- Pollution
- The absence of any special circumstances that would justify impacting on the Green Belt
- Impact on health and wellbeing of neighbours
- Unacceptable intensification of use in a residential area
- Neighbours should not be expected to provide their own noise mitigation measures

The District Environmental Health Officer outlined what noise investigations had been made by South Cambridgeshire District Council, and summarised the key elements needed to prove statutory nuisance.

The Committee **refused** the application, contrary to the recommendation in the report from the Planning and New Communities Director. Members agreed the reasons for refusal as being inappropriate development in the Green Belt; conflict with the site's Green Belt function of preserving an appropriate open gap between Cambridge and Girton; the intensification of use, which would have an adverse impact on the amenity of neighbours by virtue of noise and light pollution; and that the very special circumstances set out in the application were insufficient to clearly outweigh the harm that would be caused, and therefore contravened policies contained in the South Cambridgeshire Local Development Framework 2007.
