Strategic Open Space need to be updated to reflect the proposed standard in the Development Control Policies DPD.	Replace paragraph C3.10 with: "The development will be required to contribute towards provision of Strategic Open Space at a standard of 5.1ha per 1000 people. Strategic Open Space provides more than a local function and spaces are generally larger, more varied, and provide a different visitor experience to village open spaces."
9357 - Sport England East	Support	Policy CSF/17 is broadly supported.	Support Noted	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

Representation	Nature	Representation Summary	Councils' Assessment	Change to Draft DPD
10139 - Trumpington Meadows Land Company	Support	TMLC supports the provision of high quality public open space and sports facilities at Trumpington West and throughout the Southern Fringe.	Support Noted	
1 8165 - Cambridge City Council	Object	Support this policy but propose point 1) of the policy be amended to be consistent with point 1) Policy CE/24 (Cambridge East Area Action Plan).	Agree.	Amend policy CSF/17 point 1 to read: Provision for outdoor sports facilities, teenagers and children, informal open space and allotments will be made in Cambridge Southern Fringe in accordance with the Open Space and Recreation Standards set out in Appendix 3.
10140 - Trumpington Meadows Land Company	Object	TMLC proposes that the text is amended to read 'the Cambridge City Local Plan Outdoor Space and Informal Open Space standards will apply to the Cambridge Southern Fringe as a whole'. This provides the flexibility to coordinate provision across the whole urban extension, to provide dual use of facilities, to maximize the efficient use of land, minimize environmental and residential amenity impact, and minimize intrusion into the countryside.	The wording is proposed to be amended for clarification.	Amend policy CSF/17 point 1 to read: Provision for outdoor sports facilities, teenagers and children, informal open space and allotments will be made in Cambridge Southern Fringe in accordance with the Open Space and Recreation Standards set out in Appendix 3.
2 10141 - Trumpington Meadows Land Company	Object	TMLC queries who the Strategy for Formal Sports Provision will be prepared by, and whether this is not satisfied by the Cambridge City Council Area Development Framework and Cambridgeshire Horizons. It is unreasonable to expect a single developer to provide an audit of all facilities within the Cambridge Sub Region.	The LDF does go some way to formulating an assessment of formal sports strategy. However there is still a requirement for the developers to prepare an assessment and delivery strategy as this has land-use implications.	None
D9.1 10155 - Trumpington Meadows Land Company	Object	Clarification is sought as these paragraphs are not entirely consistent. Paragraph 9.1 states that at Trumpington West the formal and informal recreation needs will be met on site. Paragraph 9.2 then acknowledges that south of Trumpington it would be inappropriate to locate formal sports facilities as far south as South Cambridgeshire District. The same is true at Trumpington West, where the development fronts green belt and the River Cam Corridor. For consistency remove 'For Trumpington West the need for formal and informal recreation will be met on site'.	Noted however the provision of facilities on site for Trumpington West relates primarily to the built area.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****D9.2**

10157 - Trumpington Meadows Land Company

Object

Clarification is sought as these paragraphs are not entirely consistent. Paragraph 9.1 states that at Trumpington West the formal and informal recreation needs will be met on site. Paragraph 9.2 then acknowledges that south of Trumpington it would be inappropriate to locate formal sports facilities as far south as South Cambridgeshire District. The same is true at Trumpington West, where the development fronts green belt and the River Cam Corridor. For consistency remove 'For Trumpington West the need for formal and informal recreation will be met on site'.

Noted however the provision of facilities on site for Trumpington West relates primarily to the built area.

None

CSF/18 Countryside Recreation

9903 - The Bell Educational Trust Ltd

Object

We consider the development of the Access to the Countryside Strategy to be unnecessary. Developing such a strategy for such an extensive area is impractical and unrelated (contrary to Circular 05/05) to the development of a small site such as The Bell site. Any reference to the Bell site should be deleted from the policy.

The Bell site is one of several sites in the southern fringe which will be required to contribute to the landscape enhancements and access proposal to the countryside. The policy is not impractical and not unrelated.

None

8599 - Countryside Properties (Special Projects) Ltd and Liberty Property Trust

Object

The policy should make clear that the strategy will be promoted by the relevant public authorities, the implementation of which will have access to any planning obligations of an appropriate scale secured in relation to development in the Southern Fringe.

No need to state the promotion of the strategy by public authorities. The policy does refer to planning obligations and appropriate funding.

None

11324 - Cambridgeshire County Council

Object

Welcome policy statement though would prefer "public rights of way, including cycleways" than "footpaths, cyclepaths and bridleways" - to better reflect wording of D5/a, D9/c, and D9.12.

Agreed that policy should make reference to rights of way.

Amend Policy CSF/18:

A strategy will be developed to link all parts of the Southern Fringe to the wider countryside through an enhanced network of RIGHTS OF WAY INCLUDING footpaths, cyclepaths and bridleways, the provision of which will be funded by planning obligations on development at Trumpington West and development within Cambridge City at Glebe Farm, Clay Farm, Showground, Addenbrookes and The Bell School Site.

Good to see all users being considered.

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****D9.11**

11333 - Cambridgeshire County Council	Object	No reference to providing Strategic Open Space within the Southern Fringe. Is the intention to provide SOS through improved links to other sites, or by the proposed new Country Park along the east bank of the River Cam between the development at Trumpington West and Hauxton Mill? If the latter paragraph 9.13, which addresses the Country Park, needs to state that the Country Park will contribute towards the Strategic Open Space needs of the Cambridge Southern Fringe (see County Council representation on para 9.13).	Para 9.13 states that the County Park will meet the strategic recreation needs of Cambridge Southern Fringe.	None
D9.12				
11334 - Cambridgeshire County Council	Object	No reference to providing Strategic Open Space within the Southern Fringe. Is the intention to provide SOS through improved links to other sites, or by the proposed new Country Park along the east bank of the River Cam between the development at Trumpington West and Hauxton Mill? If the latter this needs to be referenced - see representation below.	Strategic Open Space is referred to in this paragraph.	None
D9.13				
11335 - Cambridgeshire County Council	Object	Suggest changing the last sentence to read "which will help meet the Strategic Open Space needs of the Cambridge Southern Fringe" to maintain consistency of terms within and across AAPs.	Noted and agree	Amend wording of paragraph 9.13 to read '...Strategic OPEN SPACE needs of the Cambridge Southern Fringe'.
Table				
11329 - Cambridgeshire County Council	Object	The County would like to see Strategic Open Space added to this Appendix. The standard is 5.1ha of SOS per 1000 people.	Noted agree	Add new paragraph of policy CSF/18: Development at Trumpington West will provide strategic open space in accordance with the standards set out in the Development Control Policies DPD.

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

9363 - Sport England East	Support	The standards in Appendix 3 are supported as they provide a basis for ensuring that adequate outdoor sports facility provision is made in the Trumpington West development. Furthermore, as the standard proposed for outdoor sport (1.2 ha per 1000 people) is locally derived and based on the assessment of local need that has been undertaken by Cambridge City Council, the standards are considered robust and would accord with the guidance in paragraphs 6-8 of PPG17. Cambridge City Council's standards are considered to be more appropriate than those of South Cambridgeshire for the Trumpington West development because the development will functionally be an extension of Cambridge and will have open space needs that are more likely to be comparable to those in urban Cambridge than the villages in rural South Cambridgeshire.	Support Noted	None
Objectives				
8474 - English Heritage	Object	Water infrastructure should not compromise archaeological remains, either through direct impact, or by changes to the water table. These considerations should be included in the objectives and in policy.	Noted the character of the landscape and therefore archaeological remains should not be compromised by the water management strategy. Objective D10/d refers to this.	None
11080 - Environment Agency	Support	We support the objectives of 'An Integrated Water Management Strategy'.	Support Noted	None
CSF/19 Land Drainage, Water Conservation, Foul Drainage And Sewage Disposal				
11081 - Environment Agency	Object	The policy must state that the surface water drainage proposals be STRATEGIC. A holistic drainage scheme will be required as piecemeal drainage will not be deemed appropriate and may be contrary to policies within the Development Control Policies DPD.	This requirement is agreed. As a consequence, it should also be included in the schedule of planning obligations in Chapter E2.	Add the following to policy CSF/19 at the end of paragraph 1 A STRATEGIC SURFACE WATER DRAINAGE SCHEME WILL BE REQUIRED AT AN EARLY STAGE FOR THE SOUTHERN FRINGE AREA
8475 - English Heritage	Object	Water infrastructure should not compromise archaeological remains, either through direct impact, or by changes to the water table. These considerations should be included in the objectives and in policy.	Noted the character of the landscape and therefore archaeological remains should not be compromised by the water management strategy. Objective D10/d refers to this.	Add to the table under para E2.5 at the row on surface water drainage "A STRATEGIC SURFACE WATER DRAINAGE SCHEME WILL BE REQUIRED"

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

Representation	Object	Nature	Representation Summary	Councils' Assessment	Change to Draft DPD
10197 - Trumpington Meadows Land Company	Object		Discussions are on going with the public utility companies and the local authority as the masterplan at Trumpington West evolves. A number of the issues raised in this section are too detailed and too prescriptive at this stage, for example, Policy SCF/19, 3h, 4, and 5. These will be determined as the proposals advance through S106 discussions.	These issues are not too detailed or prescriptive. It is the responsibility of the developers of Trumpington West to secure surface water drainage measures for their development, including long-term maintenance.	None
11362 - House Builders Federation	Object		It is not evident as to why all water bodies and water courses will need to be maintained and managed by a single organisation in order to allow development to go ahead. Nor is it clear as to why the existing water quality in Hobson's Brook and Nine Wells needs to be improved by new development. Is it necessitated by the new development itself, and does this meet the tests of reasonableness set out in Circular 5/05? Why should the managing organisation need to be managed in perpetuity at the cost of the development, why can't existing relevant water authorities become responsible?	It is the responsibility of the developers of Trumpington West to secure surface water drainage measures for their development, including long-term maintenance. Whilst more than one body could be involved, at the time of grant planning permission the LPA will need to know that all bodies responsible for the surface water drainage systems at Trumpington West are taking an integrated approach to provision and maintenance. Without a legally binding agreement to maintenance in perpetuity it would be irresponsible for the LPA to grant planning permission.	Amend policy CSF/19(3) & (4) to allow for more than one body to take responsibility for surface water drainage subject to a requirement to integrate management and maintenance regimes with all other relevant bodies as follows: "3. All water bodies and watercourses required to serve the development will be maintained and managed by one or more organisations publicly accountable bodies to ensure a comprehensive and integrated approach to surface water drainage with clearly defined areas of responsibility and funding ensure that: 4. Planning permission will not be granted until the written agreement of the Local Planning Authority has been secured that organisations with sufficient powers, funding, resources, expertise and integrated management have legally committed to maintain and manage the surface water systems for Trumpington West in perpetuity."
2	11082 - Environment Agency	Support	Part 2 of the policy is supported.	Support Noted	None
3	11083 - Environment Agency	Support	Part 3 of the policy is supported.	Support Noted	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

4	11084 - Environment Agency	Support	Part 4 of the policy is supported.	Support Noted	None
5	9833 - GO-East	Object	Policy CSF/19 includes a requirement for development to include water conservation measures. It requires a proportion (25%) reduction in average water consumption before any dwellings are occupied. However, it does not explain what this means in practice and whilst a laudable policy, it is difficult to see how the policy will be implemented in practice through the planning system, or how development proposals will be judged against its requirements. The Submission DPD policy should be drafted so that developers are clear what is expected of them, and how it can be delivered through the land use planning system or by other means. The policy's justification should also explain how the resulting policy is to be implemented and monitored.	The Council are keen to ensure that Southern Fringe is as sustainable development as possible, including use of water resources. However, in view of the advice of GO-East that it is beyond the scope of the planning system to deliver such a specific target, the Councils agree reluctantly that criterion 5 should be amended. However, it is proposed to retain the policy to make clear that the Council considers that water conservation is an important issue at Southern Fringe.	Amend criterion 5 of Policy CSF/19: 'All development in Trumpington West will incorporate water conservation measures, including water saving devices, rainwater harvesting and greywater recycling, whilst managing the recycling of water to ensure no adverse impact on the water environment and biodiversity.' Add new sentence to the end of paragraph D10.11 to read: "... THIS IMPORTANT ISSUE SHOULD BE CONSIDERED AS PART OF THE CAMBRIDGE SOUTHERN FRINGE PROPOSALS. Delete paragraphs D12.12 and D12.13.
	11085 - Environment Agency	Support	Part 5 of the policy is supported.	Support Noted	None
	11336 - Cambridgeshire County Council	Support	Support in particular the incorporation of water saving devices.	Support Noted	None
	D10.6				
	11337 - Cambridgeshire County Council	Object	Mention of green roofs, present in Cambridge East AAP, is omitted and could be included here.	Agree.	Add additional bullet to paragraph 10.6: Green roofs where appropriate to the urban design;
	Objectives				
	11338 - Cambridgeshire County Council	Support	Welcome the inclusion of exemplar projects within the development and hope they will be widely showcased to increase uptake within and outside the CSF development.	Support Noted	none

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****CSF/21 An Exemplar in Sustainability**

9836 - GO-East	Object	Policy CSF 21 includes a requirement for development to include exemplar sustainable development projects, including energy efficiency measures. It does not explain what this means in practice and whilst a laudable policy, it is difficult to see how the policy will be implemented through the land use planning system, or by other means, or how proposals will be judged against its requirements. The Submission DPD policy should be drafted so that developers (or others) are clear what is expected of them, and how it can be delivered through the land use planning system or by other means. The policy's justification should also explain how the resulting policy is to be implemented and monitored.	The support for the objectives underpinning the policy is noted. The Council is of the view that Southern Fringe is of such a scale and importance that it is crucial that it is as sustainable as possible. The Structure Plan requires that the new town of Northstowe is "an example of excellence in the creation of a sustainable settlement" (Policy P9/3). Whilst the same explicit requirement is not included for Southern Fringe, the Council considers that it is reasonable and appropriate to take a similar approach. The policy is not prescriptive about how the terms of the policy will be met and this will be a matter for negotiation on any planning application.	None
10203 - Trumpington Meadows Land Company	Object	TMLC support the need for a sustainable approach towards development but seek reassurance that account will be taken of other development costs. TMLC would welcome the rewording of this policy to reflect this and addition of the following to the end of the policy: 'In applying this policy account should be taken of other site development costs in assessing what is reasonable to expect from the developer.'	The support for the objectives underpinning the policy is noted. However it is considered not appropriate to include the wording suggested.	None
D12.4				
10198 - Trumpington Meadows Land Company	Object	paragraph D12.4 is repetitious of Para D10.11 - D10.13	It is agreed that this paragraph repeats points dealt with adequately elsewhere in the plan.	Delete paragraph D12.4
D13.1				
10162 - Trumpington Meadows Land Company	Object	TMLC object to paragraph D13.1. TMLC recognizes the importance of planning for waste management facilities in association with the Southern Fringe urban extension. However, given the location of the Trumpington West site at the southern gateway to the city it is inappropriate for the site to accommodate a waste management facility. The sensitivity of the River Cam corridor and conservation area to the north further supports the removal of reference to a waste management facility from this paragraph.	Noted however the wording used is potentially and therefore implies some degree of flexibility in relation to choosing a site for the waste management facility.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****D13.4**

10936 - Cambridgeshire County Council

Object

There is a need for provision for a Household Waste Recycling Centre (HWRC) in the Southern Fringe (Policy WLP 20). In the absence of provision of a major waste management facility (provision for which is made through Policy WLP 18 of the adopted Waste Local Plan) there is also a need for a bulking up / transfer facility to deal with business and commercial waste arising from the Southern Fringe and its immediate area. This would be best co-located with the HWRC, and will require an area of 1 ha (in addition to the HWRC). With the intensification of bio-medical and clinical activities on the Southern Fringe there may also be a need to consider the future provision of a specialist clinical / bio-medical waste management facility, that could be accommodated on employment land. Currently, the Waste Planning Authority is unable to satisfy itself that adequate provision for waste management can be made, although various options are being explored.

Planning for waste is a County Council responsibility and cannot be shown in the Area Action Plan.

None

D13.6

10937 - Cambridgeshire County Council

Object

The Waste Planning Authority has identified a need for temporary waste management facilities to be established prior to development commencing, to deal with the re-use, recycling and recovery of waste arising from development / construction activities within all major development areas. These temporary facilities should also encompass the re-use / recycling of sustainable construction materials. This should be acknowledged in the Plan, and developers advised to contact the Waste Planning Authority. In addition it would be appropriate for the principal applications for the new development areas to be supported by a Waste Management Strategy which should address such factors as:

- Location of waste
- Types of waste
- Volumes of waste
- Strategy for dealing with each waste stream (including sustainable construction materials)
- Strategy for dealing with any residues on and off site (including details of where they are to be sent for disposal). Implementation should be secured by planning condition.

Planning for waste is a County Council responsibility and cannot be shown in the Area Action Plan.

None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****Chapter E DELIVERING THE CAMBRIDGE SOUTHERN FRINGE****E1/b**

8476 - English Heritage
Object
E1/b should incorporate a strategy for the protection and enhancement of the historic environment.

Noted not agree. This is addressed elsewhere in the area action plan, in particular the requirement to prepare a landscape strategy.

None

E1.1

9314 (Netherhall Farm)
Object
The site will not deliver the required completions in the Plan period. Land at Netherhall Farm should be identified as an allocation to assist delivery.

The proposed Netherhall site is outside of AAP area and also outside the District boundary and is hence a matter for Cambridge City.

None

CSF/22 Construction Strategy

11476 - GO-East

Object

We think that the Core Strategy and other DPDs will need to include a clearer and more robust implementation and monitoring framework that should set out how delivery will be achieved and measured. Clearly, we recognise that this is not possible in a detailed manner for developments that will be phased towards the end of the Structure Plan period, such as the majority of the Cambridge East development. However, we would expect the Core Strategy to include a commentary on when the sites are expected to come forward for development, the anticipated delivery timescales, as well as some of the main dependencies, risks to delivery and any contingencies. This overall implementation framework should then be built on in further detail in respect of the main sites through the AAPs and allocations DPD.

The AAP has been prepared in consultation with stakeholders at 3 stages of consultation. Cambridgeshire Horizons is leading on a number of sub regional strategies in which the Councils are involved, looking at issues such as formal sports, and green infrastructure. Cambridgeshire Horizons is also assisting the local authorities with mechanisms to ensure prompt and efficient delivery of the major developments. Given the urgency to ensure that plans are in place to bring forward the major developments to meet the needs of the Cambridge Area, the AAP is inevitably a fairly strategic document which sets out the anticipated key requirements of the development where these are already known, and identifies where strategies are required to identify all the specific requirements of the development. Horizons will have a key role in helping to draw together the identified requirements of Southern Fringe as work on a planning applications progresses and in facilitating discussions on a section 106 agreement. The submission AAP will have a new delivery section which will include a housing trajectory and also a new monitoring section which will be drawn from the separate Monitoring Strategy and provide a framework to ensure that the implementation and delivery of Southern Fringe is efficiently and effectively carried out.

Action

Add two new sections to Chapter E: "Delivering Cambridge Southern Fringe" will include matters affecting delivery and a housing trajectory, "Monitoring Cambridge Southern Fringe " will be drawn from the separate Monitoring Strategy and provide a framework to ensure that the implementation and delivery of Southern Fringe is efficiently and effectively carried out.

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

Representation	County	Object	Nature Representation Summary	Councils' Assessment	Change to Draft DPD
11339 - Cambridgeshire Council	Cambridgeshire	Object	As for Policy DP/6 in Core Strategy, if talking about haul roads affecting "the public highway" and residents and businesses, then should also include effect on "environmental amenities of biodiversity, rights of way and green spaces. Developers won't realise "highway" includes Rights of Way, even if that is what is intended by the phrase. Require that insert "Developers must employ an agreed methodology for haul roads where they cross public rights of way". Good practice developed with SCDC planners pertains.	This is a detailed issue which is best addressed through the preparation of the comprehensive construction strategy required under Policy CSF/22 criterion 1. The AAP cannot be comprehensive on every issue that should be included in the strategy.	None
1	9853 - GO-East	Object	Policy CSF/22 requires any haul roads in Cambridge City, but close to properties in South Cambridgeshire to include landscaping and noise attenuation measures. However, the policy does not include details of how this is to be achieved. It is difficult to see how the requirements in the South Cambridgeshire AAP, can be delivered where development proposals will be considered against the Cambridge City development plan. Rather, the Council should be making representations on the Cambridge City Local Plan to ensure that its policies include adequate and appropriate requirements for noise attenuation and landscaping.	Noted and agreed, the Council will seek to ensure South Cambs residents are not adversely affected by haul roads within Cambridge City through representations made to their Local Plan and relevant planning applications.	Change Paragraph 2 of CSF/22 to read: "Construction haul roads for development at Glebe Farm, Clay Farm, Showground, Addenbrookes the Bells School Site with Cambridge will not be permitted in the countryside within South Cambridgeshire."
2	9905 - The Bell Educational Trust Ltd	Object	We agree that the construction of haul roads for the development of The Bell site should not be permitted in the countryside within Southern Cambridgeshire. The site can be successfully accessed from Babraham Road within the urban area of Cambridge. No road infrastructure will be necessary within Southern Cambridgeshire District. Therefore any reference to the Bell site should be deleted from the policy.	Support noted but no need to delete reference to Bell School site.	None
8604 - Countryside Properties (Special Projects) Ltd and Liberty Property Trust	Cambridgeshire	Object	To rule out any haul roads within South Cambridgeshire cannot reasonably be justified. The policy is ill-considered. To require all haul roads to be within the jurisdiction of Cambridge City Council is unjustifiable. Such proposals will need proper consideration. Being significantly more urban may raise a degree of disturbance which is unacceptable. The physical presence of haul roads in the countryside will be temporary.	Disagree, physical presence of haul routes in the countryside will be visually unacceptable.	None
3	8477 - English Heritage	Object	Protection of archaeological remains should be included in this policy, particularly point 3.	Archaeology is covered by policy CSF/16 and the protection of any archaeological remains will form part of the evaluation.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

5

10146 - Trumpington Meadows Land Company	Object	TMLC wishes to see the following amendments: 'The construction strategy will provide for all spoil generated by the development at Trumpington West to be accommodated within the development site, where possible'. Accommodation on-site will thereby remain the prime objective, but allows flexibility to re-use spoil in the most effective way and appropriate manner once the quantum, nature and properties of the material is known.	Noted and agreed as some spoil may be contaminated and would not be appropriate to retain on site.	Amend paragraph 5 of CSF/22 to read: "...The construction spoil strategy will provide for all SUITABLE spoil generated by development at Trumpington West to be accommodated within the development site and in accordance with a landscaping scheme to be approved by the Local Planning Authority...."
E1.3				
10150 - Trumpington Meadows Land Company	Object	TMLC consider this paragraph too prescriptive in specifying where the storage compound should be located. The phasing programme will determine where it will be best located to minimize disturbance and traffic movement.	The supporting text suggest that the best site is close to the road and the policy is worded to give the flexibility required. This can be negotiated as part of the planning application process.	None
E1.8				
9641	Object	This paragraph recognises that "traffic noise from the M11 is intrusive over much of the western side of Trumpington..." and that action will be necessary to "mitigate road noise" in order to provide pleasant environments for recreation and living". The LDF needs to recognise that the traffic noise from the M11 is intrusive as far as residents of Little Shelford and Hauxton are concerned. The LDF therefore needs to recognise that noise reduction measures are required now to improve the environment of residents of villages such as Hauxton and Little Shelford.	Noted, however the AAP relates to the development of the southern fringe and in particular the Monsanto site. It would be unreasonable to expect the developer to mitigate existing road traffic noise unrelated to the new development.	None
CSF/23 Countryside Enhancement Strategy				
8606 - Countryside Properties (Special Projects) Ltd and Liberty Property Trust	Object	The policy or the text should make plain that the level of any planning obligations will reflect the advice in Circular 1/97.	All planning obligations will reflect the advice in circular 05/05 and reference is not needed in this section.	None
9089 - Addenbrooke's Hospital	Object	This policy sets out proposals for enhancing a significant area south of the City Boundary between Babraham road and the built up area of Stapleford. The Trust objects to assumption that this strategy is suggested to be funded in part by developments on the Addenbrooke's site. This reference should be deleted.	The proposed development at Addenbrookes will have significant impacts which will need to be mitigated. The landscape enhancements are required in order to achieve this. All the developments in the southern fringe will be required to make contributions towards this element and the Addenbrookes development will be no exception.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD**

9906 - The Bell Educational Trust Ltd	Object	We consider The Countryside Enhancement Strategy, as a further layer of guidance, to be unnecessary. The suggested area of enhancement extends well beyond the Bell site and is unrelated to its development, it is therefore contrary to Government guidance. Any reference to the Bell site should be deleted from the policy.		The Countryside Enhancement Strategy is a key requirement to mitigate the impact of the Southern Fringe Development. The area in question is not unrelated to the development of the Bell School site.	None
11340 - Cambridgeshire County Council	Support	Support.		Support Noted	None
CSF/24 Making use of existing buildings/resources on site					
9846 - GO-East	Object	The policy fails to recognise the type, quality and nature of the materials and its appropriateness for use as hard core or other building materials. It is difficult to see how the policy in this form will be implemented in practice, or how proposals will be judged against its requirements. The Submission DPD policy should be drafted so that developers are clear what is expected of them, and how it can be delivered. The policy should also take into account the fact that not all building materials may be suitable or appropriate for recycling. The policy's justification should also explain how the resulting policy is to be implemented and monitored.		Agree that some materials may not be able to be recycled. It is not appropriate for the AAP to go through a list of appropriate materials.	Amend wording of CSF/24 to read: "Redundant buildings together all other redundant structures will be recycled, WHERE APPROPRIATE, within the Cambridge Southern Fringe to provide a local source of hardcore or other building materials."
11341 - Cambridgeshire County Council	Support	Support.		Support Noted	none
CSF/25 Management of Services, Facilities, Landscape and Infrastructure					
8478 - English Heritage	Object	Management of the historic environment should be included here, especially in relation to the scheduled ancient monument and other features of archaeological or historic importance.		Policies elsewhere in the AAP address archaeology and built heritage (CE/23) and the retention of any existing landscape features that are appropriate to the local landscape character.	None
11359 - House Builders Federation	Object	The policy states management strategies for services, facilities, landscape and infrastructure will need to be submitted to the Local Planning Authority for adoption prior to the granting of outline planning permission. This seems to be a completely unreasonable requirement given that applicants will be expected to provide such detailed information at potentially very high cost to themselves, prior to even knowing whether or not their specific proposals will even be likely to obtain planning permission in the first place.		The management of services, facilities, landscape and infrastructure at Southern Fringe is likely to require contributions from the development to be incorporated into the planning obligation agreement which can only be agreed when the outline planning permission is granted.	None
11342 - Cambridgeshire County Council	Support	Support.		Support Noted	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****CSF/26 Timing / Order of Service Provision**

9847 - GO-East	Object	It will be important for the Council, when it submits the AAP, to demonstrate its deliverability and realism, and that it has undertaken an assessment of risks to deliverability, and considered possible contingencies measures should the risks arise. The submission AAP should include details of how its implementation will be monitored, including targets and indicators, including a realistic housing trajectory. It could also be more explicit about who is expected to deliver what (including key infrastructure items) and by when, rather than leave it until consideration of the planning application.	Support	A new chapter on delivery will be included in the submission AAP, to include a housing trajectory and details on some of the mechanisms to address effective delivery. Much of the detailed work on timing of development in relation to service provision will be a matter for negotiation on any planning application and through partnership work with Cambridgeshire Horizons as delivery vehicle. However, the AAP identifies as far as is possible at this stage the requirements of the development, or the need for strategies to be prepared to do so, and provides a policy hook for ensuring their timely delivery. A new chapter on monitoring will also be included and will contain indicators, drawn from the Council's separate Monitoring Strategy.	Include new chapter "E3: Delivering Cambridge Southern Fringe" to include matters affecting delivery and a housing trajectory. Include new chapter "E4 Monitoring Cambridge Southern Fringe" with indicators drawn from the separate Monitoring Strategy.
11343 - Cambridgeshire County Council <i>E2/a</i>	Support	Support.	Support Noted	None	
11344 - Cambridgeshire County Council	Object	There should be a policy regarding planning obligations as there is in Cambridge East AAP for consistency between AAPs.		A policy in the Area Action Plan is not required, as policy DP/4 of the Development Control Policies DPD applies. The Cambridge East AAP has a planning obligations policy as it is a 'stand alone' document produced jointly with Cambridge City Council.	None.
8610 - Countryside Properties (Special Projects) Ltd and Liberty Property Trust <i>E2.3</i>	Object	The policy or supporting text should make plain that contributions sought by way of obligations will fall within the guidance set in Circular 1/97, which does not find mention anywhere in the document.		Obligations will be sought in line with Circular 05/05 and as such this does not need to be referred to in this document.	None
9091 - Addenbrooke's Hospital	Object	This policy supporting text should make explain that some types of development - such as health care provision should not be required to make financial or other provision for community services.		The development of Addenbrookes should be required to make contributions through obligations which are commensurate with the development.	None

Representations**Nature Representation Summary****Councils' Assessment****Change to Draft DPD****Archaeology**

8481 - English Heritage	Object	The table implies that archaeological evaluation will be carried out after planning permission has been given. However, the site should be subject to an evaluation prior to the planning application being made, in accordance with PPG16 procedures. The results of such an evaluation should be used to inform the design of the development and submitted with the planning application. Conditions or planning obligations should be used in the light of knowledge acquired through the archaeological evaluation, to ensure investigation and recording takes place in an agreed manner, and other relevant issues such as interpretation and public access are properly addressed, as PPG16 recommends.	Agreed. This would also be consistent with the approach in the Development Control Policies DPD and the other AAPs. Policy CSF/16 needs to be revised to make clear that archaeological assessment is needed before planning permission can be granted. However, the entry in the planning obligations table is not inconsistent with this approach.	Revise Policy CSF/16 to read: "The developers of Trumpington West will be required to undertake a detailed, fully analytical archaeological assessment and evaluation of known and suspected sites or features of archaeological importance, including the Scheduled Ancient Monument between Trumpington West and the river. The results of the comprehensive site survey will inform the design of any development at Trumpington West."
-------------------------	--------	---	--	---

Energy

11262 - Cambridgeshire County Council

Object

Renewable energy target is referenced in the table (p112) but it is not expanded on within the document. This is considered an omission.

Issues are addressed by the Development Control Policies DPD, policies NE/1 and NE/3. A repeat of these policies in the Area Action plan is not required.

None.

GLOSSARY

Table

9094 - Addenbrooke's Hospital

Object

The glossary does not explain community services. This would be a helpful addition and could be based on the text of paragraph E2.1

Noted but no need to add this to glossary

None

ANNEX: BASELINE ASSESSMENT TABLES

CSF/7 Trumpington West housing

10101 - House Builders Federation	Object	The HBF considers that the affordable housing requirements set out in policy CSF/7 and its reasoned justification seriously undermines the soundness of the Plan as it threatens the deliverability of the Council's overall housing requirement.	Objection is addressed through Cambridge Southern Fringe Area Action Plan, and does not refer to the sustainability appraisal.	
-----------------------------------	--------	---	--	--

CSF/25 Management of services, facilities, landscape and infrastructure

10098 - House Builders Federation	Object	The policy states management strategies for services, facilities, landscape and infrastructure will need to be submitted to the Local Planning Authority for adoption prior to the granting of outline planning permission. This seems to be a completely unreasonable requirement given that applicants will be expected to provide such detailed information at potentially very high cost to themselves, prior to even knowing whether or not their specific proposals will even be likely to obtain planning permission in the first place.	Objection is addressed through Cambridge Southern Fringe Area Action Plan, and does not refer to the sustainability appraisal.

GLOSSARY OF TERMS

To be updated and inserted into submission version

A INTRODUCTION

- A.1 A sustainable new urban extension to Cambridge is proposed at the Cambridge Southern Fringe. The urban extension crosses the South Cambridgeshire / Cambridge City boundary. Much of the built development lies within Cambridge City and is addressed in the Cambridge Local Plan. This Area Action Plan establishes an overall vision for that part of this new urban extension which lies within South Cambridgeshire including its relationship with Cambridge and its surrounding countryside setting. It identifies the site within South Cambridgeshire for approximately 600 dwellings and associated development at Trumpington West as well as the off-site infrastructure needed to deliver and serve the urban extension as a whole. The Area Action Plan also includes landscape, biodiversity and access proposals for the countryside adjoining development areas at Trumpington East, Addenbrooke's Hospital and the Bell School where development will take place just within Cambridge City's area.
- A.2 The Area Action Plan will form part of the Development Plan for South Cambridgeshire District. It needs to be read in conjunction with the South Cambridgeshire Development Control Policies DPD. The Development Plan is made up of those plans which have been statutorily adopted and which cover the District. The other parts of the Development Plan are:
- Regional Planning Guidance for East Anglia – RPG6 (2001)
 - The Cambridgeshire & Peterborough Structure Plan (2003)
 - The Cambridgeshire & Peterborough Waste Local Plan (2003)
 - The Cambridgeshire Aggregates (Minerals) Local Plan (1991)
- A.3 The Area Action Plan comprises policies and plans which will:
- Establish a vision for the Cambridge Southern Fringe;
 - Set out the policies and proposals for the development of Trumpington West;
 - Set out the policies and proposals for the countryside adjoining all the development areas in the Cambridge Southern Fringe.
- A.4 The Area Action Plan includes plans comprising:
- The **Proposals Map** which identifies the area within which the part of the new urban extension in South Cambridgeshire will be developed and shows the proposed revisions to the Green Belt boundary, the

extent of the built-up area of the new urban extension, including urban open space, together with areas of land within which any associated off-site infrastructure development, a proposed County Park and areas where landscape, recreation and access improvements will be provided. (The Proposals Map is contained in a separate document).

- **Concept Plans** which show in diagrammatic form the structure of the new urban extension which will provide the basis for subsequent masterplans, design guides and design codes. It shows the distribution of the main uses and their inter-relationships to be developed in the new urban extension and how they link with the wider City. In the surrounding countryside it shows in diagrammatic form the principles which will guide the development of a Countryside Enhancement Strategy which will include landscape, recreation, biodiversity and access proposals. (see pages 19 and 21).

A.5 The Area Action Plan will provide a context for detailed plans to be prepared before and during the development process. These will include

- A Masterplan for the whole of the new urban extension, covering both land in South Cambridgeshire and Cambridge City, which will be prepared to accompany the outline planning application for the development at Trumpington West. This will show how the Concept Plan will be interpreted into development proposals on the ground by showing the disposition of development, roads, services, open space and landscaping.
- A Design Guide which will identify the particular character of Trumpington West and set out the general principles for good design of the urban extension as a whole and will be prepared to accompany any planning applications for individual phases of development, any applications which affect Trumpington village centre and any employment areas or areas of strategic recreation / open space.
- Design Codes which will set more detailed criteria to create a clear identity for individual areas, but will not replace the need for careful design of individual buildings and areas as proposals are brought forward as planning applications.

A.6 A number of strategies are also required as part of the implementation of development at the Cambridge Southern Fringe to ensure that it is a high quality development which meets the needs of its residents.

B VISION AND DEVELOPMENT PRINCIPLES

THE VISION FOR THE CAMBRIDGE SOUTHERN FRINGE

POLICY CSF/1 The Vision for the Cambridge Southern Fringe

Cambridge Southern Fringe will be a modern, high quality, vibrant and distinctive urban extension of Trumpington which will complement and enhance the character of the City. Development within both South Cambridgeshire and Cambridge City will secure a Countryside Enhancement Strategy comprising landscape, biodiversity and public access enhancements in the surrounding countryside, which will complement the existing landscape character of the area and protect and enhance the setting of Cambridge.

- B.1 The Structure Plan identifies land to the south and east of Trumpington and adjoining Addenbrooke's Hospital for development to provide major urban extensions to Cambridge (Policy P9/2c). It requires that provision be made for housing and mixed use development as well as a major new employment area all on land to be released from the Green Belt. The Structure Plan requires a strategic Masterplan to be prepared for this area. Any development must pay proper regard to the need to maintain the penetration of the countryside into the heart of the City along Hobson's Brook.
- B.2 To support this strategic development which lies entirely within Cambridge City, the Structure Plan requires that development brings about improvements to the adjoining countryside which will benefit the development and the communities which are being required to grow. Much of this countryside lies within South Cambridgeshire.
- B.3 Within South Cambridgeshire, the Area Action Plan includes policies and proposals for landscape, biodiversity, access and recreation between Trumpington / Addenbrooke's and [WandleburyWandlebury Country Park](#) / The Magog Down.
- B.4 The Area Action Plan also identifies land for development at Trumpington West where the redevelopment of the former Plant Breeding Institute (more recently Monsanto (Cambridge)) provides an opportunity for further development at Trumpington, unforeseen at the time of the Structure Plan, which will help increase the supply of housing in Cambridge and secure landscape and countryside access improvements along the River Cam corridor. The northern and eastern parts of this development lie within Cambridge City (see Cambridge Local Plan). It is important to ensure a holistic approach to the development across the administrative boundary.

DEVELOPMENT AND COUNTRYSIDE IMPROVEMENT PRINCIPLES**POLICY CSF/2 Development and Countryside Improvement Principles**

1. A Strategic Masterplan ~~and Strategic Design Guide~~ for the Cambridge Southern Fringe as a whole will be submitted to and approved by the Local Planning Authorities prior to the granting of any planning permission to ensure that Trumpington West will develop:
 - a. As a western extension of Trumpington of approximately 600 dwellings in South Cambridgeshire with appropriate employment, services, facilities and infrastructure;

The Setting of the Cambridge Southern Fringe

- b. Bounded by the Cambridge Green Belt which will constrain further growth;
- c. Physically separate from surrounding villages especially the closest villages of Great Shelford, Stapleford and Hauxton where the Green Belt will maintain their character and the character of Cambridge as a city surrounded by a necklace of villages;
- d. Connecting the green spaces of Cambridge to the surrounding countryside, by maintaining a Green Corridor along the River Cam and linking the Green Corridor between Trumpington and Addenbrooke's to WandleburyWandlebury Country Park and the Magog Down;
- e. As an attractive feature in the landscape with which it is well integrated through a variety of edge treatments;
- f. With a landscaped setting which respects and reinforces local landscape character including countryside enhancement measures and which respects the underlying historic character of the site established by reference to historic landscape character database and archaeological evaluation;
- g. With increased public access by walking, cycling and horse riding to the wider countryside, particularly to WandleburyWandlebury Country Park and the Magog Down to the south, to the River Cam and to Hauxton to the west. These routes will provide for linkages to the wider Strategic Open Space network including Coton Countryside Reserve,

Teversham Country Park, Milton Country Park, Wimpole Hall and Wicken Fen;

The Character and Design of Trumpington West

- h. Linking the new development with the urban fabric of Trumpington and including facilities which will serve the existing as well as the new community;
- i. A distinctive urban character which reflects innovative urban design and which engenders an inclusive, vibrant and diverse community with a strong sense of local identity and a well developed sense of community spirit;
- j. With an emphasis on housing which achieves an overall high density, which is well designed and of a high quality;
- k. A balanced, viable and socially inclusive community with a good mix of house types, sizes and tenures (including affordable housing) attractive to, and meeting the needs of all ages and sectors of society including those with disabilities;
- l. A flexible design, energy efficient, built to be an exemplar of sustainable living with low carbon and greenhouse gas emissions and be able to accommodate the impacts of climate change;
- m. As a place where people can live a healthy lifestyle, in a and safe environment and where most of their learning needs are met;
- n. The highest quality of built form and open spaces throughout, but particularly the development edges fronting the River Cam, the M11 and on the approach to Cambridge along the Hauxton Road, including new landmark buildings and public art to give a sense of place;
- o. With well designed and landscaped urban and residential areas which are permeable and legible and create neighbourhoods with their own character;
- p. Green spaces and water features to contribute to the character of the area, provide a recreational resource and enhance biodiversity and landscape, and provide green links to the wider countryside ;

- q. With a net increase in biodiversity across Trumpington West;
- r. With Green Fingers running through the development which are within walking distance of all residents and which connect with other open spaces within and around Trumpington and the wider countryside beyond;

Transport

- s. As a compact and sustainable urban extension with low car dependency, which is highly accessible and permeable to all its residents by foot, cycle and High Quality Public Transport;
- t. With a well developed, high quality network of footpaths, bridleways and cycleways to support sustainable transport, recreation and health within the urban extension, and an improved network connecting it to Trumpington High Street, the City, neighbouring villages, the open countryside and the wider network;

Supporting Services and Facilities

- u. An enhanced Trumpington Centre to provide a community focus and meet day to day needs;
- v. Providing local employment to create a balanced community but which ensures that the development as a whole addresses the current lack of housing close to Cambridge;
- w. An appropriate mix of jobs whilst providing for the continuing needs of the high technology research and development industry;
- x. An appropriate level of services and facilities including education, sport, ~~and~~ recreation and health facilities;
- y. In such a way that the developers provide necessary services, infrastructure and facilities, either directly or via financial contributions, including appropriate provision for long-term management and maintenance;
- z. Opportunities for residents of the wider community to access its services and facilities;

Land Drainage

- aa. Appropriate measures to minimise flood risk to the development and other communities, without compromising landscape and design quality;

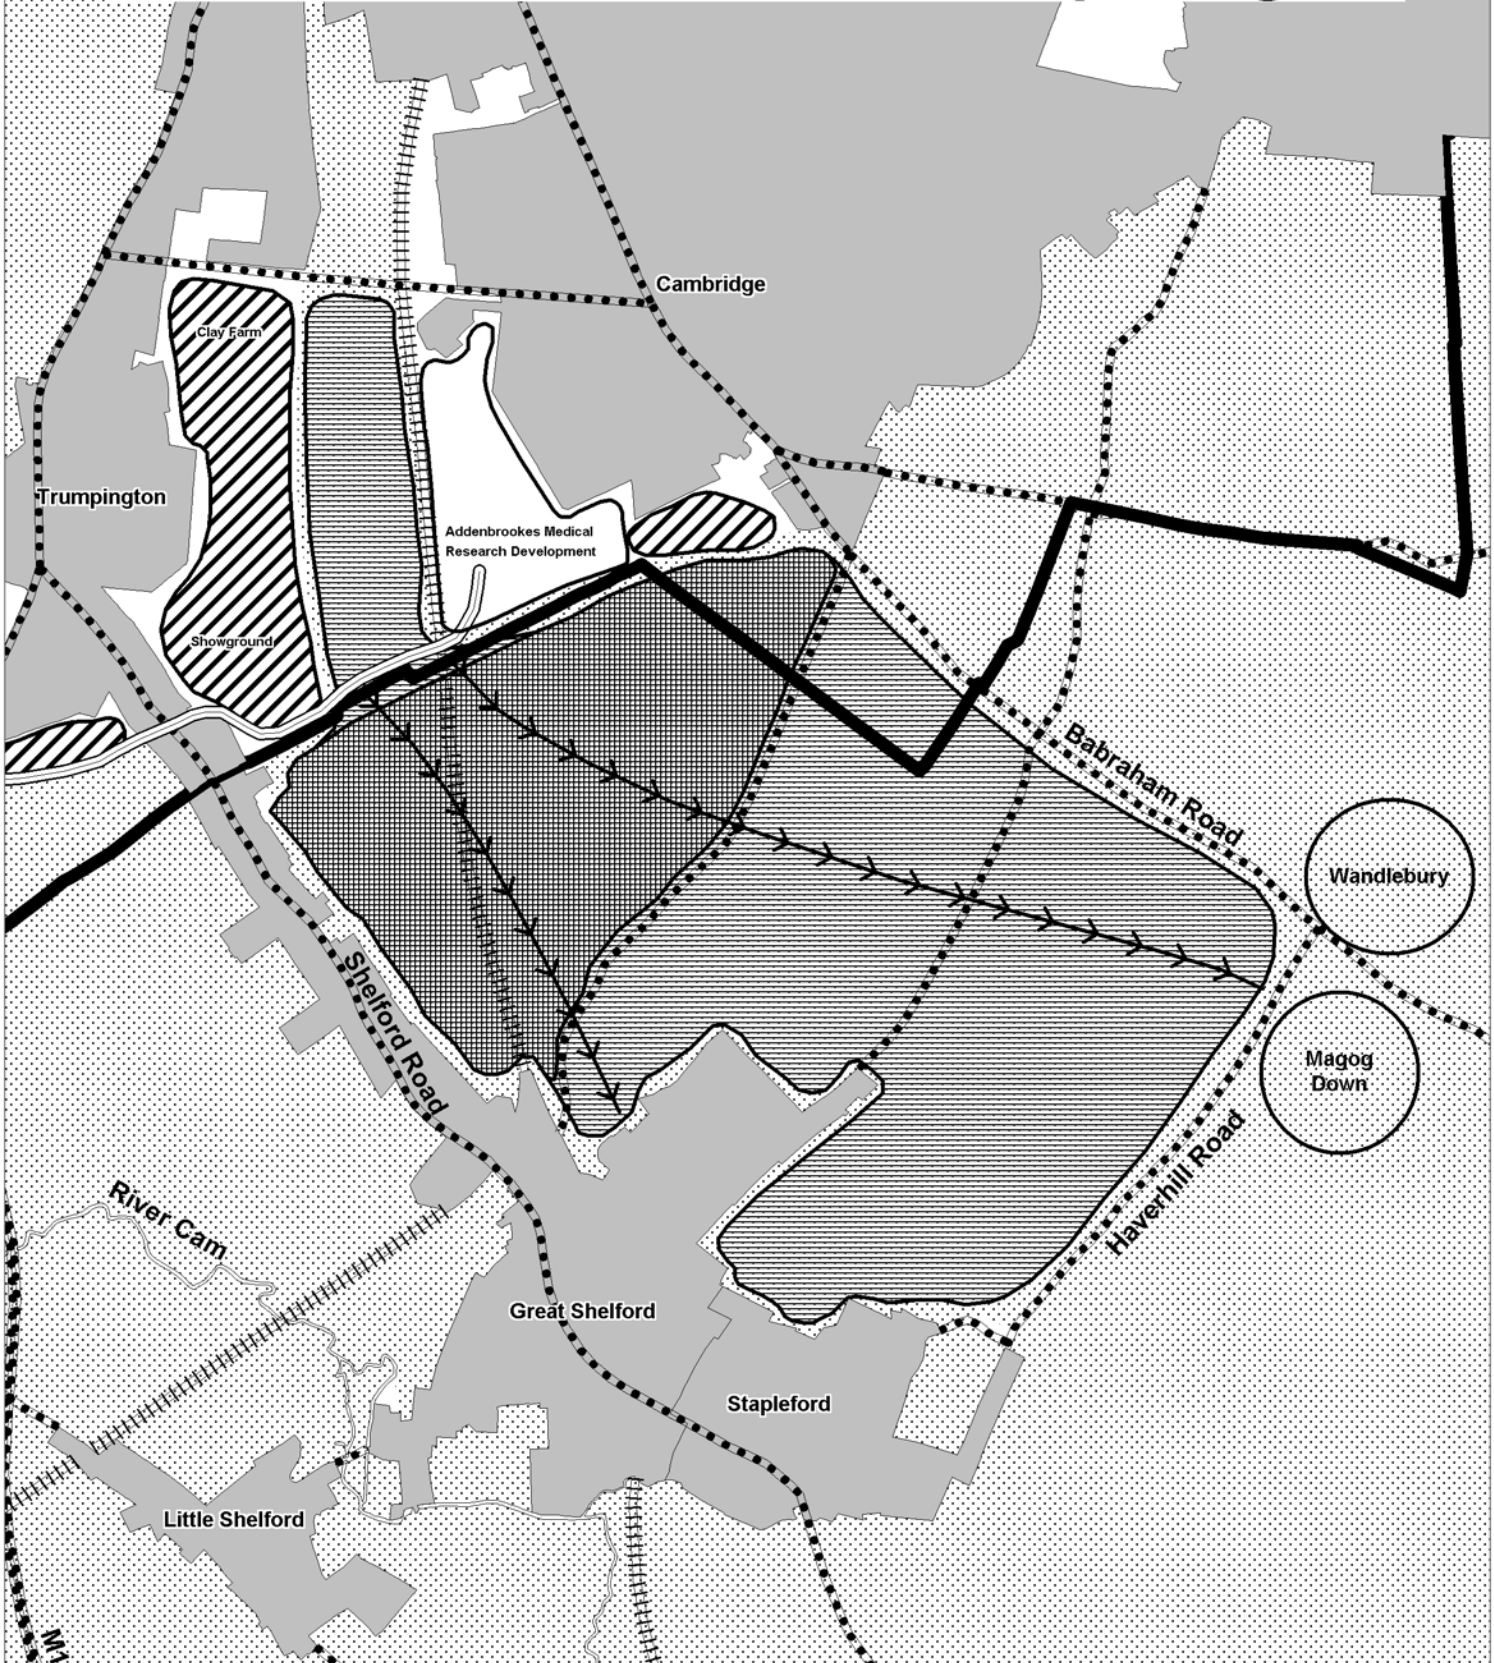

Implementation and Phasing

- bb. In phases to ensure that the necessary services, facilities, landscaping and infrastructure are provided ~~from the start~~ and in step with the development and the needs of the community;
- cc. With minimum the impact of development during construction on both the existing and new communities and to the environment;
- dd. ~~In accordance with Masterplans,~~ Design Guides and Design Codes will be prepared for each phase of development, to be submitted to and approved by the Local Planning Authority prior to the granting of ~~any~~ planning permission for reserved matters applications.
- ee. A strategic design guide to set out the general principles for good design of the town as a whole to be submitted to and approved by the local planning authority prior to the granting of permission for reserved matters applications.

- B.5 These development principles set policy requirements for the achievement of a high quality development which will serve the needs of the new residents of Trumpington West, which will integrate Trumpington West into the remainder of Trumpington and which will ensure that the whole of the development in the Cambridge Southern Fringe integrates well with the surrounding countryside.
- B.6 Before Cambridge City and South Cambridgeshire District Councils can grant any planning permission for any part of the Cambridge Southern Fringe, they will need to ensure that the development will be delivered consistent with the principles set out in the Area Action Plan and the City Local Plan. A Strategic Masterplan and Design Guide will create the framework within which a quality environment can be achieved. Local Masterplans, Design Guides and Design Codes for individual phases of development will ensure that the development and countryside improvement principles are taken forward.
- B.7 Securing landscape, access and biodiversity improvements within South Cambridgeshire for development which will take place within Cambridge

City will require that planning conditions / Section 46 agreements for development within Cambridge will include linked funding provisions.

C TRUMPINGTON WEST AND THE SOUTHERN SETTING OF CAMBRIDGE

OBJECTIVES

1. Site

C1/a To meet the requirements of Policies P9/1 and P9/2 of the Structure Plan.

2. Green Belt

C2/a To ensure that the development of Trumpington West enhances the character and setting of Cambridge.

C2/b To ensure that Trumpington will not merge with any of the surrounding villages.

C2/c To provide opportunities for landscape improvements, outdoor recreation and public access to the open countryside around Trumpington and Addenbrooke's Hospital.

3. Countryside

C3/a To create an appropriate setting for the expanded Trumpington and Addenbrooke's Hospital, minimising any adverse visual or landscape impacts on the surrounding area.

C3/b To enable the landscape in the Cambridge Southern Fringe to provide an attractive environment and to maximise benefits to wildlife.

C3/c To enable the landscape in the Cambridge Southern Fringe to contribute to the informal recreation needs of those living, working and visiting the area.

C3/d To develop appropriate management strategies to ensure high quality, robust and effective implementation, adoption and maintenance of the landscape areas.

C1 THE SITE FOR TRUMPINGTON WEST

POLICY CSF/3 The Site For Trumpington West

Land at the former Monsanto site (incorporating the existing office and laboratory accommodation and associated agricultural buildings), of approximately 15.5 hectares, will accommodate built development as part of an urban extension of Trumpington, as shown on the Proposals Map.

- C1.1 The Regional Planning Guidance for East Anglia (RPG6) identifies the Cambridge Sub-Region as a growth area for the period up to 2016 where the intention is to increase the rate of development from about 2,200 dwellings to 2,800 dwellings per year. It states that housing and associated services and facilities should be focused in Cambridge on land within the built up area and on the edge of the City through a Green Belt review.
- C1.2 The Cambridgeshire and Peterborough Structure Plan 2003 takes forward the development strategy for the Cambridge Sub-Region. It identifies a number of strategic locations for housing and mixed-use development around Cambridge, which include land that is to be released from the Green Belt (Policy P9/2c). It identifies land east and south east of Trumpington and at Addenbrooke's for a major urban extension to Cambridge. This lies entirely within Cambridge City.
- C1.3 Trumpington West is not a proposal in the Structure Plan but includes recently vacated previously developed land which provides an opportunity to locate more of the Sub-Region's housing requirements in a highly sustainable location on the edge of the City. This site lies partly within South Cambridgeshire and partly within Cambridge City. The allocation in this Area Action Plan addresses only the south western part of the site which lies within South Cambridgeshire. Some greenfield land is included in the development proposals in order to secure unconstrained public access to the River Cam Corridor between Grantchester Road and Hauxton Mill – creating a Country Park and a corridor of public access following the River Cam from Hauxton Mill to Cambridge City Centre (see Policy CSF/5). This additional development will also enhance the appearance of the southern edge of the city by screening the Park & Ride site and adjoining warehouses from the wider countryside
- C1.4 It is envisaged that Trumpington West will be primarily a housing development with associated services and facilities as it is or will be well connected by public transport and cycleways to most employment areas in Cambridge.
- C1.5 Unlike some sites on the edge of Cambridge, Trumpington West is capable of early development provided that road access into the site can be secured

without adding disproportionately to delays and congestion on Hauxton Road. Car traffic generation can be minimised as Trumpington West is on a public transport corridor into the City, served by Park and Ride and will also be served by the proposed Guided Busway and is well connected to the rest of Cambridge by cycleways.

- C1.6 As well as bringing forward additional services as part of this development, Trumpington West would be well related to existing facilities in Trumpington. There will also be a need to consider its relationship with any enhanced services and facilities which arise as a result of the developments to the east and south-east of Trumpington. As any development at Monsanto would be partly in Cambridge City and partly in South Cambridgeshire, the two Councils will establish what level of local services would be appropriate.

C2 THE SETTING OF THE CAMBRIDGE SOUTHERN FRINGE

POLICY CSF/4 The Revised Cambridge Green Belt

The Cambridge Green Belt is revised as shown on the Proposals Map to provide for development at Trumpington, Addenbrooke's Hospital and The Bell School.

The purposes of the revised Green Belt in the Cambridge Southern Fringe Area Action Plan are to:

1. Ensure that the development at Trumpington and Addenbrooke's Hospital / The Bell School does not detract from the **character and** setting of Cambridge;
2. Ensure that Cambridge will not merge with any of the surrounding villages;
3. Improve the character of the immediate setting of Cambridge, minimising any adverse visual or landscape impacts of development on the surrounding area including the setting and character of the surrounding settlements, in particular the closest villages of Great Shelford, Stapleford, Little Shelford and Hauxton;
4. Provide opportunities for outdoor recreation and public access to the open countryside close to Cambridge.

C2.1 The Structure Plan sets a context for the review of the Green Belt (Policy P9/2b). It sets out a number of criteria to guide this process, including the need to retain within it any areas required to maintain the purposes of the Green Belt, to provide separation between existing settlements and any urban expansion, and to ensure the protection of a Green Corridor linking from the wider countryside to Cambridge City centre following the route of Hobson's Brook.

C2.2 There has been a Green Belt around Cambridge since the 1960's. The purpose of the Cambridge Green Belt as a whole is to:

- Preserve the unique character of Cambridge as a compact, dynamic city with a thriving historic centre;
- Maintain and enhance the quality of its setting;

- Prevent communities in the environs of Cambridge from merging into one another and with the city.

- C2.3 Within Cambridge City, the site for Trumpington East (Clay Farm and Showground) is generally contained by clear physical boundaries – Hobsons Brook and the northern boundary of the Shelford Camping and Caravanning Club site.
- C2.4 Also within the City, land at Addenbrooke’s Hospital is well contained in the west by the mainline railway, but there are no clear southern boundaries. However, as land is only proposed in the Structure Plan to be removed from the Green Belt to allow for development of the Addenbrooke’s 2020 vision, the Green Belt boundary follows the District boundary and the boundary of The Bell School site shown in the Cambridge City Local Plan to ensure that development will not encroach upon the southern setting of Cambridge including Cambridge’s historic water source at Nine Wells.
- C2.5 ~~The Green Belt boundary at Trumpington West broadly follows a concrete track which is approximately 125 metres beyond the previously developed part of the site and which generally marks a break in slope towards the river and to the south provides a boundary beyond the Park & Ride site. The Green Belt boundary departs slightly from this landscape feature in order to minimise the impact of development to the southwest by following the break in slope towards the river and to secure sufficient development to provide a riverside Country Park (see Policy CSF/5).~~
The Green Belt boundary at Trumpington West abuts the western and southern built edge of the development. This development edge relates to the contours of the site, existing features associated with the previous use of the site, the enhanced River Cam corridor, the southern gateway to Cambridge and strategic views across the landscape towards Trumpington and Cambridge beyond. It provides a Green Belt boundary and community park that will protect and enhance the quality and purpose of the remaining green belt land.

C3 ENHANCING LANDSCAPE, BIODIVERSITY, RECREATION AND PUBLIC ACCESS IN THE CAMBRIDGE SOUTHERN FRINGE

POLICY CSF/5 Landscape, Biodiversity, Recreation and Public Access

Planning permission for development in the Cambridge Southern Fringe will include a planning obligation requirement for contributions to the implementation of an integrated landscape, biodiversity, recreation and public access enhancement strategy which will be compatible with long term agricultural production to create enhanced gateways into the city and will comprise:

1. Cambridge Road / Shelford Road to Babraham Road
 - a. New beech hangars on suitable knolls, hilltops and scarp tops;
 - b. Management and creation of chalk grassland;
 - c. Management of existing shelter belts;
 - d. New mixed woodlands and shelter belts;
 - e. Creation of a landscape corridor along Hobson's Brook;
 - f. Reinforcement and planting of new hedgerows;
 - g. Roadside landscaping;
 - h. New footpaths, cyclepaths and bridleways creating routes through the area and linking to [WandleburyWandlebury Country Park](#) /The Magog Down.
2. Hauxton Road to the River Cam
 - i. The creation of a Country Park, comprising new meadow grassland, to the east of the River Cam, both north and south of the M11, lying between the river and the concrete track which marks the edge of the river valley and which runs from Grantchester Road to Hauxton Mill (Trumpington Meadows Country Park);
 - j. Tree planting alongside the Hauxton Road approach to Cambridge;

- k. Hedgerow planting on field boundaries in the agricultural land between Hauxton Road and the Trumpington Meadows Country Park;**
- l. New footpaths, cyclepaths and bridleways creating routes through the area and linking Hauxton Mill to Grantchester Road;**
- m. Measures to protect and enhance wildlife habitats, including managing public access to the river banks;**
- n. Noise attenuation on the northern side of the M11 through the creation of new landscape features which are compatible with the river valley character.**

C3.1 The scale of development in the Cambridge Southern Fringe both within Cambridge City and South Cambridgeshire will require substantial mitigation measures over a wide area of countryside to the south of the built-up area to mitigate the impact of development. In addition, the Cambridgeshire Structure Plan requires that major new developments adjoining the countryside include proposals for:

- Informal leisure and recreation, including Country Parks, and routes for walkers, cyclists and horse riders (Policy P4/2);
- Conserving and enhancing biodiversity (Policy P7/2);
- Maintaining and enhancing the character and conservation value of urban fringe areas, including improving public access to the countryside (Policy P7/5).

C3.2 English Heritage's Historic Landscape Characterisation database will provide useful guidance on the suitability of landscape improvements. The County Council's Right of Way Improvement Plan will provide the basis for the new footpaths, cyclepaths and bridleways for which contributions will be required from development.

Shelford Road / Cambridge Road to Babraham Road

C3.3 The Cambridge Southern Fringe between Shelford Road / Cambridge Road and Babraham Road is mainly a chalklands character area comprising a rolling topography which rises gently towards the Gog Magog Hills with a spur of high ground reaching towards the city between Babraham Road and Great Shelford / Stapleford villages. This landscape is broad in scale and offers uninterrupted views from the Magog Down in the south across large arable fields where enclosure is limited to occasional trimmed thorn hedges,

shelter belts and hilltop copses. As recently as the 19th century sheep grazing was the dominant agricultural activity. Remnant chalk grassland does remain, but is mostly associated with road verges and golf courses which have increasingly changed the appearance of the landscape and have further limited general public access to the countryside.

C3.4 The Area Action Plan is bounded to the south by The Magog Down and ~~Wandlebury~~Wandlebury Country Park which are very popular for public enjoyment of the countryside close to Cambridge. Unfortunately, public access to these areas other than by car is very difficult. There are no continuous footpaths, cyclepaths or bridleways from Cambridge or Great Shelford and Stapleford villages. Permissive footpaths and a Sustrans cycleway have been created linking Great Shelford to Cambridge along the route of the mainline railway and extending / completing the network of footpaths / cyclepaths / bridleways to the Magog Down / ~~Wandlebury~~Wandlebury Country Park will ensure that both the new residents of Trumpington and the wider public will benefit from development in the Cambridge Southern Fringe.

C.3.5 The landscape is dominated by the major complex of buildings at Addenbrooke's Hospital where further major development is proposed. Development at Addenbrooke's Hospital will therefore contribute to these networks through the extensive off-site landscape mitigation measures that will be required for the new hospital and research buildings. If any balancing ponds associated with the Addenbrooke's Link Road must be located in this sweep of countryside they will be landscaped to complement the character of the area and be incorporated into the recreation strategy.

Hauxton Road to the River Cam

C3.6 Trumpington West is located on the eastern edge of the valley of the River Cam at the boundary of two landscape character areas – the Western Claylands and the Chalklands which typify much of the remainder of the Cambridge Southern Fringe. The river valley extends as far as Cambridge city centre along Grantchester Meadows, Sheep's Green and Laundress Green where there is extensive public access to the meadows and pastures alongside the river. To the south of Grantchester, public access to the river extends no further than Byron's Pool.

C3.7 The landscape between Hauxton Road and the River Cam is made up of a broad sweep of open agricultural land where there are no hedgerows or trees stretching down to the wooded line of the river. This large area of land is crossed by the M11 and bisected by a concrete agricultural track which runs parallel to Hauxton Road which broadly marks the edge of the river valley.

- C3.8 Whilst there are fine views of Trumpington Church, this southern approach to Cambridge is currently dominated by the M11 junction, park & ride site and large warehouse buildings. Development will improve the character of this edge of Cambridge and the setting of this part of the city by landscaping the land between Grantchester Road and Hauxton Mill and providing public access to the countryside by the completion of a meadowland corridor which will extend from Hauxton Mill into Cambridge city centre.
- C3.9 As this is a new urban extension with a significant population, it will be important that residents have the opportunity to connect with the surrounding countryside. With the compact form of the urban extension, the countryside will be relatively close to the whole development and should be reachable on foot and certainly by bicycle.
- C3.10 ~~The County Council, in partnership with the District and City Councils, has undertaken a study of "Strategic Open Space". This is a higher order facility which serves a wider catchment and has a different purpose to local public open space and is of more than local significance. A standard will be identified for Strategic Open Space, and also the appropriate contribution towards additional Strategic Open Space that should come forward from developments, including Cambridge Southern Fringe. This will be detailed in the Planning Obligations Supplementary Planning Document. The development will be required to contribute towards provision of Strategic Open Space at a standard of 5.1ha per 1000 people. Strategic Open Space provides more than a local function and spaces are generally larger, more varied, and provide a different visitor experience to village open spaces.~~
- C3.11 It is generally recognised that Cambridgeshire is deficient in this type of open space. As a major new community, Cambridge Southern Fringe will itself create a need for a Strategic Open Space facility and it will be important to ensure that its substantial population has good access to the countryside. ~~Wandlebury/Wandlebury Country Park~~ and the Magog Down which border the Cambridge Southern Fringe are already over-used and additional countryside recreation areas will be needed as a result of the development in Cambridge.
- C3.12 This is likely to be translated into a need for areas of open access where people can also find the facilities which would enable them to experience informal countryside leisure activities. Such facilities could include a visitors' centre, areas for picnicking, kick about areas, kite flying and so on, as well as supporting facilities such as car and cycle parking, toilets, etc. Such areas are normally defined as country parks
- C3.13 The Green Corridor running along the river to the west of the development and running into the City would have potential to contribute towards strategic open space needs. The creation of a country park adjoining the development is proposed to provide this informal countryside recreation

function. A country park in this location will be well related to the main body of Cambridge.

- C3.14 Footpaths, cycleways and bridleways through the Country Park will link from Trumpington West to Hauxton Mill in the south and provide a network of routes on the land between Grantchester Road, Hauxton Road and the River Cam.

D TRUMPINGTON WEST**D1 THE STRUCTURE OF TRUMPINGTON WEST****POLICY CSF/6 The Structure of Trumpington West****Main Land Uses**

1. High quality, high density housing accessible to services, facilities and employment in Trumpington village centre and other local centres;

Other Services, Facilities and Infrastructure

2. Community services and facilities, leisure, arts and culture focused on Trumpington village centre to improve the range and quality of services and facilities available locally;
3. Sports and recreation facilities to serve the needs of the new community living at Trumpington West;
4. Small scale B1 employment development;

Transport

5. High quality infrastructure for non-car modes providing a network of footpaths and cycleways through the development to encourage sustainable travel;
6. Cycle and footpath networks which include a focus of movement towards Trumpington Park & Ride, including proposed Guided Bus services, and Trumpington village centre;
7. Two points of road access to Hauxton Road;

Character, Design and Landscape

8. The Green Belt boundary will be defined by high quality built development fronting directly onto the countryside with vehicular access garden space at the rear or concealed from view from the countryside and with a strategic landscape buffer adjoining the southern development edge;
9. Development fronting the River Cam will be no higher than two storeys and will be varied in orientation and siting to create a low key/informal/varied residential edge to development;

10. Development facing the M11 will be no higher than four storeys and will be made up of landmark residential buildings on this important approach to the city;

11. Green Fingers will penetrate the built-up area connecting the network of open spaces within Trumpington West to the surrounding countryside. These will be within walking distance for the community and will provide for wildlife and biodiversity;

12. Development will be integrated and linked sensitively into the urban fabric of Trumpington to preserve existing residential amenity.

- D1.1 Redevelopment of the former Plant Breeding Institute/Monsanto land to the west of Trumpington provides an opportunity to contribute towards meeting more of the Sub-Region's housing needs in a sustainable location on the edge of Cambridge city. Together with development at Clay Farm and Showground to the east of Trumpington, development at Trumpington West will allow for the balanced growth of the village keeping the present village centre at the heart of the expanded community.
- D1.2 The development provides an important opportunity to enhance the character of this part of Cambridge and the landscape setting of the city on this major approach road from the south. The approaches are currently across open fields which for agricultural research purposes have been cleared of hedgerows and trees. The approach currently affords long views of the Park & Ride site, warehouses and glasshouse complex at Trumpington.
- D1.3 The population of Trumpington West will live part within Cambridge City and part within South Cambridgeshire. Irrespective of the administrative boundary, the whole population will need to be served by an expanded Trumpington village centre and any other local centres that are included in the new development which is close by.
- D1.4 The development will overlook the River Cam corridor to the west from which it will be viewed as being at the top of a slope. Here a relatively low key approach with development no higher than 2 storeys will be most compatible with minimising impacts of development on the river corridor. The southern frontage of development facing the M11 will be more appropriate for 'landmark' treatment on the Hauxton Road approaches to Cambridge. Buildings up to 4 storeys in height will screen the warehouse buildings which will be retained north of the Park & Ride site and be more in keeping with the height of existing and proposed buildings on the eastern side of Hauxton Road.

- D1.5 The development of Trumpington West at a high density and with mixed uses will facilitate travel by foot, cycle and public transport, keeping car use to a minimum, thus putting less strain on the transport network. The transport network will be designed to maximise accessibility by foot and cycle to the frequent bus services departing from the Trumpington Park & Ride site.
- D1.6 Trumpington West will have sufficient variety in its built form to create a sense of different places with landmark spaces and buildings. This may include taller buildings and structures which could help to create an attractive skyline but which will also need to respect the historic skyline of Cambridge.

D2 HOUSING

OBJECTIVES

- D4/a To provide an adequate and continuous supply of land for housing to help meet the Structure Plan requirement set out in Policy P9/1;
- D4/b To provide high quality housing that makes best use of previously developed and other land with higher densities in locations close to a good range of services and facilities and public transport stops;
- D4/c To ensure the provision of a well integrated mix range of housing types and sizes, tenures including affordable housing, to meet the identified needs of all sectors of the community, including key workers.

POLICY CSF/7 Trumpington West Housing

Housing Supply

1. Trumpington West will provide an adequate and continuous supply of land for housing for at least 600 dwellings within South Cambridgeshire.

Density

2. At Trumpington West a range of densities will be provided following a design-led approach, including higher densities closer to Trumpington village centre and at public transport stops with lower densities on the sensitive outer edge facing the River Cam. Subject to the design-led approach and the need to provide a full range of house types and quality, the average net site density will be at least 50 dwellings per hectare.

House Types and Quality

3. There will be variety in the housing types provided at Trumpington West to offer choice. It will require imaginative and high quality developments which include apartments in the more accessible locations and close to services and facilities, town houses, terraced housing and family housing in forms which embrace the move towards more sustainable ways of living and will include a significant proportion of smaller homes.

Housing Supply

- D2.1 Trumpington West will provide an adequate and continuous supply of land for housing for at least 600 dwellings in South Cambridgeshire. The whole of Trumpington West, including land in Cambridge City, will bring forward approximately 1,200 dwellings.

Housing Density

- D2.2 Making best use of previously developed land minimising the amount of Green Belt land whilst providing a basis for sustainable living where services and facilities are nearby for most of its residents means achieving an average net density across the development as a whole of at least 50 dwellings per hectare. The amount of development which can be achieved will be design-led and seek to make the most effective and efficient use of land across the development as a whole.
- D2.3 Higher densities will be appropriate closer to Trumpington village centre and around public transport stops including the Trumpington Park & Ride site where a greater intensity and scale of buildings will also contribute to the design quality of Trumpington West by providing opportunities for landmark buildings and different character areas.
- D2.4 There will be areas that are relatively less accessible and where lower densities may be more appropriate and also to provide variety in character and more typical family housing. In particular, the urban edge overlooking the River Cam must be developed at lower densities and with lower building heights in order to maintain the rural character of the river valley.

House Types and Quality

- D2.5 In order to meet the need for smaller dwellings in the area and to respond to the density requirements for Trumpington West, a variety in dwelling types will need to be provided. This will help provide interest in the character and design of Trumpington West. This will include modern apartments closer to Trumpington village centre and could be included as part of the 'landmark' buildings facing the M11. Elsewhere imaginative use of town houses, terraces and other forms of high quality but higher density housing types will prevail. In the interests of providing a range of housing at Cambridge Southern Fringe, it would also be desirable for land to be made available at Trumpington West for an element of self-build projects.

Housing Mix

D2.6 Policy HG/2 of the Development Control Policies DPD sets out targets for housing mix that seek to ensure that developments provide a mix of housing sizes that address the high level of need for smaller 1 and 2 bedroom homes in the Cambridge area. For many years, the market in South Cambridgeshire has been providing a high proportion of larger properties of 4 bedrooms or more, at the expense of smaller properties. The district wide targets aim to redress this imbalance, whilst at the same time being mindful of the need to create balanced communities. Affordable housing should be of an appropriate mix to respond to identified needs at the time of the development, in accordance with HG/3. Market properties should provide:

1. At least 50% of homes with 1 or 2 bedrooms; and
2. Approximately 25% of homes with 3 bedrooms; and
3. Approximately 25% of homes with 4 or more bedrooms;

unless it can be demonstrated to the satisfaction of the District Council that a different mix would better meet local needs. As a key component of the housing strategy for South Cambridgeshire, these district wide policies will apply to Trumpington West.

Affordable Housing

D2.7 Providing substantially more affordable housing in and close to Cambridge is fundamental to the growth area strategy for the Cambridge Sub-Region. This is necessary to sustain the growth of the local economy and to ensure that local people are not priced out of the housing market by economic success. Affordable housing is addressed in the Housing section of the Core Strategy, which sets out affordable housing policy district wide, having regard to the findings of the Council's 2002 Housing Needs Survey (Final Report June 2003), carried out by Fordham Research. Policy HG/3 requires approximately 50% of the dwellings for which planning permission may be given to be affordable.

D2.8 Consistent with the Core Strategy, it is envisaged that the indicative mix of affordable housing at Trumpington West is likely to be:

1. Approximately 30% social rented; and
2. Approximately 20% intermediate housing, including for Key Workers;

giving a total of 50% affordable housing, unless it can be demonstrated that the local circumstances suggest a different mix would better meet local needs and help achieve a balanced and sustainable community profile. Key

Worker housing at Trumpington West should be targeted towards meeting the staffing needs of Addenbrooke's Hospital.

- D2.9 The District Council will prepare a Travellers' Policy Development Plan Document which will include policies and proposals for the needs of travellers, including site requirements, which may include provision at Trumpington West. It will be informed by a Sub-Regional Travellers' needs survey. The Document is provided for in the Council's Development Plan Scheme
- D2.10 To ensure that Trumpington West develops as a sustainable community, affordable housing will be distributed through the development in small groups or clusters, with the appropriate cluster size being determined having regard to the location within the development e.g. village and local centres.

D3 EMPLOYMENT

OBJECTIVES

- D3/a To provide a part of the labour force for Cambridge and its locality.**
- D3/b To provide small-scale local employment, as part of a development with an appropriate mix of uses.**

POLICY CSF/8 Employment

Development at Trumpington West will include provision for small-scale B1 employment development.

- D3.1 Cambridgeshire Structure Plan 2003 does not identify the Southern Fringe as a strategic employment location. Its location close to Addenbrooke's, and accessibility to Cambridge as a whole, provides an opportunity to provide housing and redress the current housing / jobs balance.
- D3.2 Providing some opportunities for small scale employment will provide local job opportunities and add to the overall sustainable mix of services and facilities.
- D3.3 Employment development at Trumpington West will be subject to Policy ET/1 of the Development Control Policies DPD that reserves employment land for development that can demonstrate a clear need to be located in the area, to serve local needs, or contribute to the continued success of the Cambridge Sub-Region.

D4 COMMUNITY FACILITIES, LEISURE, ARTS AND CULTURE INCLUDING COMMUNITY DEVELOPMENT

OBJECTIVES

- D4/a To support the early establishment of a successful new community at Trumpington;
- D4/b To establish a strong feeling of community ownership of facilities and community space;
- D4/c To ensure provision of appropriate community services and facilities, leisure, arts and cultural facilities which would reasonably be expected to be found in the expanded Trumpington;
- D4/d To prepare appropriate management strategies to ensure high quality, robust and effective implementation, adoption and maintenance of community facilities, leisure, arts and culture.

POLICY CSF/9 Community Services, Facilities, Leisure, Arts and Culture

Publicly and Commercially Provided Services and Facilities

1. A detailed assessment of the need for community services, facilities, leisure, arts and culture at Trumpington West and the remainder of Trumpington together with a strategy for the delivery of the identified need will be prepared in consultation with service providers and stakeholders and submitted with the first planning application for development at Trumpington West.
2. The development at Trumpington West will make a proportional contribution to the provision of the full range of community services and facilities, health and social care facilities, leisure, art and culture identified in the strategy.
3. The development will provide for innovative means of provision, including opportunities for joint provision and co-location to provide services which best meet people's needs, are accessible to all and which are cost efficient to service and facility providers.
4. Any planning permission granted for the development of Trumpington West will include a planning obligation requiring the phased delivery of community services, facilities, leisure, arts and culture, with the provision of key services and facilities for

early phases of the development, including the provision of Community Development Workers.

Location of Services and Facilities

5. **Services and facilities will be provided in accessible locations in accordance with a masterplan for Trumpington West. If such locations lie within Cambridge City, the planning obligation for Trumpington West will include a requirement for contributions to the provision of off-site services and facilities.**

Public Art

6. **Provision will be made for public art in Trumpington West to help provide a sense of place and distinctiveness. A strategy for public art will be prepared, with the appointment of a lead artist(s) at an early stage in the planning and design of development.**

Publicly and Commercially Provided Community Services, Facilities, Leisure, Arts and Culture

- D4.1 The development of Trumpington West in the context of the expansion of Trumpington as a whole provides the opportunity for community services and facilities providers to take advantage of emerging best practice in order to ensure that all residents of Trumpington secure the greatest benefit from development. The principles that will guide the location of services and facilities in Trumpington West are:
- **Accessibility** to the people who will be seeking services and facilities;
 - **Combining** or linking services and facilities which will be mutually supportive and convenient for the public;
 - **Concentrating** services and facilities in a few locations order to ensure that a journey for one purpose provides the opportunity to serve another purpose, reducing the number of journeys, and providing opportunities for community interaction.
- D4.2 Trumpington village centre, within Cambridge City, will be the main focus of services and facilities and will be linked to Trumpington West by direct and convenient footpath and cycleway networks which will provide safe and convenient public access.
- D4.3 Public service providers in the Cambridge Sub-Region are investigating opportunities for closer integration of their services to offer a better overall service to the public and to make the best use of land, buildings and other

resources. Co-location provides substantial savings, operational efficiency and better customer service. This will be achieved by sharing buildings, car parks and other facilities such as receptions.

- D4.4 Before planning permission will be granted for Trumpington West, the needs of the development must be determined in accordance with detailed assessments for the whole of Trumpington, prepared in consultation with service providers. Some of this work will be carried out in partnership with Cambridgeshire Horizons. This will lead to the preparation of strategies setting out the services and facilities required of the development and a phasing plan for the timely delivery of publicly provided community services, facilities, leisure, arts and culture, including the provision of key services and facilities for early phases of the development. This will form the basis of a planning obligation. The development will pay for or contribute to the cost of all of services or facilities which would not have been necessary but for their development even where this would confer some wider benefit on the community. Only if extra provision is made because it is desirable to serve the wider community would it be appropriate that funding from other sources would be required.
- D4.5 In addition to the provision of services and facilities, provision will be needed for professional Community Development Workers to help establish a vibrant and sustainable community from the outset of development and also to provide support mechanisms in response to local need. This will involve a Community Development Strategy outlining roles, partnership working and the professional people needed to help establish the new community. This work will include support to help establish good communication and information for new residents, establishment of new groups, support mechanisms, sports clubs and community events. The needs of young people should be considered at the earliest stage of development, including the employment of youth workers. Early and ongoing development work can help establish a strong feeling of community ownership of facilities and community space.
- D4.6 Not all services and facilities will be provided by the public sector. A number of facilities at Trumpington will be provided commercially e.g. public houses, indoor sport, health and fitness clubs etc. Some of these would be considered essential to the development of a successful community and there will need to be some certainty that they will be capable of being provided.
- D4.7 The priorities for commercial leisure provision will be considered in consultation with potential service providers and neighbouring local authorities in order that deficiencies and priorities can be identified. The needs of the development will be identified as part of the assessment and strategy referred to above for publicly provided services and facilities.

The Range of Services, Facilities, Leisure and Community Infrastructure

- D4.8 The range of services and facilities and community infrastructure that will need to be provided at Trumpington West is still being investigated by the service providers. Within the development it has already been established that the provision of a one form entry primary school will be required. The development will also need to make contributions towards the provision of a new secondary school within the Cambridge Southern Fringe development as a whole.

Location of Services and Facilities

- D4.9 Those services and facilities which will primarily serve Trumpington West could be located within the development, but those services and facilities which will serve Trumpington as a whole will be located in Trumpington village centre and funded by contributions secured by a planning obligation.

Management of Community Services and Facilities

- D4.10 It is important that not only are the community services and facilities needed by Trumpington provided, but that they are properly and effectively managed and maintained if they are to provide high quality facilities for the community in the long term. It is also important that a feeling of community ownership is developed for all community facilities and that they are managed to ensure accessibility by all. The strategy for publicly provided community services and facilities will therefore need to include appropriate management strategies to ensure that high quality, robust and effective implementation, adoption and maintenance arrangements are in place ahead of any planning permission being granted. This is dealt with in the Phasing and Implementation policies.

Public Art

- D4.11 Provision should be made for public art in the Cambridge Southern Fringe to help provide a sense of place and distinctiveness. Policy SF/8 of the Core Strategy sets out the Council's policy to see the provision of public art in larger developments. The provision of quality visual arts and crafts as part of new developments can bring social, cultural, environmental, educational and economic benefits, both to the new development and the community at large. It is considered particularly important that public art is integrated into the overall design of the urban extension and functional elements e.g. lighting, landscape, street furniture, floor designs and signage as well as landmark works such as a sculpture.

- D4.12 The District Council has adopted a Public Art policy that provides guidance for developers implementing large-scale developments, including residential and commercial. It encourages developers to allocate a proportion of the budget for the implementation of a carefully considered public art scheme.
- D4.13 Whilst the Area Action Plan does not prescribe a level of public art provision, it does require that a strategy for public art is prepared, with the appointment of lead artists at an early stage in the planning and design of the development, and a significant level of provision for public art will be required as part of any proposals.

D5 TRANSPORT

OBJECTIVES

- D5/a To develop an improved rights of way network to support sustainable transport, recreation and health, and connect the development to Cambridge, neighbouring villages and the open countryside.
- D5/b To provide attractive, direct, safe and convenient walking routes within the development linking homes to public transport and the main areas of activity nearby.
- D5/c To provide a highly accessible network of safe and convenient cycleways, segregated from other modes where appropriate and secure cycle parking facilities.
- D5/d To link development to the main road network whilst minimising the impact of traffic generation on nearby communities.
- D5/e To identify the appropriate stages in the development when transport infrastructure will need to be provided.

ROAD INFRASTRUCTURE

POLICY CSF/10 Road Infrastructure

Trumpington West

1. ~~Planning permission for development at Trumpington West will not be granted until it has been demonstrated by the applicants that there will be sufficient highway capacity on Hauxton Road to serve all stages of the development such that morning peak traffic queuing outside of school holidays between Shelford Road and the M11 would not be materially worse than conditions prevailing at the time of submission of the first planning application~~
Planning permission for development at Trumpington West will not be granted until it has been demonstrated by the applicants that there will be sufficient highway capacity on Hauxton Road to serve all stages of the development such that morning peak traffic queuing between Shelford Road and the M11 would not be materially worse than conditions prevailing at the time of submission of the first planning application;
2. The development will be served by two road accesses onto Hauxton Road, one of which will be aligned so that it will connect

to the Hauxton Road / Addenbrooke's Link Road junction which will lie in Cambridge City Council's area;

3. Traffic management measures will be funded by the development to minimise traffic impacts on nearby communities and users of Hauxton Road;

Addenbrooke's Access Road

4. All new infrastructure linking the urban extension to the existing network will have appropriate landscaping to ensure they integrate into the existing landscape character.

Road Infrastructure & Road Access

- D5.1 Development at Trumpington East / Addenbrooke's requires that a new road is provided to link Hauxton Road to Addenbrooke's Hospital which will also serve the new residential areas east and south-east of Trumpington and the ~~Medical Research Park~~ 'Cambridge Bio-Medical Campus' at Addenbrooke's.
- D5.2 At Trumpington West two accesses will be required onto Hauxton Road, the southern one leaving Hauxton Road at the same point as the new Addenbrooke's Link Road in order to minimise delays on Hauxton Road.

Mitigating Traffic Impact

- D5.3 Access roads and junction layouts will be designed and located to minimise the impact of traffic on local residents.

ALTERNATIVE MODES

POLICY CSF/11 Alternative Modes

1. Adequate provision for alternative non-car transport modes will be required to serve all stages of development.

Public Transport

2. All development will be within 400m easy walking distance of a High Quality Public Transport bus stop.

Cycling and Pedestrians

3. There will be a network of dedicated, segregated, high quality, safe, direct, connected and convenient rights of way, including

cycle, pedestrian and horse riding routes, both within the development and connecting with the rest of Cambridge, surrounding villages, and the wider rights of way network. These routes will be complemented with quality infrastructure including signing, seating and lighting where appropriate. Secure cycle parking will also be provided in accordance with Cambridge City Council's cycle standards as set out in Appendix 2.

Car Pooling

- 4. Car parking will be provided in accordance with the maximum standards as set out in the Cambridge City Local Plan as set out in Appendix 1. Car pooling will be encouraged to minimise the amount of land given over to car parking. This must be explored through the Transport Assessment and Travel Plan.**

Public Transport

- D5.4 High Quality Public Transport (HQPT) will form a fundamental part of making the new development sustainable and minimise its impact on the environment. All development will be within easy walking distance of a bus stop (no more than 400m walking distance, equating to a 5 minute walk).
- D5.5 The majority of Trumpington West will be within 400m of Trumpington Park and Ride site with a frequent service into Cambridge City Centre along Trumpington Road. There is also a frequent shuttle service between the Park and Ride site and Addenbrooke's Hospital, which also serves Long Road Sixth Form College. Once the Guided Busway is developed, it will also provide direct links to Addenbrooke's Hospital, Cambridge Railway Station and the main centres of attraction within Cambridge. The majority of northern parts of the development will be within 400m of a stop on the High Quality Public Transport Route along the Hauxton Road into Cambridge.

Cycling and Pedestrians

- D5.6 Cycling has the potential to substitute for short car trips, particularly for journeys under 5km. Cambridge Southern Fringe represents a major opportunity to connect the development to the rest of the City by bicycle. In order to achieve a high level of cycle use there will need to be a network of dedicated high quality cycle routes.
- D5.7 Rights of way routes will be provided to:
- Integrate with the existing network serving Cambridge City Centre and other nearby centres of attraction, including Addenbrooke's Hospital;

- Surrounding villages within a 5km radius including; Barton, Grantchester, Harston, Haslingfield, Hauxton, Great and Little Shelford, Newton and Stapleford.
- The wider rights of way network of byways, bridleways, cycleways and footpaths.

D5.8 Routes will be segregated, high quality, safe, direct, connected and convenient for all users, including the less able, such as the partially sighted, hearing impaired, and wheelchair users. These routes will also be complemented with quality infrastructure, such as signing, seating and lighting (of a level appropriate to the location). Secure cycle parking will be provided to serve the development. As an urban extension to Cambridge, it would be appropriate for the City Council's standards to cover the entire Cambridge Southern Fringe development. These are set out in Appendix 1.

Car Parking

- D5.9 It will be important to establish a culture within the development which accepts that whilst the car has an important role in providing for some journeys, for most journeys from the development to other locations in Cambridge it should be the least preferred option.
- D5.10 In part, this will be influenced by the scale of provision of car parking in residential areas. There will be a need for a certain level of car parking to enable people to park without causing social or amenity problems. This will include making adequate and convenient provision for disabled parking.
- D5.11 As an urban extension to Cambridge, it would be appropriate for the City Council's standards to cover the entire Cambridge Southern Fringe development. The standards which would be applied would those which pertain to those areas of the City outside the Controlled Parking Zone (CPZ), as set out at Appendix 1.
- D5.12 In addition, given the sustainable location and that it will be served by HQPT, opportunities for car pooling will be explored.
- D5.13 Car parking will be designed to minimise the impact on the urban form, in terms of visual impact, lighting, and should design out crime.

Travel Plans

Employers in Trumpington West will be required to prepare travel plans to show how they intend to ensure that travel to work by car by their employees is not encouraged, and travel by other modes is positively promoted.

APPENDIX 1 CAR PARKING STANDARDS

INTRODUCTION

1. The standards set out in this document define the appropriate levels of car parking for various types of development. These levels should not be exceeded but may be reduced where lower car use can reasonably be expected.
2. Car parking standards are defined for most land uses, however for some land use types whose transport patterns are difficult to generalise (for instance training centres and museums), it is not possible to establish general parking standards. For these very specific uses, car parking provision will be approved on merit, on the basis of a Transport Assessment and negotiation.

Application of the Standards

3. Parking for disabled people will be required for their exclusive use at all sites in accordance with Section 6. It should be noted that under the Disability Discrimination Act, it is the responsibility of site occupiers to ensure that adequate provision is made for the needs of disabled people.
4. Levels of car parking below the stated levels, including car-free developments, will be supported where:
 - The site has good access to HQPT bus services, pedestrian and cycle routes; and
 - For residential developments, the site is within close proximity to shops and other local services; and
 - Reduced car ownership / use can be encouraged by provision of car pooling / car share clubs; and
 - Reduced car ownership / use can be enforced by means of a planning condition or obligation, on-street controls, or other methods to ensure that increased on-street parking pressure will not occur.
5. Some developments may have an exceptional need for vehicle parking in addition to that specified in the standards. Where this can be shown to be necessary, either by the applicant or the Local Planning Authority, such parking should be provided in addition to that stated in the following sections. Such additional parking may be necessary where there will be shift-working staff and non-car travel options are not viable, for example. Preliminary discussions and Transport Assessments will play a key role in demonstrating the need for any such additional parking.

6. Where reference is made to staff numbers, this relates to the typical number of staff working at the same time.

RESIDENTIAL USES

Residential Dwellings

7. Table 1 gives the car parking standards for residential uses. In addition to these ratios provision should be made for visitors at the ratio of 1 space for every 4 units, provided that off-street car parking spaces resulting from the development would not be above 1.5 car parking spaces per dwelling, the maximum level permitted by PPG3. Visitor parking should be marked appropriately.

Table 1: Residential Development

Dwelling Size	Standard
Up to 2 bedrooms	1 car parking space
3 or more bedrooms	2 car parking spaces

Other Residential Developments

8. Table 2 sets out the car parking standards for residents, visitors and staff. In addition, developers will need to demonstrate that their proposal provides for any particular exceptional needs, such as service vehicles.

Table 2: Other Residential Developments

Type of Development	Standard
Guest houses and hotels	2 spaces for every 3 bedrooms and 1 space per resident staff.
	Off-street coach parking to be conveniently located in relation to developments of 40 or more bedrooms.
	Where there are rooms specifically designed for people with disabilities, disabled parking of at least 1 space for each room so designed should be provided.

Nursing homes	1 space for every 8 residents, 1 space for every 2 members of staff
	Provision must be made for ambulance parking.
Retirement homes / sheltered houses	1 space per 4 units, 1 space for every 2 members of staff.
	Provision must be made for ambulance parking. A secure, covered, enclosed area with electricity sockets needs to be provided for electric buggies.
Student residential accommodation where proctorial control or alternative control on car parking exist	1 space per 10 bed spaces or an area for both pick-up/drop-off at the end of term time and visitor parking.
	1 space per resident warden / staff.
	Where there are rooms specifically designed for people with disabilities, disabled parking of at least 1 space for each room so designed should be provided.
Student residential accommodation where proctorial control does not exist or where control exists but the development will house conference delegates	1 space per 3 bed spaces.
	1 space per resident warden / staff
	Where there are rooms specifically designed for people with disabilities, disabled parking of at least 1 space for each room so designed should be provided. Controls will be necessary to limit use of car parking outside conference times.
Residential schools, college or training centre	On merit
	Where there are rooms specifically designed for people with disabilities, disabled parking of at least 1 space for each room so designed should be provided.
Hospitals	On merit

RETAIL, CULTURE, LEISURE AND SPORTS USES

9. Transport Assessments will play a key role in determining the optimal level of car parking, particularly for mixed-use developments and retail parks where linked trips might lead to a level of parking below the standards.
10. A picking up and dropping off point for taxis and mini-buses will need to be provided for uses in Table 4.

Table 3: Retail, Culture, Leisure And Sports Uses

Use	Standard
Food retail	1 space per 50 m ² GFA ¹ up to 1,400 m ² and 1 per 18 m ² thereafter, including disabled.
Non-food retail	1 space per 50 m ² GFA, including disabled.
Financial and professional services	1 space per 40 m ² GFA, including disabled car parking.
Food and drink takeaways	1 space per 20 m ² drinking / dining area, including disabled. 1 space for proprietor when resident.

Table 4: Assembly, Culture, Leisure And Sports Uses

Use	Standards
Museums, Exhibition venues	On merit
Sports & recreational facilities, swimming baths	2 spaces for every 3 staff, plus 1 space for every 4 seats, including disabled.
Cinema	1 space for every 5 seats, including disabled.
Stadia	1 space for every 15 seats, including disabled.
Places of assembly including, theatre, auditoria and concert hall	1 space for every 4 seats, including disabled and staff car parking.

Place of worship	1 space for every 8 seats, including disabled.
Public halls / community centres	1 space per 20 m ² of public space, including disabled

OFFICE USE

11. Access will primarily rely on public transport, cycling and walking.

Table 5: Business And Industrial Uses

Use	Standards
Offices, General Industry	1 space per 40 m ² GFA, including disabled
Storage	1 space per 100 m ² GFA, including disabled

NON-RESIDENTIAL INSTITUTIONS**Table 6: Non-Residential Institutions**

Use	Standards
Clinics and Surgeries	1 space for every professional member of staff plus 2 spaces per consulting room
Non-residential schools	2 spaces for every 3 staff.
Non-residential higher and further education	2 spaces for every 3 staff.
Crèches	2 spaces for every 3 staff.

PROVISION FOR PEOPLE WITH DISABILITIES

12. At least 5% of the total number of car parking spaces should be reserved for disabled people, rounded up to the nearest whole space. Where parking provision is below the Standards the required proportion of spaces reserved for disabled people will therefore be higher than 5%.
13. Higher ratios than the 5% given above may be required in some cases by the Local Planning Authority, for example at medical facilities, residential

care homes, community facilities and any other uses where a higher proportion of disabled users/visitors will be expected. It should be noted that provision at the above levels or any required by the Local Planning Authority does not guarantee that the requirements of the Disability Discrimination Act will be met, which is the responsibility of the building occupier or service provider.

14. Spaces for disabled people should be located adjacent to entrances, be convenient to use and have dimensions that conform to Part M of the Building Regulations. If it is impossible to accommodate car parking spaces within the site, disabled car parking spaces should not be located at a distance more than 100 metres from the site.
15. Disabled car parking spaces should be marked either 'disabled' or with a wheelchair marking.

APPENDIX 2 CYCLE PARKING STANDARDS

INTRODUCTION

1. The standards in the tables below set out minimum requirements in terms of cycle parking for new developments and changes in use.
2. In addition to the application of these standards, new developments will have to comply with the following principles:
 - Cycle racks or stands should conform to the design and dimensions as set out at the end of these standards.
 - For residential purposes cycle parking should be within a covered, lockable enclosure. For individual houses this could be in the form of a shed or garage. For flats or student accommodation either individual lockers or cycle stands within a lockable, covered enclosure are required. The cycle parking should be easily accessible and convenient to use.
 - Cycle parking for employees should be, in a convenient, secure location and where practical covered.
 - Short stay cycle parking, e.g. for visitors or shoppers, should be located as near as possible to the main entrance of buildings and covered by natural surveillance or CCTV. For large developments the cycle parking facility should be covered.
 - Reference to staff should be taken to mean the peak number of staff expected to be on site at any one time.
 - All cycle parking should be located to minimise conflicts between cycles and motor vehicles.
 - Some flexibility will be applied to applications where it can be demonstrated that strict adherence to the standards, for a multi-purpose site is likely to result in a duplication of provision.

Table 1: Residential Use

Type of Development	Number of Spaces
Residential dwellings	<ul style="list-style-type: none"> • 1 space per bedroom up to 3 bedroom dwellings • Then 3 spaces for 4 bedroom dwellings, 4 spaces for 5 bedroom dwellings etc. • Some level of visitor cycle parking, in particular for large housing developments
Guest houses and hotels	1 space for every 2 members of staff and 2 spaces for every 10 bedrooms
Nursing homes	1 visitor space for every 10 residents and 1 space for every 2 members of staff
Retirement homes/ sheltered houses	1 space for every 6 residents and 1 space for every 2 members of staff
Student residential accommodation	<ul style="list-style-type: none"> • 2 spaces per 3 bedspaces • 1 visitor space per 5 bedspaces
Residential schools, college or training centre	(as above)
Hospitals	On merit

Table 2: Retail, Culture, Leisure And Sports Uses

Type of Development	Number of Spaces
Food retail	1 space per 25 m ² GFA ¹ up to 1,500 m ² thereafter 1 per 75 m ²
Non-food retail	1 space per 25 m ² GFA up to 1,500 m ² thereafter 1 per 75 m ²
Financial and professional services	1 space per 30 m ² GFA to include some visitor parking
Food and drinks	1 space for every 10 m ² of dining area

¹ Gross Floor Area

Museums, Exhibition venues	1 for every 2 members of staff Visitors: on merit
Sports and recreational facilities and swimming baths	1 space for every 25 m ² net floor area or 1 space for every 10 m ² of pool area and 1 for every 15 seats provided for spectators
Places of assembly including cinema, theatre, stadia, auditoria and concert halls	1 space for every 3 seats
Place of worship, public halls and community centres	1 space per 15 m ² of public floor area

Table 3: Office Uses

Type of Development	Number of Spaces
Offices	1 space for every 30 m ² GFA to include some visitor parking
General industry	1 space for every 40 m ² GFA to include some visitor parking
Storage and other B use classes	On merit

Table 4: Non-Residential Institutions

Type of Development	Number of Spaces
Clinics and surgeries	2 spaces per consulting room and 1 space for every 3 professional members of staff
Non-residential schools	Cycle spaces to be provided for 50% of children between 5 and 12 and 75% of children over 12 years
Non-residential higher and further education	Cycle parking for all students using the site and 1 for every 2 members of staff
Crèches and Nurseries	1 space for every 2 members of staff 1 visitor space per 5 children

CYCLE PARKING DESIGN AND LAYOUT

Design Of Rack

3. A Sheffield Stand is acceptable but a rounded A design is recommended as it provides additional support, particularly for smaller bicycles.

Sheffield Stand:

Rounded A Stand:

Layout

4. This diagram shows the spacing required for cycle stands. There should be a 1200mm space between a double row of stands. All measurements shown are in millimetres.

High Capacity

5. For increased capacity racks can be arranged at alternative heights with the type of rack that holds the front wheel in place. These racks are only acceptable if a support post is provided between each rack to which the frame for the bicycle can easily be locked. This type of rack also ensures a straight row of bicycles which is useful where space is a premium.

D6 LANDSCAPE

OBJECTIVES

- D6/a To create within the urban area a pleasant and attractive external environment to contribute to local character and provide legibility to meet the needs of those living, working and visiting the urban extension;
- D6/b To ensure a high degree of integration between green areas within the urban extension for wildlife and people;
- D6/c To create a network of green spaces within the urban extension which integrate well with the development, contribute to legibility, are pleasant and attractive;
- D6/d To enable landscape areas to provide an environment suitable for the mitigation of any adverse impact on wildlife and to maximise benefits to wildlife in order to increase biodiversity;
- D6/e To enable landscape areas to contribute to the informal recreation needs of those living at, working in, and visiting the urban extension;
- D6/f To ensure that any alterations to topography within the urban extension are appropriate to local landscape character;
- D6/g To make the best use of the existing tree resource on site as a setting for the development;
- D6/h To develop an appropriate management strategy to ensure high quality, robust and effective implementation, adoption and maintenance of the landscape areas.

LANDSCAPE PRINCIPLES

POLICY CSF/12 Landscape Principles

Landscape Strategy

1. A Landscape Strategy for Trumpington West must be submitted and approved prior to the granting of planning permission, **of a level of detail appropriate to the type of application**. It will be implemented as part of the conditions / planning obligations for the development of the new urban extension. The strategy will:

- a. Create a quality environment within the urban extension for residents, workers and visitors;
- b. Establish the principles for structural landscaping within and on the countryside edges of the urban extension;
- c. Ensure a high degree of connectivity between green areas within the urban extension;
- d. Create a network of green spaces within the urban extension which are pleasant and attractive and contribute to legibility;
- e. Enable the landscaped areas within the urban extension to provide an environment suitable to mitigate any adverse wildlife impacts and to maximise the benefits to wildlife thus increasing biodiversity;
- f. Enable the landscaped areas to contribute to the recreational needs of the urban extension;
- g. Make best use of and enhance existing tree and hedge resources as a setting for the development;
- h. Ensure that any alterations to topography within the urban extension are appropriate to local landscape character;
- i. Include appropriate management systems to ensure high quality, robust and effective maintenance of the landscape areas.

Treatment of Construction Spoil

2. ~~A Strategy for Construction Spoil will be required which will need to be approved by the Local Planning Authority prior to the granting of any planning permission. The Strategy will ensure Construction Spoil that spoil is retained on-site must be in a manner appropriate to the local topography and landscape character.~~

Existing Landscape Features

3. ~~In order to assist the creation of a mature landscape within the town at an early stage in the development existing landscape features on the Trumpington West site will be retained where they can make a significant contribution to the urban environment in order to assist in the creation of a mature~~

landscape within the urban extension at an early stage in its development.

Landscape Strategy

- D6.1 The Landscape Strategy for the areas outside of the built areas of Trumpington West is addressed in Part C: Site and Setting. This chapter considers the landscape within the built areas, including strategic landscaping on the countryside edges of the urban extension within the identified sites. It will be important for the landscape within the built-up area of Trumpington West to be determined at an early stage in the planning process in order to guide the development of the urban extension and to allow structural planting and landscaping to be implemented at the earliest opportunity. The landscape strategy will assist in delivering a quality environment to meet the needs of residents and visitors. Connections between the landscaped open spaces will add to their overall value for both people and wildlife. Effective maintenance and management is essential to the long term strategy. The level of detail required in a landscape strategy will be different at the outline and detailed planning application stages, with a strategy at the outline stage being more strategic in nature.
- D6.2 The landscaping of the edges of Trumpington West will be addressed through a variety of measures to integrate the urban extension into its surroundings and also to protect the amenity of existing residents surrounding the site and the new community of Trumpington West. This will include appropriate structural landscaping along the riverside and M11 facing edges of development.
- D6.3 In general, the structural landscaping areas and green fingers should be characteristic of Cambridge in terms of drainage, topography, species and habitats, and be robust and require minimum maintenance. Reference should be made to the Historic Landscape Characterisation database which shows the evolution of the landscape over time and where reinstatement of features in the landscape will assist in the reinforcement of local character.

Construction Spoil

- D6.4 There will be significant amounts of construction spoil generated by the removal of existing buildings and roads. The majority of this should be distributed over a wide area within the site to reinforce its flat and gently contoured character. There may be limited opportunities to form higher ground features, but only where this is consistent with the appropriate urban and landscape characters identified in the Strategic Masterplan, Strategic Design Guide and Landscape Strategies and provided that would not adversely affect visual amenity or the landscape.

Existing Landscape Features

- D6.5 The design of the urban extension should be guided by the need to incorporate any existing landscape features. In exceptional circumstances where this is not possible, every effort will be made to transplant existing trees to new locations within the development.

Management Strategy

- D6.6 The landscaping of Trumpington West will only be effective if it is managed to the highest standards. In order to achieve this, it will be necessary for all landscaped areas to be maintained by the same organisation. This will need to take into account the varying requirements of the different functions which open space has to perform. It will only be successful if the local communities using this open space are fully involved in its development and maintenance as key stakeholders. There will therefore be the need to develop appropriate management strategies to ensure high quality, robust and effective implementation, adoption and maintenance arrangements are in place ahead of any planning permission being granted. This is dealt with in the Phasing and Implementation policies.

LANDSCAPING WITHIN TRUMPINGTON WEST

POLICY CSF/13 Landscaping within Trumpington West

Green Fingers

- 1. A series of Green Fingers will be created into and through the urban area, which may be based on:**
 - a. Drainage infrastructure;**
 - b. Existing landscape features;**
 - c. New landscape character areas.**
- 2. They will have landscaping and biodiversity value and also perform a recreational function for both informal recreation and children's play. Public access will include provision for walking and cycling.**
- 3. Road and bus crossings through the Green Fingers will be designed to limit any safety implications for people and be low key in character to limit adverse affects on the landscape. Safe and appropriate crossing facilities for wildlife will also be**

provided, such as tunnels under roads and ditches alongside roads where appropriate

The Landscaping of the Built Environment

4. The built environment will be landscaped with high quality design, materials and planting; this will be addressed in the Strategic Design Guide required by the Local Planning Authority which will need to be approved **prior to the granting of any reserved matters applications or detailed planning consents prior to the granting of any planning permission.**

The Landscaping of Open Spaces

5. Open spaces which have a recreational or utility function will be landscaped to the highest quality and be sympathetic to the distinctive character of Trumpington West and local landscape character.

Green Fingers

- D6.7 A number of Green Fingers will penetrate into and through the urban area, drawing upon the character of Cambridge, and based on drainage infrastructure, existing landscape features and opportunities to create new landscaped character areas. As well as having a visual amenity, these will offer varied recreational opportunities and will also act as wildlife corridors. For all these functions it is important that they connect to other key internal open spaces within the urban extension and to the River Cam corridor, larger 'green' areas on the periphery and the surrounding countryside. Water will be a central feature of these Green Fingers thus enhancing this aspect of the character of the new urban extension.
- D6.8 These Green Fingers will offer landscape and biodiversity value as well as recreational use and will be accessed from areas of built development by footpaths and cycleways and connect to each other and with the surrounding countryside in order to maximise their value in creating a complete network.
- D6.9 In order that the Green Fingers can safely fulfil their landscape, recreational and biodiversity functions for both people and wildlife, the number of road crossings of these will be limited. Any crossings must be well designed and complement the local landscape character.

The Landscaping of the Built Environment

- D6.10 Within the urban area high quality streetscapes should be created through the use of attractive, durable materials which reflect the character of the locality and include sufficient practical space to incorporate green landscape elements, such as avenues and formal ornamental planting primarily in the public areas to create a varied and legible environment.

The Landscaping of Open Spaces

- D6.11 All open spaces should be designed and landscaped to a high standard and link to and integrate with other landscaped and amenity areas so that they contribute to the overall quality of the urban fabric of Cambridge.

LINKING TRUMPINGTON WEST TO ITS SURROUNDINGS**POLICY CSF/14 Linking Trumpington West to its Surroundings****Access Roads**

- 1. New roads linking the urban extension to the existing network will require landscaping which is consistent with local landscape character and which mitigates any adverse impact on the landscape. This will need trees to be planted in blocks beyond the highway boundary and in association with balancing ponds as well as planting trees and hedgerows along the highway boundary.**

Connecting to the Wider Landscape

- 2. The landscaped areas and Green Fingers within Trumpington West will be designed to connect to each other and to other green areas on the periphery of the urban extension including the country park and the wider countryside beyond to create a comprehensive green and landscaped network.**

Access Roads

- D6.12 It will be important to minimise any adverse landscape and visual impacts of the highway infrastructure, including any new road link to the A1309, and associated drainage areas including balancing lakes by means of appropriate tree and shrub planting and unobtrusive earth shaping. The new roads linking Trumpington West to the existing network should be appropriately landscaped consistent with the existing landscape character so that the roads and their landscaping do not appear as alien features.

Connecting to the Wider Landscape

- D6.13 The value of the landscaped areas and Green Fingers within the urban extension will be enhanced by their being linked together to form a network with the landscapes created on the periphery of the urban extension, in the country park and through to the wider countryside. Such landscaping should respect local landscape character.

D7 BIODIVERSITY

OBJECTIVES

- D7/a To achieve and maintain a thorough understanding of the existing biodiversity including raising public awareness.
- D7/b To minimise any adverse impact on existing species and habitats.
- D7/c To make use of existing features of ecological value to contribute to the creation and retention of key habitats within the new development and adjoining countryside.
- D7/d To maximise the biodiversity value of green spaces within developed areas and the urban area as a whole.
- D7/e To establish a high degree of connectivity between green areas within the development and the wider countryside.
- D7/f To provide for the management, maintenance, and monitoring of habitats.

POLICY CSF/15 Enhancing Biodiversity

Survey

1. Outline planning applications will be accompanied by a comprehensive ecological survey of flora and fauna:
 - a. For development at Addenbrooke's, Clay Farm, Showground and the Bell School, this will cover the land bounded by the Cambridge City boundary, Babraham Road, Granhams Road, and the edge of the built-up area of Great Shelford;
 - b. For development at Trumpington West, this will cover the land bounded by the River Cam and Hauxton Road as far south as Hauxton Mill.

Managing and Enhancing Biodiversity

2. All open areas will be managed and landscaped to encourage wildlife in locally distinctive habitats. Sensitive habitats will be protected by limiting public access to specified areas.

3. A Biodiversity Management Strategy will demonstrate how biodiversity will be enhanced and how local communities will be involved. A project officer will be funded to implement the strategy through a planning obligation.

Connecting Green Fingers and the Countryside

4. Connections will be provided for Green Fingers within the urban extensions to the surrounding countryside by enhanced landscaping, planting and the creation of wildlife habitats to provide links to larger scale wildlife habitats further afield including Nine Wells, the Magog Down, WandleburyWandlebury Country Park, the River Cam corridor, Coton Country Park, Wimpole Hall and Wicken Fen.

Survey

- D7.1 The Area Action Plan covers a farmland landscape that supports few hedgerows, copses, woodlands, major watercourses or water-bodies. There are a number of villages which border the Area Action Plan. The biodiversity of the area is generally poor, with no designated sites in the Action Plan area. The lack of habitat networks combined with intensive farming will have contributed to the low biodiversity value. However, the area should not be dismissed as a “wildlife desert” as species typical of open farmland including the brown hare, skylark and grey partridge can be found. There is also a cumulative value of lower quality habitats including as buffer spaces and connecting strips. There is also potential to find rare arable plants along field boundaries.
- D7.2 Hobson’s Brook and the River Cam hugely increase the habitat diversity. The River Cam is a clean flowing river with beds of water crowfoot. Eroding gravel cliffs provide nest sites for kingfisher and sand-martin. A wide range of fish species can be found including the brook lamprey. Hobson’s Brook receives clean cool water from natural chalk springs, which are very rare within the District. The springhead was formerly a Site of Special Scientific Interest for the rare invertebrate fauna associated with the clean water. All watercourses and their network of ditches and associated hedges and trees provide important corridors for animals moving through the Action Plan Area.
- D7.3 Much of the AAP area in South Cambridgeshire has not been surveyed in any detail for its ecological value. In order to protect and enhance the biodiversity of the area it will be essential to undertake full programmes for ecological survey and monitoring before, during and after construction.
- D7.4 This will enable the identification of key areas of value to inform the design process and to develop strategies for:

- Key species, particularly badgers, bats, great crested newts, barn owls, common lizard, grass snake, invertebrates, water vole, brown hare and important fish populations (through consultations with the Environment Agency);
- Key habitats, including arable fields, woodland, individual trees of merit, open water both flowing and standing, mosaics of grassland, hedgerows, together with their associated ditches.

Managing and Enhancing Biodiversity

- D7.5 For areas within any development, including Trumpington West, it will be important to draw up strategies for the creation, retention and management of key habitats important for foraging, shelter and migration for protected species and those of local importance for biodiversity to ensure and encourage their continued presence within the new development.
- D7.6 There are a number of ways in which biodiversity can be maximised within urban areas, such as by incorporating green roofs, erection of bat bricks and boxes, bird nest boxes, insect hibernation boxes, installation of mammal tunnels and other crossing points along severed routes. All of the above will need to be designed and installed at appropriate locations to achieve maximum net gains.
- D7.7 Existing trees and hedges within the site are a resource for biodiversity. A Biodiversity and Landscape Management Plan will enhance this resource through replanting and establishment of a diverse scrub and herb-rich under-storey planting.
- D7.8 A Biodiversity Management Strategy will be needed to maintain and fund biodiversity. The landownership structure of public open space should be as simple as possible and subject to a single agreed management plan in order to be comprehensive and all embracing. It will be important that any biodiversity management plan receives the full support of the local communities who should be involved in creation and care of habitats. This can be achieved by informing the residents of Trumpington about the biodiversity of the area through community / wildlife groups, on-site information boards and local newsletters.

Green Corridors for Biodiversity

- D7.9 The landscape strategy requires that green corridors penetrate into the urban area. For biodiversity it is important that a network within the development links to wildlife corridors and that they connect to the open countryside.

D8 ARCHAEOLOGY AND HERITAGE

OBJECTIVES

- D8/a To develop an appropriate archaeological strategy which mitigates any adverse effects of the development on the archaeological resource.
- D8/b To minimise any adverse impacts on the setting and character of Listed Buildings and Conservation Areas in the surrounding area.

ARCHAEOLOGY

POLICY CSF/16 Archaeology at Trumpington West

~~Planning permission will include a planning condition/obligation requiring that~~ The developers of Trumpington West to undertake a detailed, fully analytical archaeological assessment and evaluation of known and suspected sites or features of archaeological importance, including the Scheduled Ancient Monument between Trumpington West and the river, to assess the archaeological implications prior to undertaking any development of the site. The results of the comprehensive site survey will inform the design of any development at Trumpington West.

- D8.1 Cambridge Southern Fringe is an area with great archaeological significance. The gravel terraces and chalk slopes are exceptionally rich in the remains of later prehistoric (Iron Age) and Roman settlements, mostly identified through cropmarks. The Roman road connecting Duroliponte (the Castle area of Cambridge) to the south-east and Colchester (Camulodunum) may have intersected with another road aligned along Worts Causeway. The villages of Grantchester, Trumpington, Hauxton and Great Shelford are medieval with probable Saxon origins.
- D8.2 ~~Wandlebury~~ Wandlebury Country Park, a Scheduled Ancient Monument, lies to the south on the crest of the Gog Magog Hills. It is a hill fort possibly on the site of an earlier henge. In the 18th Century the bank and ditch were levelled when Gog Magog House was built. Run by the Cambridge Preservation Society, this land is open to the public and performs a function similar to a country park.
- D8.3 In addition to sites identified through cropmarks, there are a number of finds of material from the earlier prehistoric period to the post medieval which indicates a landscape settled and intensively used over a long period.

- D8.4 Further archaeological remains may be anticipated in the Trumpington West area, particularly of late prehistoric and Roman date although remains before and after these eras may also be present. Further assessment and evaluation will therefore need to be undertaken, having particular regard to the Scheduled Ancient Monument.
- D8.5 Whilst the LDF Development Control Policies on archaeology will apply, the results of this assessment and evaluation will need to be taken into account in the design of the urban extension at Trumpington West.

HERITAGE

- D8.6 The built heritage in nearby villages is also important and consists of a significant number of Listed Buildings and there are Conservation Areas at Grantchester and Great Shelford. The villages adjoining the Southern Fringe contribute both through their built heritage and their rural setting to the wider setting of Cambridge.
- D8.7 The strategies set out in the landscape section will be the main means of protecting and enhancing the heritage built environment of surrounding villages. The built form of development will also be important, including for example, retaining and enhancing long distant views of the City, such as Trumpington Parish Church to the north of the site.

D9 MEETING RECREATIONAL NEEDS

OBJECTIVES

- D9/a To provide adequate sports facilities.
- D9/b To ensure adequate public open space for play and informal leisure.
- D9/c To provide opportunities to access and enjoy the surrounding countryside.

URBAN RECREATION

POLICY CSF/17 Public Open Space and Sports Provision

Public Open Space

1. ~~The Cambridge City Local Plan Outdoor Play Space and Informal Open Space standards will apply to the whole of the Cambridge Southern Fringe, as set out in Appendix 3.~~
Provision for outdoor sports facilities, teenagers and children, informal open space and allotments will be made in Cambridge Southern Fringe in accordance with the Open Space and Recreation Standards set out in Appendix 3.

Formal Sports Provision

2. A Strategy for Formal Sports Provision will be prepared, for the approval of the Local Planning Authority before occupation of the first house at Trumpington West. It will provide a full assessment of the formal indoor and outdoor sports facilities required to meet the needs of the new community. ~~It will include an audit of existing facilities in the Cambridge Sub Region and the impact of the Cambridge Southern Fringe on those facilities.~~
3. The requirements of the strategy for formal sports provision which are directly related to the needs of the future residents of trumpington west will be ~~funded met~~ in full by the development.

Location of Children's Play Areas and Youth Facilities

4. A Strategy for Children's Play and Youth Facilities will be prepared, for the approval of the Local Planning Authority before planning permission is granted. The Play Strategy will include a mixture of formal and informal provision. Local children and young people must be involved in the design of all play areas.

- a. No home will be more than ~~60~~100m from a Local Area for Play (LAP).
- b. No home will be more than 240m from a Local Equipped Area for Play (LEAP).
- c. No home should be more than 600m from a Neighbourhood Equipped Area for Play (NEAP) or Space for Imaginative Play (SIP).

Phasing of the Delivery of Open Space

- 5. Recreational facilities and landscaping will be delivered early in the development such that the needs of the development are met at all times. ~~Commuted maintenance sums for a minimum of 10 years index linked will be required.~~

D9.1 Residents of the Southern Fringe should be able to find that their sport, leisure and recreational needs are met locally so that they can lead a healthy lifestyle and enjoy a high quality of life and leisure time. For Trumpington West the needs for formal and informal recreation will be met on the site.

D9.2 South of Trumpington / Addenbrooke's it would be inappropriate to locate formal sport facilities as far south as the District of South Cambridgeshire. Indeed there may be opportunities to locate formal sports provision some distance to the north inside the City boundary. This would reduce the visual impact on the wider countryside which lies to the south on the chalkland slopes rising up to the Gog Magog Hills and Nine Wells, and ensure provision is close to the new development.

Public Open Space and Sports Provision

D9.3 A high standard of public open space provision will be required in the Cambridge Southern Fringe. The Cambridge City Council Open Space Standards will apply at the Cambridge Southern Fringe as the development will function as part of the City. The standards are set out in Appendix 3.

Strategy for Formal Sports Provision

D9.4 A Strategy for Formal Sport will enable comprehensive planning of facilities at Cambridge Southern Fringe, taking account of the needs of the Cambridge Sub Region. The Strategy will be completed in partnership with Cambridgeshire Horizons along with other partner organisations and

professional bodies such as Sport England and the Governing Bodies of Sport. It must also include an assessment of local and national sporting trends.

Location of Children's Play Areas

- D9.5 A Play Strategy will be produced for Trumpington West which will include a mixture of formal and informal provision. Formal provision will include:
- LAPs - Local Areas for Play;
 - LEAPs - Local Equipped Areas for Play;
 - NEAPs - Neighbourhood Equipped Areas for Play; and
 - SIPs - Spaces for Imaginative Play.
- D9.6 LAPs will not be formally equipped but will provide soft and hard landscaping to provide a natural meeting place and play space for children and adults. The National Playing Fields Association recommends that no home should be more than 60m from a LAP.
- D9.7 LEAPs offer formal equipment for children up to 8 years. They should incorporate at least 8 pieces of equipment including a minimum of 3 pieces suitable for toddlers. The National Playing Fields Association recommends that no home should be will be more than 240m from a LEAP.
- D9.8 NEAPs will cater for unaccompanied 8 – 14 year olds and will include equipped play areas and youth sports facilities including informal multi-use areas and provision for a range of wheeled sports. SIPs are more natural areas using local features. The National Playing Fields Association recommends that no home should be more than 600m from a NEAP or SIP.

Phasing of the Delivery of Open Space

- D9.9 It will be important for the new residents to have access to both recreational facilities and informal open space to meet their needs at a very early stage. Phasing is particularly relevant to the provision of sports pitches as they need to be established for up to 2 years before they can be used. The early implementation of these areas should therefore be conditions of any planning permission.

Management of Public Open Space

- D9.10 With a wide variety of public open space and facilities being planned for the Southern Fringe, it is important that appropriate long-term management arrangements are planned and implemented at an early stage. This includes ensuring that parcels of land are not fragmented and that it is clear which body is responsible for their maintenance and care. This is particularly the case for incidental open space within housing development and roadside verges. Appropriate management systems will be required to ensure high quality, robust and effective maintenance of open space. This is dealt with in the Phasing and Implementation policies.

COUNTRYSIDE RECREATION**POLICY CSF/18 Access to the Countryside**

A strategy will be developed **with reference to the rights of way improvement plan** to link all parts of the Southern Fringe to the wider countryside through an enhanced network of **rights of way including** footpaths, cyclepaths and bridleways the provision of which will be funded by planning obligations on development at Trumpington West and development within Cambridge City at Glebe Farm, Clay Farm, Showground, Addenbrooke's and The Bell School Site.

Development at Trumpington West will provide strategic open space in accordance with the standards set out in the Development Control Policies DPD.

- D9.11 Within and close to the Southern Fringe there are significant countryside recreational areas at **WandleburyWandlebury Country Park** and the Magog Down, and along the River Cam Corridor. There are also potential future areas at Cambridge East and at the Cambridge Preservation Society's proposals for the Coton area. Whilst all these areas are well related to the proposed developments in the Southern Fringe, they are not as accessible as they need to be due to the lack of public footpaths, bridleways and cycleways across the intervening countryside. A strategy is therefore required to increase the access between the urban extensions and these strategic recreation areas. **This should be developed having regard to the rights of way improvement plan (rowip). This is a statutory plan required by the countryside and rights of way (crow) act 2000. The rowip will support improvements to the rights of way network over the whole county, and it is anticipated that the county council will work with districts and other partners to achieve this.** It will be important for these to be delivered in an early stage of the development.

- D9.12 Opportunities for enabling greater access to the countryside through the creation of new or improved public rights of way should be identified. The County Council, in partnership with the District and City Councils has undertaken a study of "Strategic Open Space". This is a higher order facility which serves a wider catchment and different purpose than local public open space and which has more than local significance. A standard will be identified for Strategic Open Space, and also the appropriate contribution towards additional Strategic Open Space that should come forward from developments, including the Southern Fringe. This will be detailed in the Planning Obligations DPD.
- D9.13 Chapter C3 proposes a new Country Park along the east bank of the River Cam between the development at Trumpington West and Hauxton Mill, which will help meet the strategic ~~recreation~~ open space needs of the Cambridge Southern Fringe.

APPENDIX 3 OPEN SPACE AND RECREATION STANDARDS

Type of Open Space	Definition	Standard
Outdoor Sports Facilities	Playing pitches, Courts and Greens	1.2 ha. per 1000 people
Provision for Children and Teenagers	Equipped children's play areas and outdoor youth provision	0.3 ha. per 1000 people
Informal Open Space	Recreation grounds, parks and common land excluding equipped play areas and pitches and nature conservation sites.	1.8 ha. per 1000 people
Allotments	Allotments.	0.4 ha. per 1000 people.

D10 AN INTEGRATED WATER MANAGEMENT STRATEGY

OBJECTIVES

- D10/a To ensure that the development would not be at risk of flooding either from itself or surrounding watercourses, for up to the 1 in 100 year event including the forecast effects of climate change;
- D10/b To not increase the flood risk to surrounding properties and communities;
- D10/c To maintain where possible, practicable and sustainable the natural catchment areas;
- D10/d To ensure that landforms and engineering works in any drainage scheme do not compromise the character of the surrounding area by considering the landscape options available for the site;
- D10/e To suggest an appropriate foul water drainage system and disposal method for the site;
- D10/f To develop appropriate strategies for the management and maintenance of all water bodies and watercourses;
- D10/g To determine the scope for water minimisation, conservation and recycling within the development, through layout and building design.

D10/h to incorporate the principles of sustainable drainage systems within the development.

LAND DRAINAGE, WATER CONSERVATION, FOUL DRAINAGE AND SEWAGE DISPOSAL

POLICY CSF/19 Land Drainage, Water Conservation, Foul Drainage And Sewage Disposal

Surface Water Drainage

1. Surface water drainage will be controlled by means of a sustainable drainage system to drain Trumpington West. This will comprise a series of underground cells and pipes and surface water channels. These could form a variety of design features through the urban quarter, feeding to water holding

features. A strategic surface water drainage scheme will be required at an early stage for the southern fringe area.

Foul Drainage and Sewage Disposal

2. The foul drainage and sewage disposal system for Trumpington West will be designed and funded as a planning obligation to ensure that:
 - a. Sufficient sewage treatment capacity exists or is planned to be provided before the occupation of any phase of development;
 - b. Any receiving sewage treatment works has sufficient capacity to ensure that untreated sewage is not discharged into any new or existing land drains, rivers or other water courses; and
 - c. Treated water leaving any sewage treatment works will not at any time exacerbate flood risk in any receiving water course.

Management and Maintenance of Watercourses

3. All water bodies and water courses required to serve the development will be maintained and managed by one or more a single organisations, publicly accountable bodies to ensure a comprehensive and integrated approach to surface water drainage with clearly defined areas of responsibility and funding ensure that~~which will be publicly accountable to ensure that~~:
 - ~~d. Water quality in Hobson's Brook and Nine Wells is improved as a result of development;~~
 - e.d. Flooding does not occur within the site of Trumpington West;
 - f.e. No additional discharge is made into surrounding water courses or onto surrounding land to that naturally discharging from the site in its current form;
 - g.f. Water quality and levels are maintained within Trumpington West's surface water drainage systems sufficient to support and encourage natural habitats;
 - h.g. The managing organisation will be funded in perpetuity ~~at the cost of the development.~~

4. ~~No development shall be occupied until the written agreement of the Local Planning Authority has been secured that a body with sufficient funding, resources and expertise to maintain and manage surface water drainage systems has legally committed to maintain and manage the surface water drainage systems for Trumpington West in perpetuity.~~
Planning permission will not be granted until the written agreement of the Local Planning Authority has been secured that organisations with sufficient powers, funding, resources, expertise and integrated management have legally committed to maintain and manage the surface water systems for Trumpington West in perpetuity.

Water Conservation

5. All development in Trumpington West will incorporate water conservation measures, including water saving devices, rainwater harvesting and greywater recycling. ~~No dwelling shall be occupied until the local planning authority has agreed a strategy which will secure at least a 25% reduction in the use of piped water compared to the average water consumption for development which does not have water conservation measures~~ whilst managing the recycling of water to ensure no adverse impact on the water environment and biodiversity.

D10.1 In Cambridgeshire, with its low lying land, the treatment of surface water run-off is of critical importance in order to avoid flood risk to new development, land nearby or downstream. The Cambridge Southern Fringe is immediately upstream of Cambridge and development will drain into the River Cam and Hobson's Brook which have the potential to exacerbate flooding conditions in the city. Taking land out of agricultural use provides an opportunity to improve water quality at Nine Wells and Hobson's Brook which has diminished in recent years resulting in Nine Wells losing its status as a Site of Special Scientific Interest for its aquatic species.

Surface Water Drainage

D10.2 To the south of the City the land rises towards the chalk hills culminating in the Gog Magogs. This is an open landscape of chalkland slopes interspersed with blocks of woodland, predominantly beech hangers. Balancing ponds and lakes should not be located in this wider landscape as they would form an alien feature on the chalkland slopes. Any balancing ponds required for the development and any associated infrastructure should therefore be retained within or adjoining the development areas, and used to form additional landscape and recreational features.

- D10.3 Any drainage proposals to serve development at Trumpington West will need to have regard to the protection of the River Cam corridor landscape. The use of carefully designed balancing ponds could complement the river corridor and enhance the biodiversity in this area. These would need to be designed to ensure there would be no detrimental impact to the current river valley landscape features and ecological balance. Dependent on land levels there could be a wetland area of reed beds as a Sustainable Drainage System.
- D10.4 The watercourses downstream of the Cambridge Southern Fringe are all at full capacity at peak flows. Storm water run-off will increase as a result of the development which will create impermeable areas and full attenuation measures will be required for 100 year storms.
- D10.5 Storm water drainage for the site will be designed as far as possible in line with sustainable drainage systems (SuDS) principles. Water storage areas will be designed and integrated into the development as multi-functional features with drainage, recreation, biodiversity and amenity value. Where new water bodies are proposed they will also have the dual function of providing permanent water features and also provision for excess water in times of storm conditions. These features will also be designed to enhance biodiversity by providing wetland habitat and reed beds that will also help to improve the water quality from surface water run-off.
- D10.6 The development will require the preparation of a flood risk assessment. This will address any potential flood risk, and will identify the types of SuDS drainage facilities proposed and options for future adoption and maintenance arrangements. The site lies some way from the Indicative Floodplains defined by the Environment Agency. A range of sustainable solutions for handling storm water drainage on the site will include:
- Pervious surfacing of minor roads & parking areas;
 - Underground reservoirs (for example beneath urban squares) upstream of the main open water features, which can store water and release it at a controlled rate into the permanent water features;
 - Two stage open drains in green corridors, which would serve as public amenity and a balancing function during storms;
 - A series of linked wetland features in the public open space part of the site, with adjacent land serving as washland for temporary storage of flood run-off.
- Green roofs where appropriate to the urban design.
- D10.7 The management of the water systems will be important if they are to be permanent water features able to fulfil an amenity and recreation role as

well as a drainage function. It will be important that any underground storage reservoirs in the urban area do not prejudice high quality landscaping of these important urban squares, including trees. Any implications of the surface water drainage treatment proposed for development in the Cambridge Southern Fringe for water quality, water table and watercourses elsewhere will need to be considered and addressed.

Foul Drainage and Sewage Disposal

- D10.8 The foul water produced at the site will be directed to Cambridge Sewage Treatment Works (STW) at Milton to take advantage of consolidating existing facilities. Anglian Water is currently considering relocating the STW in connection with potential redevelopment at Cambridge Northern Fringe East. If relocated, it is still anticipated that the foul water from Trumpington West will be directed to the new STW.

Management and Maintenance of Watercourses

- D10.9 It will be important to ensure that surface water drainage will be suitably managed and maintained in perpetuity, beyond the lifetime of construction. The options for this are for maintenance and management to be the responsibility of one of the following:
- The City and / or District Councils;
 - A water company such as Anglian Water;
 - A publicly accountable trust.
- D10.10 It is important to ensure that the body made responsible has adequate expertise and is financially stable in perpetuity. It will be the responsibility of the developer to secure and fund a suitable management and maintenance body (see also Phasing and Implementation).

Water Conservation

- D10.11 East Anglia is the United Kingdom's driest but fastest growing region and the Cambridge Sub-Region will be the fastest growing part. Even allowing for the impact of climate change, careful husbandry of water resources will be crucial if the economic potential of the sub-region is to continue to be realised. The development of the new urban extension provides an opportunity to design water conservation measures into the infrastructure and buildings in order to reduce the overall demand for water. This

important issue should be considered as part of the Cambridge Southern Fringe proposals.

~~D10.12—Domestic water consumption alone offers significant opportunities for water conservation and an overall target of 25% reduction as compared to development for which there are no water conservation measures should be capable of being achieved. (Water metering alone can save up to 20% of domestic water use and water efficiency measures including greywater recycling and rainwater harvesting will make a target of 25% achievable, for example, average domestic water consumption: WC=30%, bath=24%, kitchen sink=12%, kitchen appliances=22%, hand basin=12%. Source: Building Research Establishment, March 2001).~~

~~D10.13—Not all rainwater can be harvested from development otherwise the natural environment will suffer drought conditions and therefore it is necessary to strike an appropriate balance between water conservation and supporting the biodiversity at Trumpington West. A strategy will be prepared and agreed by the Local Planning Authority which will demonstrate how the dual objectives of water conservation and encouraging biodiversity at Trumpington West will be met.~~

D11 TELECOMMUNICATIONS

OBJECTIVES

D11/a To provide an effective telecommunications infrastructure, including provision for broadband.

D11/b To be capable of responding to changes in technology requirements over the period of the development.

POLICY CSF/20 Telecommunications Infrastructure

All telecommunications infrastructure should be capable of responding to changes in technology requirements over the period of the development. Provision for broadband should be designed and installed as an integral part of the development which minimises visual impact and future disturbance during maintenance.

- D11.1 Effective telecommunications are of great benefit to both the economy and the community, and the technology is developing rapidly. It is closely related to information technology, where broadband access is becoming increasingly important to businesses, as well as enabling home working which can contribute to reducing the need to travel. It is important that infrastructure can respond to changes in technology over the period of the development.
- D11.2 The expansion of Trumpington provides the opportunity to ensure that all telecommunications infrastructure is designed and installed as an integral part of the development.
- D11.3 Underground cables should be provided as part of the development of Trumpington West and located to ensure ease of future maintenance with minimum disruption, including to landscaping.
- D11.4 For surface infrastructure, the scope to share existing telecommunications masts should be maximised and potential to utilise other buildings and structures should also be explored to help minimise visual impact.

D12 AN EXEMPLAR IN SUSTAINABILITY

OBJECTIVE

D12/a To include within Trumpington West projects which are an exemplar in terms of the use of the earth's resources, including energy, water and materials.

POLICY CSF/21 An Exemplar in Sustainability

Trumpington West will include within the development exemplar projects in sustainable development, including energy efficient measures. This will involve building a proportion of the development using cutting-edge technologies that fully address sustainability issues and minimise any environmental impact by pushing at the boundaries of the proven technology available at the time each exemplar project comes forward. This requirement could be met, in part, by providing an increased level of sustainability across the development as a whole materially above current requirements.

Exemplar Projects

- D12.1 The Area Action Plan requires the provision of exemplar projects to be incorporated in the development at Trumpington West to make the development of this urban extension as sustainable as possible by taking an innovative approach to development. This requirement would be achieved by a proportion of the development being built using cutting-edge methods and materials and pushing at the boundaries of technology.
- D12.2 It would also be possible to offer the benefits of increased sustainability to a wider number of properties. The policy provides for the requirement to be met in part by an increased level of sustainability above current requirements could be provided across the whole development. This would need to be at a level that was materially higher than could normally be required of the development. This must be in addition to the provision of exemplar projects.

Materials and Construction Techniques

- D12.3 Where practicable, the use of sustainable building methods and verifiably sustainable, locally sourced materials, including recycled materials and include a Travel Plan to address the needs of labour during construction should be achieved at Trumpington West (see Development Principles and Natural Environment chapters in the Development Control Policies DPD).

In an exemplar project, making these matters integral to the development would contribute towards exemplar projects.

Water Conservation

~~D12.4— Policy CSF/19 in the Land Drainage and Water chapter seeks at least a 25% reduction in the use of piped water compared to the average water consumption for development which does not have water conservation measures whilst managing the recycling of water to ensure no adverse impact on the water environment and biodiversity. Within Trumpington West there will be exemplar projects in sustainable development in response to the Structure Plan policy. Improvements upon the standards for water conservation would contribute towards such exemplar projects.~~

D13 WASTE

- D13.1 Waste is a key issue affecting the Cambridge area. The Government has challenging targets for reducing the amount of waste that goes to landfill sites and there is a clear policy approach to first reduce the amount of waste created in both residential and commercial properties, to reuse waste products wherever practical, and then recycle as much as possible of the remaining waste, so that the amount of waste that needs to be disposed of is minimised. As a major development which will inevitably create significant levels of waste material, Trumpington West should be planned for all necessary facilities at all levels to deal with waste, from facilities within homes to store recycling materials and design which aids easy collection, to waste recycling facilities, and potentially waste management facilities, to serve the development and even the wider area.
- D13.2 It is not the role of the Area Action Plan to include policies for waste. Waste policies are contained in the Structure Plan and the Waste Local Plan 2003. These plans form part of the development plan applying to the Cambridge Southern Fringe and will need to be read alongside this Area Action Plan.
- D13.3 The Cambridgeshire Structure Plan 2003 proposes that proposals for major new developments will be required to make adequate provision for strategic and / or local waste management facilities.
- D13.4 The adopted Waste Local Plan 2003, prepared by Cambridgeshire County Council as the waste planning authority, responds to the need for sustainable waste management to be in place for existing and new communities. It identifies all major new developments as “preferred” locations where “proposals for major waste management facilities (other than landfill) will be considered favourably” (Policy WLP 18). It also states that suitable locations for household waste recycling centres “may include preferred sites identified in policy WLP 18, land identified for general employment uses, and as part of major development proposals” (Policy WLP 20). Developers are advised to talk to the County Council as Waste Planning Authority at an early stage.
- D13.5 The County Council is embarking on the preparation of a Waste and Minerals Local Development Framework, which envisages initial consultation in summer 2005, Preferred Options public participation in spring 2006 and submission to the Secretary of State in early 2007.
- D13.6 Buildings for waste processing are large structures which would not be appropriate at Trumpington West which will be a primarily residential development and where one of the key objectives of the development is to improve the character and setting of this southern approach to Cambridge by concealing existing large buildings.

E DELIVERING THE CAMBRIDGE SOUTHERN FRINGE**E1 PHASING AND IMPLEMENTATION****OBJECTIVES**

- E1/a** To ensure that the impact of the development of the Cambridge Southern Fringe is kept to a minimum both in terms of physical impact and duration, and where possible adverse impacts are avoided through the management of the development process;
- E1/b** To ensure the early provision and implementation of a landscaping, biodiversity and public access strategy for the development and countryside in the Cambridge Southern Fringe;
- E1/c** To ensure that Trumpington West is developed using sustainable construction methods and principles;
- E1/d** To ensure that the annual rate of house-building at Trumpington West contributes to the phased delivery of 2,800 dwellings a year in the Cambridge Sub-Region;
- E1/e** To ensure that development makes an appropriate contribution to the provision of services, facilities and infrastructure that will be needed for the development at Trumpington West.

INTRODUCTION

- E1.1** ~~Trumpington West will be an important part of the development strategy for the Cambridge Sub-Region. The Cambridgeshire Structure Plan requires 2,800 dwellings to be constructed annually. Not only is that a challenging target for house-builders, it is also a challenging target for the providers of the services, facilities, infrastructure and jobs. There is no specific annual house-building target for Trumpington West but development is expected early in the plan period and to be substantially completed by 2011.~~

CONSTRUCTION STRATEGY**POLICY CSF/22 Construction Strategy**

- x. A comprehensive construction strategy will be required for all phases of development.**

Site Accesses and Haul Roads

1. The location of the site accesses for construction vehicles for Trumpington West will be taken from Hauxton Road outside the existing built-up area of Trumpington and ensure that any haul roads are located, designed and landscaped in such a way as to minimise any noise, smell, dust, visual or other adverse impacts on existing residents and businesses, and the new residents and businesses at Trumpington West. They should also avoid adverse effects on the environmental amenities of biodiversity, rights of way and green spaces. Traffic flows will be monitored to ensure that the public has a mechanism to feed back any concerns that arise during development.
2. Construction haul roads for development at Glebe Farm, Clay Farm, Showground, Addenbrooke's the Bells School Site with Cambridge will not be permitted in the countryside within South Cambridgeshire. ~~Any haul roads within Cambridge City which are located close to properties within South Cambridgeshire will include landscaping and noise attenuation measures to minimise disruption to local residents.~~

Storage Compounds, Plant and Machinery

3. Any storage compounds, plant and machinery will be located, designed and used to avoid any noise, smell, dust, visual or other adverse impact on existing and new residents and businesses at Trumpington.

Construction methods

3A. Development at Trumpington West will be required to recycle construction waste within the site during construction and in the long term. Exceptions would include waste having potentially hazardous properties and any other materials where off-site treatment would be more appropriate. A 'resource re-use and recycling scheme' will be needed to address treatment of all waste arising during the development.

Construction Activities

4. Contractors at Trumpington West will be required to be bound by the requirements of the 'Considerate Contractors Scheme'.

Construction Spoil

5. Development will not commence until a construction spoil strategy has been agreed by the local planning authority. The

construction spoil strategy will provide for all **suitable** spoil generated by development at Trumpington West to be accommodated within the development site and in accordance with a landscaping scheme to be approved by the Local Planning Authority. Landscaping with spoil will be required alongside the M11 motorway to act as a noise barrier to protect Trumpington West and Trumpington Meadows Country Park from traffic noise.

Site Accesses

- E1.2 The construction process will need careful management in order that disruption to people living and working in Trumpington is avoided and to minimise disruption to traffic on the busy Hauxton Road and Babraham Road. Avoidance of impact will be the objective, but where this is not possible disruption will be kept to a minimum both in magnitude and duration. Realistically it will not be possible to avoid any impact when development is being undertaken immediately adjoining existing areas but measures should be taken to reduce that impact as far as possible. Forecasts of the development traffic should be taken into account in planning for construction traffic.

Storage Compounds, Plant and Machinery

- E1.3 As part of an overall strategy to minimise the impact of construction activity at Trumpington West, storage compounds, plant and machinery will be located close to the Hauxton Road south of the Trumpington Park & Ride site where they will have least impact on the amenity of existing businesses and residents of Trumpington. Storage compounds, plant and machinery for development elsewhere in the Cambridge Southern Fringe will not be located close to existing houses in Shelford Road.

Construction Activities

- E1.4 Cambridge City Council, in association with the Cambridge Forum for the Construction Industry runs a 'Considerate Contractors Scheme' designed to ensure that construction activities do not make life unpleasant for people who live and work nearby. [South Cambridgeshire District Council is developing a similar scheme.](#)
- E1.5 The 'Considerate Contractors Scheme' requires that all contractors, sub contractors, suppliers and others working on a project:
- Have **consideration** to neighbouring uses to minimise disturbance;

- Keep **noise** to a minimum and in particular that there are no works that are audible at the site boundary outside permitted working hours;
- Keep all adjacent areas **clean** including from dust and smoke;
- Keep each development site **tidy**;
- Ensure that all activities, vehicle movements etc are carried out **safely** for workers and the general public.

E1.6 Adopting this scheme will go a long way to minimising disruption from this long-term development project.

Construction Spoil

E1.7 Development on the scale and density proposed will lead to a very significant amount of material being dug out which will form construction spoil. Experience elsewhere in the District in the development of the new village of Cambourne has shown that accommodating this material requires a careful strategy if it is not to have an adverse impact on amenity and the landscape.

E1.8 It would not be appropriate to transport such spoil over considerable distances as this would be unsustainable and simply transfer the problem elsewhere. The guiding principle is for construction spoil to be utilised on site. However, it would not be acceptable to alter the land forms locally by concentrating the spoil into one or more large mounds as this would introduce alien landscape features into this area of gentle relief. Traffic noise from the M11 is intrusive over much of the western side of Trumpington and sensitive earth shaping and landscaping alongside the motorway will be necessary to mitigate road noise to ensure that Trumpington Meadows Country Park and Trumpington West provide pleasant environments for recreation and living. It will be important to ensure that drainage modelling takes account of any proposals for ground level raising on the site of the urban extension.

Sustainable Building Methods and Materials

E1.9 Policy DP/1 of the Development Control Policies DPD requires, where practicable, the use of sustainable building methods and verifiably sustainable, locally sourced materials, including recycled materials, and preparation of a Travel Plan to address the travel needs of labour during construction.

STRATEGIC LANDSCAPING**POLICY CSF/23 Countryside Enhancement Strategy**

Planning permission for development at Trumpington West, Glebe Farm, Clay Farm, Showground, Addenbrooke's and The Bell School Site will include a requirement in a planning obligation for contributions to a Countryside Enhancement Strategy for the area bounded by the Cambridge City boundary, Babraham Road, Haverhill Road, the edge of the built up area of area of Stapleford and Great Shelford. The planning obligation will include provisions for maintenance of landscaping and replacement of diseased, dying and dead stock for a period of 10 years and details of long-term management thereafter.

- E1.10 Part of the strategy for minimising impacts of the development will involve the landscaping of the Cambridge Southern Fringe as part of the overall development. Landscaping will involve earth moving and could help with the general management of spoil which will be created from digging footings, land drains, surface water attenuation lakes etc. Woodlands, individual trees and hedgerows will also be planted during the development of the Cambridge Southern Fringe. The delivery of an agreed landscape strategy will need to be implemented and managed to ensure that strategic landscaping is carried out prior to each phase of development and maintained closely throughout the construction period. Whilst much of the development is within Cambridge City, it will be required to make contributions to landscaping and works in South Cambridgeshire which are necessary to meet the policy requirements of this Area Action Plan and achieve a successful development.

MAKING USE OF EXISTING BUILDINGS / RESOURCES ON SITE**POLICY CSF/24 Making Use of Existing Buildings / Resources on Site**

Redundant buildings together all other redundant structures will be recycled, where appropriate, within the Cambridge Southern Fringe to provide a local source of hardcore or other building materials.

- E1.11 In addition to measures considered above, further minimisation of the impact of the development on existing communities can be achieved by taking a sustainable approach to construction. In order to be truly sustainable, the use of sustainable materials will be essential. Wherever practicable the use of locally sourced materials will minimise the distance travelled, thus reducing the use of energy. Similarly, wherever possible the

materials used in construction should be from environmentally friendly sources; this would include timber from managed forests.

- E1.12 Whilst some of the buildings at the Trumpington West site may be capable of use within the development, either temporarily or on a more permanent basis, others will not be required and will be recycled during construction reducing the amounts of material which will have to be imported onto the site.

MANAGEMENT OF SERVICES, FACILITIES, LANDSCAPE AND INFRASTRUCTURE

POLICY CSF/25 Management of Services, Facilities, Landscape and Infrastructure

Management strategies for services, facilities, landscape and infrastructure will be submitted to the Local Planning Authority for adoption prior to the granting of outline planning permission to ensure high quality, robust and effective implementation, adoption and maintenance. Landownership for these uses should be as simple as possible, preferably in a single ownership to avoid fragmentation. In particular, there should be a single agreed management strategy covering recreation, landscape and biodiversity. The inclusion of water and drainage features within open spaces would have significant advantages and should therefore be investigated. Management strategies should cover:

- 1. The method of funding of implementation, management and maintenance;**
- 2. The body or trust that will be responsible;**
- 3. Monitoring and review requirements.**

Management strategies will need to demonstrate that they receive the full support of the local communities who must be involved in the development of services, facilities, landscape and infrastructure. They must also build in provision for ongoing consultation with the emerging community.

- E1.13 It is important that the services, facilities, landscape and infrastructure needed by the development in the Cambridge Southern Fringe are not only provided to a high quality, but that they are properly and effectively implemented, managed and maintained if they are to meet the needs of the community in the long term. There would be advantages in a single organisation taking responsibility for maintenance to avoid fragmentation

and ensure continuity in approach. ~~This particularly applies to the open areas for recreation, landscape and biodiversity.~~ Whilst under the terms of the new plan making system the LDF must be in general conformity with RSS6, in the circumstances of the Cambridge area it is also appropriate and consistent for the LDF to meet the policy requirements of the Structure Plan, as there is currently no evidence that the draft RSS14 is proposing divergent emerging policies on the development strategy for the sub region relative to those set out in the current RSS and the 2003 Structure Plan.

- E1.14 The Area Action Plan is not specific about the number of management strategies. However, there should be a single agreed management strategy covering recreation, landscape and biodiversity. The inclusion of water and drainage features within open spaces would have significant advantages to ensuring a holistic approach to the management of open spaces where the respective needs of the various land uses and functions within those spaces can be addressed and should therefore be investigated.

TIMING / ORDER OF SERVICE PROVISION

POLICY CSF/26 Timing / Order of Service Provision

The outline planning permission and legal agreement will include a schedule of services, facilities and infrastructure to be funded by the master developer/consortium of builders at Trumpington West together with a timetable for their provision during the development of the urban quarter.

- E1.15 The guiding principle is that services, facilities and infrastructure will be provided at stages in the development process when the need for them is forecast to arise and will be delivered according to a set of trigger points tied to numbers of dwellings completed or such other stage of the development as advised by service / facility / infrastructure providers. Development will fund in full the services, facilities and infrastructure that are required either by the development alone or by service, facility and infrastructure providers securing enhanced public investment as a result of the development being located in the London, Stansted, Cambridge, Peterborough Growth Area.

E2 PLANNING OBLIGATIONS & CONDITIONS

OBJECTIVE

E2/a To ensure that the funding and/or provision of the services, facilities, infrastructure, countryside landscape and access requirements that will be needed for the development of the Cambridge Southern Fringe are secured through planning obligations and / or conditions as part of the planning permissions for the site.

PLANNING OBLIGATIONS

- E2.1 Policy DP/4 of the Development Control Policies DPD requires that development proposals make suitable arrangements for the improvement or provision of infrastructure necessary to make the scheme acceptable in planning terms, related to the form of the development and its potential impact upon the surrounding area. The policy includes a list of potential requirements, including affordable housing, education, health care, transport infrastructure, public open space and recreation.
- E2.2 Development in the Cambridge Southern Fringe will not happen in isolation. Its development will be part of an overall development strategy for the whole of the Cambridge Sub-Region. Services, facilities and infrastructure will be provided elsewhere in the Sub-Region which will be required by the development at the Southern Fringe.
- E2.3 In order to ensure that this sub-regional infrastructure is provided when it is needed, that appropriate levels of funding are secured from new development and that a consistent approach is taken to securing contributions from individual development to the service, facilities and infrastructure that will be provided at each development, the planning authorities, service and infrastructure providers have established a delivery vehicle called Cambridgeshire Horizons. This partnership organisation is developing a planning obligation strategy for sub-regional infrastructure which will be incorporated into the planning obligation strategy for the Cambridge Southern Fringe.
- E2.4 The Area Action Plan includes policies requiring the provision of services, facilities, infrastructure and other uses, such as affordable housing, which will be delivered in full or in part by the developers of the Cambridge Southern Fringe. Where the local planning authority is aware of planning obligation requirements they have been included in the Area Action Plan otherwise the Core Strategy policy for planning obligations provides a framework for gathering contributions for services, facilities and infrastructure which have not yet been determined, including contributions to sub-regional services, facilities and infrastructure which will be provided

elsewhere in the Cambridge Sub-Region but which will be in part needed to serve the Cambridge Southern Fringe.

- E2.5 The following is an indicative (but not exclusive) list of obligations required for the development as a whole which will be the subject of a planning obligation and/or planning conditions. In considering the scope of necessary obligations, reference must also be had to each chapter of the Area Action Plan. For all elements and phases of development, the obligation/conditions will also need to include an appropriate set of trigger points for delivery, together with details of the long term management and maintenance together including the body or trust that will be responsible.

Planning Obligation/condition	Trumpington West	South of Addenbrooke's
Strategic Masterplan and Strategic Design Guide	A Strategic Masterplan and Strategic Design Guide for the whole of the Trumpington West development will be required prior to the grant of outline planning permission to set out the vision and guiding principles for the creation of a quality environment.	
Local Masterplans, Design Guides and Design Codes	Local Masterplans, Design Guides and Design Codes will be required for individual phases.	
Countryside landscape, biodiversity, recreation and access strategies.	Countryside Enhancement Strategy for the countryside adjoining Trumpington West, including the proposed Trumpington Meadows Country Park. Should provide for additional structural planting and landscaping to be implemented at the earliest opportunity. Developers will be required to maintain landscaping and replace diseased, dying and dead stock for a period of 10	Countryside Enhancement Strategy for the countryside adjoining Trumpington East. Should provide for additional structural planting and landscaping to be implemented at the earliest opportunity. Developers will be required to maintain landscaping and replace dead stock for a period of 10 years.

Planning Obligation/condition	Trumpington West	South of Addenbrooke's
	years.	
Affordable Housing	A target of 50% of affordable housing with a likely tenure mix of approximately 30% social rented, and approximately 20% intermediate housing, including for Key Workers.	
Community Facilities	The needs of Trumpington West and Trumpington together will be determined in accordance with detailed assessments and strategies, prepared in consultation with potential service providers and stakeholders in order to identify priorities as well as deficiencies in existing facilities.	
Public Art	Provision for public art in Trumpington West with the preparation of a strategy for public art to be prepared, with the appointment of lead artists at an early stage in the planning and design of development.	
Transport & Travel for Work	<p>Roads</p> <ol style="list-style-type: none"> 1. Two road access points onto Hauxton Road; 2. Internal road design to prioritise internal movements by foot or cycle rather than the car. <p>A detailed Transport Assessment will be required alongside the planning</p>	

Planning Obligation/condition	Trumpington West	South of Addenbrooke's
	<p>application, including capacity on Hauxton Road and the environmental impact, such as noise, pollution and impact on amenity and health.</p> <p>Traffic management measures will be funded by the development to minimise traffic impacts on nearby residents.</p> <p><u>Alternative Modes</u></p> <p>High Quality Public Transport (HQPT) services will be provided with associated quality infrastructure.</p> <p>Developers will provide an initial subsidy for new residents for a period of 12 months after occupation to encourage bus usage.</p> <p>A network of highly accessible, dedicated, segregated, high quality, safe, direct, connected and convenient rights of way, including cycle, pedestrian and horse riding routes, both within Trumpington West and the wider rights of way network.</p> <p>Appropriate Travel Plans will be required.</p>	
Strategy for Construction Spoil	A Strategy for Construction Spoil to ensure spoil is retained on-site in a manner appropriate to the local	

Planning Obligation/condition	Trumpington West	South of Addenbrooke's
	topography and landscape character.	
Biodiversity	A full programme of ecological survey and monitoring before, during and after construction to establish which areas of biodiversity need protecting and enhancing, and strategies for doing so. Additionally to establish the baseline for the Countryside Enhancement Strategy.	A full programme of ecological survey and monitoring as far south as Granhams Road to establish the baseline for the Countryside Enhancement Strategy.
Archaeology	A comprehensive site survey to identify and record the location, extent, character, condition, significance and quality of any sites, features or remains of known or suspected archaeological importance together with proposed treatment.	
Recreation	<p>Strategies for:</p> <ol style="list-style-type: none"> 1. Formal Sports Provision; 2. Play; 3. Linking Trumpington West to the wider countryside; <p>required for the development of Trumpington West as a whole must be prepared and/or approved by the Local Planning Authorities. An indicative but not exhaustive list is likely to include the following:</p> <ul style="list-style-type: none"> • Dedicated Children's Play Areas; • Outdoor sports facilities, 	

Planning Obligation/condition	Trumpington West	South of Addenbrooke's
	<p>including grass pitches, tennis courts, bowls greens, artificial turf pitches and ancillary facilities;</p> <ul style="list-style-type: none"> • Other sports as identified in the Sports Facilities Strategy; • Informal youth facilities (e.g. multi use games area, youth shelter); • Trumpington Meadows Country Park. 	
Surface Water Drainage	<p>A strategy for a positive surface and grey water system, using sustainable drainage systems.</p> <p>A strategy for water conservation to secure at least 25% reduction in use of piped water compared to average water consumption for development which does not have water conservation measures, whilst ensuring no adverse impact on water environment and biodiversity.</p> <p><u>A strategic surface water drainage scheme will be required.</u></p>	
Energy	The provision of renewable energy to provide at least 10% of predicted energy requirements of Trumpington West.	
Sustainable Building Methods and Materials	The use of sustainable building methods and verifiably sustainable, locally sourced materials, including	

Planning Obligation/condition	Trumpington West	South of Addenbrooke's
	recycled materials and preparation of a Travel Plan to address the needs of labour during construction.	
An Exemplar In Sustainability	Provision of exemplar developments in sustainability, including energy efficient measures.	
Construction Strategies	Strategies for site access, construction methods, including recycling and reuse of construction waste on site, storage compounds, plant and machinery.	
Considerate Contractors Scheme	A scheme to be agreed that requires that all contractors, sub contractors, suppliers and others working on a project have consideration to neighbouring uses to minimise disturbance; to keep noise to a minimum, to keep all areas adjacent clean including from dust and smoke; to keep each development site tidy; and to ensure that all activities, vehicle movements etc are carried out safely for workers and the general public.	
Timing / Order of Service Provision	A schedule of services, facilities and infrastructure to be funded by the master developer/consortium of builders at Trumpington West together with a timetable for their provision, and trigger points tied to the number of dwellings	

Planning Obligation/condition	Trumpington West	South of Addenbrooke's
	completed or such other stage of the development as advised by the services / facility / infrastructure providers.	
Management strategies for services, facilities, landscape and infrastructure	<p>Management strategies for services, facilities, landscape and infrastructure will be submitted to the Local Planning Authority for adoption prior to the granting of outline planning permission. These uses should preferably be in a single ownership to void fragmentation. There should be a single agreed management strategy covering recreation, landscape and biodiversity. The inclusion of water and drainage features within Trumpington Meadows Country Park would have significant advantages and should therefore be investigated. Management strategies should cover:</p> <ol style="list-style-type: none"> 1. The method of funding of implementation, management and maintenance; 2. The body or trust that will be responsible; 3. Monitoring and review requirements. 	<p>Management strategies for countryside landscape, recreation and access will be submitted to the Local Planning Authority for adoption prior to the granting of outline planning permission. There should be a single agreed management strategy covering recreation, landscape and biodiversity. Management strategies should cover:</p> <ol style="list-style-type: none"> 1. The method of funding of implementation, management and maintenance; 2. The body or trust that will be responsible; 3. Monitoring and review requirements.

E3 DELIVERING CAMBRIDGE SOUTHERN FRINGE

OBJECTIVES

E3/a To ensure appropriate mechanisms are in place to secure the efficient and timely delivery of the Cambridge Southern Fringe.

INTRODUCTION

E3.1 Trumpington West will be an important part of the development strategy for the Cambridge Sub-Region. The Cambridgeshire Structure Plan requires 2,800 dwellings to be constructed annually. Not only is that a challenging target for house-builders, it is also a challenging target for the providers of the services, facilities, infrastructure and jobs. There is no specific annual house-building target for Trumpington West but development is expected early in the plan period and to be substantially completed by 2011.

DELIVERY MECHANISMS

E3.2 The Area Action Plan has been prepared in consultation with stakeholders at three stages of consultation. The Council is also involved in the preparation of other key strategies and plans such as its Community Strategy and strategies being prepared by others such as the Cambridgeshire Long Term Transport Strategy and Local Transport Plan. Cambridgeshire Horizons is leading on a number of sub regional strategies in which the Council is involved, looking at issues such as formal sports, and green infrastructure.

E3.3 Cambridgeshire Horizons key focus is on the delivery of the development strategy for the Cambridge area. As such, it is assisting the local authorities with mechanisms to ensure prompt and efficient delivery of the major developments. Given the urgency to ensure that plans are in place to bring forward the major developments to meet the needs of the Cambridge Area, the Area Action Plan is inevitably a fairly strategic document which sets out the anticipated key requirements of the development where these are already known, and identifies where strategies are required to identify all the specific requirements of the development.

DELIVERING HOUSES AT CAMBRIDGE SOUTHERN FRINGE

E3.10 The new plan making system has an increased emphasis on demonstrating how the policies of the plan will be delivered, particularly housing. Planning Policy Statement 12 requires that all plans involving housing include a housing trajectory. This attempts to estimate the start date for housing

being delivered on the ground and the build rate per year to test how reasonable it is to rely on polices to deliver the identified housing requirement.

E3.11 In the case of this plan, the 'saved' policies of the Cambridgeshire Structure Plan 2003 provide the detailed housing guidelines for South Cambridgeshire. The statutory requirement is for the district's plans to be in general conformity with RSS6 rather than the Structure Plan. Under the new plan making system it is the RSS and the district LDFs that form the development plan. In practice for South Cambridgeshire District Council, the Structure Plan is still a key material consideration for plan making. The policies of the Structure Plan are 'saved' under transitional arrangements and the plan is in general conformity with the current Regional Spatial Strategy in RSS6. Draft RSS14 broadly carries forward the approach of RSS6 and the Structure Plan as they apply to the Cambridge Sub Region. At the time of writing, there is no evidence that the draft RSS14 is proposing divergent emerging policies on the development strategy for the sub region relative to those set out in the current RSS and the 2003 Structure Plan. It is therefore entirely appropriate and consistent for the Area Action Plan to meet the policy requirements of the Structure Plan, whilst being in general conformity with RSS6.

E3.12 In preparing the housing trajectory for Trumpington West, the Council has had regard to a number of factors:

- the anticipated date of adoption of the Area Action Plan, before which no planning permissions could be granted for development
- a reasonable build rate for the development, agreed with the landowner/developer, based on current expectations of the housing market and the capacity and intensions of the house building industry.

E3.13 However, all these assumptions must be heavily caveated that in the event of any changes, the housing trajectory will not reflect actual delivery. Many of these factors are beyond the control of the local planning authority or the development industry. The role of monitoring will be important in assessing the actual performance in terms of delivery of this and other parts of the development strategy. A monitoring strategy for the Cambridge Southern Fringe is set out in section E4.

E4 MONITORING CAMBRIDGE SOUTHERN FRINGE

OBJECTIVES

E4/a To ensure appropriate mechanisms are in place to monitor the efficient and timely delivery of Cambridge Southern Fringe.

INTRODUCTION

E4.1 Monitoring provides information on the performance of policy, the delivery of development and impacts on the environment. Monitoring will help the local planning authority to assess whether its plans remain sound or whether adjustments need to be made to continue to meet the plan's objectives. The presence of clear mechanisms for implementation and monitoring forms part of the test of soundness of the Local Development Framework.

ANNUAL MONITORING REPORTS

E4.2 Every local planning authority now has to produce an Annual Monitoring Report (AMR) for submission to the Secretary of State. This forms part of the overall package of documents making up the Local Development Framework for each district. South Cambridgeshire District Council will have to produce an AMR, which will deal with development at Cambridge Southern Fringe, as part of the overall provision of different land uses within the district, e.g. district wide housing land supply. However, it is also important to look at the development of the Southern Fringe specifically and test how it is performing overall against key policy requirements of the Area Action Plan.

E4.3 The district wide indicators for South Cambridgeshire are contained in the Core Strategy and Development Control Policies Development Plan Documents. For example, the Council will identify the number of houses completed annually in the district, of which those at Trumpington West will form part.

MONITORING CAMBRIDGE SOUTHERN FRINGE

E4.4 A set of indicators has been developed specifically for monitoring the Cambridge Southern Fringe Area Action Plan. This includes core indicators similar to those applying across the district but drawing out monitoring of the development of Cambridge Southern Fringe specifically. For example, this will provide for monitoring of housing completions against the policy requirements for the development as set out in the Area Action Plan. A number of specific local indicators are also included to enable monitoring of

those policies in the Area Action Plan that set specific requirements for the development at Cambridge Southern Fringe, e.g. housing density and accessibility to public transport. The Council's AMR will include a section monitoring the Cambridge Southern Fringe development against the site specific indicators. These are included at Table E4 at the end of this chapter.

HOUSING TRAJECTORY

E4.5 A housing trajectory for Trumpington West is included in section E3 Delivering Cambridge Southern Fringe which sets out a policy based assessment of the potential start date and build rate for Trumpington West. A separate housing trajectory will be prepared as one of the core output indicators that districts are required to monitor in their Annual Monitoring Reports, as set out in Table E4.

E4.6 The role of the housing trajectory is to integrate the "plan, monitor, manage" approach to housing delivery by showing past performance and estimating future performance. The housing trajectory will illustrate this information in a graphical form. The AMR housing trajectory for Trumpington West will compare the levels of actual and projected completions over the period of the plan with the housing trajectory contained in the Area Action Plan. This build rate will then need to be looked at together with other sites across the district as part of the South Cambridgeshire overall housing trajectory.

RESPONDING TO DELIVERY ISSUES

E4.7 In the event that the AMR identifies delivery issues at Cambridge Southern Fringe, where key policy targets are not being met, these would need to be assessed as part of the Council's AMR process and a decision reached on whether any change was required to the Area Action Plan or through other mechanisms.

E4.8 A key aspect of monitoring Cambridge Southern Fringe will be the number of homes being built. The number of homes coming forward in the district at a stage towards the top of the development sequence, will need to be assessed in the AMR, and compared with the Structure Plan figure for that stages in the sequence. If there is a significant shortfall or surplus in the level of provision, it may be necessary to review the housing policies for the Cambridge Southern Fringe to seek to make the necessary adjustment in build rates or provide elsewhere.

E4.9 Whilst it is not anticipated, if the situation were to arise where this could not meet the housing needs of the area, there would be a need to review the development strategy for the Cambridge Sub Region to identify the next most sustainable location for the shortfall in development. This is in the

context of a Structure Plan hierarchy which has sites within, and then on the edge of, market towns next in the locational sequence for development. Villages are at the bottom of the sequence and there should be no automatic assumption that any shortfall should be made up in villages in South Cambridgeshire.

Table E4: Cambridge Southern Fringe Core and Local Output Indicators
