

<b>Report to:</b>	Grants Advisory Committee 29/07/2022
<b>Lead Cabinet Member:</b>	Lead Cabinet Member for Finance
<b>Lead Officer:</b>	<b>Bode Esan</b>

## Grants to Voluntary Sector: Zero Carbon Communities Grant 2022/23

### Executive Summary

This report sets out proposals to the Grants Advisory Committee (GAC) for awards from the Zero Carbon Communities (ZCC) Grant Scheme. Members are asked to consider the grant applications (details in **Tables 1 and 2 of Appendix A**) and officer panel recommendations and make a recommendation to the Lead Cabinet Member for Finance.

### Key Decision

1. This is not a key decision as the Zero Carbon Communities grant scheme will be funded from within existing budgets.

### Recommendations

2. It is recommended that the GAC:
  - a. reviews all applications to the Zero Carbon Communities (ZCC) Grant Fund for 2022/23 as set out in **Tables 1 and 2 of Appendix A** to this report; and
  - b. agrees recommendations to the Lead Cabinet Member for Finance for allocating the ZCC grant funding with reference to the eligibility and assessment criteria as set out in the [ZCC Criteria and Guidance](#), and the officer panel scores in **Appendix A**.

### Reasons for Recommendations

3. The priorities for the ZCC grant fund were recommended by CEAC (4 Feb 2019) and by GAC (29 Mar 2019) and approved by Cabinet on 01 May 2019. The grant enables parish councils and community groups to run projects which reduce carbon emissions/lock up carbon and engage communities on climate change.
4. The ZCC grant first funded projects in 2019/20 since which, the Council has funded 51 projects amounting to approximately £310,000.

A total of £120,544 is available for funding in this round of the ZCC grant. This includes an underspend of £20,544 from the ZCC grant scheme in 2021/22. A recommendation was also made by the Grants Advisory Committee on the 25 February 2022 to make £15,000 of this underspend available for a Community Climate Leader training programme.

5. In 2022/23, applications were accepted for two categories, carbon emission reduction/ locking up carbon, and community engagement on climate change. These revisions were made following the Grants Advisory Committee meeting on 25 February 2022, having received approval from the Climate and Environment Advisory Committee. These categories were allocated the following percentages of the total grant fund:
  - a. Carbon emission reduction/locking up carbon (70%)
  - b. Community engagement on climate change (30%)
6. Case studies for all previously grant funded projects are available on the Council's website: <https://www.scambs.gov.uk/nature-and-climate-change/zero-carbon-communities/zero-carbon-communities-grant-funded-projects/>.
7. A workshop was held on 26 April to provide those interested in applying with further information and support. This included an overview of the grant, examples of previous projects, and guidance on submitting a successful application.
8. Applications for the **Carbon emission reduction/locking up carbon** category were assessed and scored independently by three officers. Two from the Climate, Environment and Waste team, one from the Commercial Development and Investment team.

Applications for the **Community engagement on climate change** category were assessed and scored independently by four officers. Two from the Climate, Environment and Waste team, one from the Housing Strategy team and one from the Communications and Communities team.

All officers provided a range of prior experience, including low carbon investment, low carbon strategy and policy, community sustainability and the making, awarding and monitoring of grant schemes.

9. Independent assessments were made using the weightings (as decided by officers) shown in **Table 3, Appendix B**. The scores were calculated using the methodology shown in **Table 4, Appendix B**. Where there were declarations of interest by the officers, their scores were excluded from the average weighting. Each project was discussed, and the officer panels confirmed their scores after which an average score was calculated. The officer panel rankings were then agreed.
10. **Appendix A** details the officer scores for each theme, ranked in order of highest to lowest. The projects which could be funded under the nominal allocation for

each theme are shown as shaded. One project in **Table 1, Appendix A** is shown as red, this project was one of two put forward by the same organisation. It was felt that the other project aligned with the aims of the ZCC Grant more closely.

In the 25 February GAC meeting, a recommendation was made to set aside £15,000 for a Community Climate Leader Training Programme. Such a programme has applied to the Grant scheme and received the highest score in the Community Engagement on Climate Change category. It is, therefore, recommended to fund this project with the funding set aside. This project is indicated in yellow in **Table 2, Appendix A**.

Owing to the high scoring of the Community Engagement on Climate Change projects, members are invited to consider adjusting the allocations to allow stronger applications over all to take precedence. This distribution is reflected by the grey shading in **Tables 1 and 2 in Appendix A**. To permit more projects to be funded from the limited budget, in one case, Members are invited to offer a lower amount than requested. The project in question will still be able to go ahead. **Tables 1 and 2 in Appendix A** present recommendations for funding amounts.

11. The project scores (**Tables 1 and 2 in Appendix A**) align with the priorities for the grant fund and show a wide geographical spread across South Cambridgeshire.

## Details

12. The Council is committed to supporting the shift to zero carbon emissions in the district by 2050, as demonstrated by the motion passed at its November 2018 meeting.
13. Round four of the ZCC grant scheme was launched on 21 March 2022 for non-profit groups or organisations based in South Cambridgeshire (or benefiting South Cambridgeshire residents) and South Cambridgeshire Parish Councils.
14. The ZCC grant scheme builds upon the Council's strong record of supporting community level action on sustainable energy through SPEP (now the Zero Carbon Communities Programme) and the previously launched, but discontinued, Community Energy grant.
15. The funds available for the ZCC grant will be taken from the Renewables Reserve (business rates retained from commercial renewable energy projects in the district). The 2022/23 total grant fund is £120,544.
16. The scheme provides for one-year funding agreements, where projects are required to be completed within one year of awards being made.

Applicants were invited to apply for £1,000-15,000 per project which needed to meet the following objectives

### **Carbon emission reduction / locking up carbon:**

- a. The project reduces the production of carbon emissions or reduces carbon dioxide in the atmosphere.
- b. The project contributes additional value (e.g. funding contributions; volunteer time/expertise from other sources; collaboration between organisations, and/or evidence of local and/or Member support; communication of the project to the local community).
- c. The project is sustainable and will have a 'lifetime' impact on the local and wider community.

**Community engagement on climate change:**

- a. Achieving wider community engagement and behaviour change around climate change.
- b. Additional value (e.g. funding contributions or contributions in kind, e.g. volunteer time/expertise from other sources, collaboration between organisations, and/or evidence of local and/or Member support).
- c. The project is sustainable and will have a 'lifetime' impact on the local and wider community.

Average Officer scores for each objective of each category are shown in **Tables 1 and 2 in Appendix A**.

17. The fund was open for applications for the seventeen-week period between 21 March and 17 June 2022, with the deadline extended from 29 May. Applications were invited from Parish Councils and local community groups in South Cambridgeshire. Promotion of the scheme was through an online ZCC grant workshop in June, press release, ZCC newsletter, social media posts, the Cambridge Council for Voluntary Service (CCVS) newsletter, Cambridge Carbon Footprint Newsletter, Cambridgeshire ACRE (Action with Communities in Rural England), emails to parish councils and interested parties, the weekly bulletin for district councillors and the e-bulletin to parish councils.
18. Information for Applicants can be found on [our Guidance Notes and Criteria webpage](#). Full grant criteria and guidance, and further information were provided in dedicated Criteria and Guidance, and Information documents during the application window.
19. Twenty-two applications were received from parish councils and local community groups. All but one were deemed eligible for consideration at the Council Officers' panels held between 14 – 19 July. Where two applications were made from the same organisation, a decision was made as to which best aligned with the priorities of the Grant scheme.
20. The total funding requested from the 21 eligible applicants was £190,330.70. This exceeds the total grant fund available in 2022/23 of £120,544. Summaries of the applications can be found in **Appendix C**.
21. Each application was discussed by the officer panel and listed in order of the average score within each stream. (**Tables 1 and 2 in Appendix A**)

22. Applicants will be notified of award decisions following call-in, and before the end of the first week in September.

### **Options**

23. Following consideration of all applications, the GAC could recommend to the Lead Cabinet Member to:
- a. award funding as recommended by the officer panel,
  - b. award some or all of the funding in an alternative allocation to that recommended by the panel, stating the reasons for this.

Such consideration should be given to the applications listed in **Appendix A, Tables 1 and 2.**

### **Implications**

24. In the writing of this report, taking into account financial, legal, staffing, risk, equality and diversity, climate change, and any other key issues, the following implications have been considered: -

### **Financial**

25. The awards recommended are within the Council's proposed budget for 2022-23.

### **Legal**

26. Funding agreements with grant recipients will be drawn up in accordance with templates approved by the legal team. Funding agreements will allow variation or recovering of the grant in specific circumstances.

### **Consultation responses**

27. This report has been circulated to the Climate and Environment Advisory Committee and Members of this committee have been invited to attend the GAC meeting to contribute their views.

### **Effect on Council Priority Areas**

28. The Zero Carbon Communities grant scheme has attracted significant interest. All the aims below from the SCDC Business plan 2019-24, will be furthered by one or more of the projects recommended for funding.

### **Growing local businesses and economies**

29. Promoting village-based businesses to encourage people to use local shops and food outlets.
30. Investing in renewable technologies.

31. Helping to ensure people's homes are close to their jobs and can be accessed by walking, cycling and using public transport.

### **Being green to our core**

32. Supporting community groups to promote behavioural change and reduce the reliance on fossil fuels.

33. Helping communities to secure grants to fund green projects.

34. Protecting and enhancing the district's heritage and environment.

### **A modern and caring Council**

35. Funding community and voluntary groups that benefit local people.
