Housing Management					
AH211 Average days to re-let all housing stock					
Anita Goddard					
<p>Past 12 months</p>	Apr	16	17	A small level of fluctuation within the year is normal. At this stage there are no clear underlying causes for the increase seen in May and June; however we are aware that we have had an increase in voids that require significant works during the early part of the year and will continue to monitor this trend going forward.	
	May	19	17		
	Jun	20	17		
Housing Advice					
AH203 Number of households in temporary accommodation					
Susan Carter/Heather Wood					
<p>Past 12 months</p>	Jun	59	50	AH203, AH208, AH212 Associated Risk - STR10 Increase in cost of managing homelessness Figure remains consistent with last quarter (60) and compares with 65 in Q1 of 2016/17. This is higher than target largely due to difficult private rented sector and high levels of homelessness over the past year.	
			60		
AH208 Number of households helped to prevent homelessness					
Susan Carter/Heather Wood					
<p>Past 12 months</p>	Jun	57	30	27	Excellent prevention figures achieved for this quarter, up from 39 last quarter and 24 in Q1 of 2016/17. A high proportion of preventions were due to offers via the housing register and assistance accessing the private rented sector.
AH212 £s spent on Bed and Breakfast accommodation (cumulative)					
Susan Carter/Heather Wood					
<div style="border: 1px solid black; padding: 5px; width: fit-content;"> Line chart will be included later in the year once additional results are available. </div>	Apr	0	974	1150	
	May	0	1952	2300	
	Jun	240	2926	3450	
Landlord Services					
AH204 % tenants satisfied with responsive repairs					
Anita Goddard					
<p>Past 12 months</p>	Jun	96.2	97	92	The Q1 result of 96.2% is provisional, based on responses received and loaded onto the system to date. As such, there may be up to +/-2% variance once all responses in relation to jobs undertaken in Q1 are received and accounted for. Any change from this result will be reported in the next quarterly position report.
					The final result from Q4 of 2016/17 was 95.7%. This figure has decreased from the 97.6% originally reported during the end of year performance report. As shown in the line chart to the left, recent performance has been consistent, achieving levels above 95% in each of the quarters over the past year. Although this is below the 97% target, satisfaction remains high, and compares with a median figure of 95.15% amongst the 26 organisations that submitted data to the Housemark benchmarking club for Q4 of 2016/17.

Waste Services									
ES418 % of household waste sent for reuse, recycling and composting (cumulative)									
Jane Hunt	Line chart will be included later in the year once additional results are available.	Jun	52.3	50					
Targets confirmed by Shared Waste Board. Interventions to be confirmed.									
					ES408 % of bins collected on schedule (SSWS)				
					Jane Hunt		Apr	98.20	99.50
		May	98.96	99.50					
		Jun	98.71	99.50					
This result is provisional only. There is a time-lag on confirmation as we rely on external provision.									
ES409 % of bins collected on schedule (SSWS)									
Environ. Health & Licensing									
ES406 % major non-compliances resolved (in rolling year)									
Myles Bebbington		Jun	80	90					
Four outstanding incidents across the rolling year. Of these, two are associated with one particular establishment which is due for compliance in August, whilst the remaining two have since been resolved.									
					ES401 % business satisfaction with regulation service				
Myles Bebbington		Jun	82.9	90					
29 of 35 (82.9%) responses indicated satisfaction in Q1, compared with 42 of 48 (87.5%) last quarter. Whilst this is a reduction, analysis of results and sample sizes shows that the reduction is not of great enough significance to be able to attribute this to a genuine reduction in satisfaction between the two quarters. The same can also be said when comparing the most recent result with the 2016/17 quarter 3 result when 33 of 35 (94.3%) indicated satisfaction.

Although below target, spend is at a reasonable level given the effects of staff leave and the new claims automation project, as referred to above. Early indications are that July's result will reduce the gap between target and actual spend. Targets are based on previous years' spend rates; however it's difficult to account for peaks of demand that may have skewed rate of spend in previous years. Equally forecasting of future peaks can only be done speculatively. As such, whilst the target provides a useful benchmark against previous years, at this stage it is not anticipated that this result will cause difficulty in spending the grant by year end.				
Finance				
FS109 % invoices paid in 30 days				
FS109 Associated Risk - STR4 Medium Term Financial Strategy				
Caroline Ryba				
	Apr	94.38	98.5	96.5
	Jun	95.65	98.5	96.5
	May	96.09	98.5	96.5
We continue to struggle to meet targets. Finance contact service managers of the three top monthly contributors to late invoices. Managers of these service areas have been tasked by CMT with addressing localised issues - to report back at the Sept meeting.

May	71.5	65	60
Jun	72.7	65	60

PN510, PN511, PN512, PN513 Associated Risk - STR25 Risk of Designation as Poorly Performance Planning Authority

PN510 and PN511 align with DCLG measurement criteria for designation by providing a cumulative percentage over a two year designation period. The current designation period is Oct 15 to Sep 17, so June's results show % of major (PN510) and % non-major (PN511) applications determined in agreed timeline since Oct 15. Looking at June in isolation, 100% (6 out of 6) of Major applications were determined within 13 weeks or agreed timeline, whilst 93.8% (137 of 146) of non-major applications were determined within 8 weeks or agreed timeline.

PN511 % of non-major applications determined within 8 weeks or agreed timeline (desig. period cumulative)

Sarah Stevens

Apr	78.2	75	70
May	78.8	75	70
Jun	79.5	75	70

PN512 % of appeals against major planning permissions refusal allowed (designation period cumulative)

Sarah Stevens

New PI - no line chart.

Jun	8.1	5	10
-----	-----	---	----

Due to the increased number of Major appeals received as a result of the lack of a 5 year land supply, as of the end of August we are in a position whereby 8.97% of Major application decisions made between Apr 2015 and end of March 2017 have been allowed. Another six appeals are outstanding, which has the potential to push us over the 10% designation threshold by the end of the designation period (end of December). This situation will continue to be monitored and an update will be provided within the Q2 performance report.

PN513 % of appeals against non-major planning permission refusal allowed (designation period cumulative)

Sarah Stevens

New PI - no line chart.

Jun	1.8	5	10
-----	-----	---	----

PN505 % customers satisfied with Planning and New Communities

Sarah Stevens

Apr	52	70	60
May	64	70	60
Jun	58	70	60

The Planning Department investigates the nature of complaints and negative feedback to identify common themes and take action to address issues as necessary. In recent months the number of responses to the satisfaction survey have been low (14 in Apr, 19 in May and 20 in June), resulting in relatively high levels of variation. As such, arrangements for measuring and reporting customer satisfaction with Planning and New Communities will be reviewed in time for 2018/19 to ensure that this provides a greater level of insight.
