

**Question received from Mrs Mireshini Naidu of Woodfield Lane, Cambourne**

My husband has multiple sclerosis and is in a wheelchair and unfortunately my mum has had a fall and is also in a wheelchair! Therefore it is crucial that there are no delays in the response time if fire crew attend a fire emergency at our home.

Why are the council not applying to the magistrates court for an injunction or a planning enforcement order to remove the wrongfully erected, obstructing fences which will cause a delay in response time during a fire emergency??? Putting our lives and the lives of the firemen who come to help us at risk and also potentially increasing damage to property!
