As required by the Licensing Act policy, the application was sent to all responsible authorities for consultation as part of the licensing application process.

## **Relevant representations**

Written representations were received from Environmental Health and 17 interested parties. The applicant's response to the representations was received on 30 July 2020 and this response was sent to the interested parties along with the Environmental Health representation. Three of the written representations were withdrawn.

### Observations:

The panel heard representations from the applicant who explained the nature of the business, how the premises are used, how daily operations work at the premises and how it is used for events at which alcohol is sold. The applicant explained the measures that were in place to prevent public nuisance and disorderly behaviour. She explained that there had been no formal noise complaints made against the venue, or health & safety concerns.

The applicant informed the committee that they had applied for an off-licence application so that alcohol purchased specifically for the event could be bought back by families or groups afterwards. Stall-holders also wished to sell items such as locally produced cider at other types of events.

The applicant acknowledged that noise and sound leakage could be an issue as highlighted in the representations. To deal with this the company had obtained listed building consent to insulate the walls & roof to reduce sound leakage. Advice was sought to identify the most appropriate insulation to achieve this.

### Decision

Taking all the above into account the Sub-Committee **agreed** to grant the Premises Licence subject to the incorporation of the suggestions from the Environmental Health Officer and which the applicant had agreed.

### Reasons:

- The sub-committee noted that the business was running well and successfully and did not wish to inhibit the functioning of this business. Due to the nature of the representations however, it decided the following conditions should be applied.
