

APPENDIX A

14th July 2017

Joint letter to Greater Cambridge Partnership

Residents and businesses in Cambridge and the surrounding villages are concerned that the City Deal is rushing through plans for major development and transport schemes that lack a clear overall vision, are not evidence-based and have been progressed using a flawed model of top-down 'consultation'.

The need to spend the first tranche of funding quickly has meant that so far this has not been a holistic programme to successfully manage rapid growth in a way that is sustainable and not environmentally damaging.

We call upon the City Deal to re-engineer the process to facilitate more effective partnership and collaboration so that the skills and talents of Cambridgeshire residents and businesses can also be engaged in proper research and evaluation of new infrastructure projects, in order to deliver a long-term vision for our region that is about health, well-being and community as well as economic success.
